**APPEARANCES** 1 FOR THE PLAINTIFF: 2 3 Messrs. Kristopher Davis and Adam Hoffman Russ August & Kabat 12424 Wilshire Boulevard, 12th Floor 4 Los Angeles, CA 90025 5 Ms. Andrea L. Fair 6 Miller Fair Henry PLLC 1507 Bill Owens Parkway 7 Longview, TX 75604 8 FOR THE DEFENDANTS: 9 Mr. Josh A. Krevitt Ms. Katherine Dominguez 10 Mr. Charlie Sim Gibson Dunn & Crutcher, LLP 11 200 Park Avenue, 48th Floor 12 New York, NY 10166 Mr. Robert Vincent 13 Gibson, Dunn & Crutcher LLP 2001 Ross Avenue, Suite 2100 14 Dallas, TX 75201 15 Mr. Andrew W. Robb Gibson, Dunn & Crutcher LLP 16 310 University Avenue Palo Alto, CA 94301 17 Ms. Hannah L. Bedard 18 Gibson, Dunn & Crutcher LLP 1700 M Street, NW 19 Washington, DC 20036 20 Mr. Tom Gorham Gillam & Smith, LLP 21 303 South Washington Avenue Marshall, TX 75670 22 Mr. Deron R. Dacus 23 The Dacus Firm, PC 24 821 ESE Loop 323, Suite 430 Tyler, TX 75701 25

\*\*\*\* PROCEEDINGS \*\*\*\* 1 2 THE COURT: For the record, we are here for the 3 completion of the pretrial conference in Headwater 4 Research versus Verizon Communications, which is 2:23-352 on our docket, as well as taking up, and 5 09:03AM hopefully completing, the pretrial conference for 6 7 Headwater Research versus T-Mobile US, which is our 8 2:23-379 case. Would counsel state their appearances for the 10 09:03AM record. 11 MS. FAIR: Good morning, Your Honor. Andrea 12 Fair on behalf of Headwater. I'm joined today by Mr. Kristopher Davis, Mr. Adam Hoffman, and we are ready 13 14 to proceed. 15 THE COURT: All right. Thank you, Ms. Fair. 09:03AM 16 MR. GORHAM: Good morning, Your Honor. Gorham on behalf of T-Mobile Defendants. I'm joined 17 18 this morning by Dr. Deron Dacus, representing Verizon. 19 Representing Verizon and T-Mobile are a number of Gibson 20 Dunn lawyers. We have Ms. Kate Dominguez, Mr. Robb 09:04AM 21 Vincent, Mr. Josh Krevitt, Mr. Charlie Sim and Andrew 22 Robb, and Ms. Hannah Bedard. 23 Defendants are ready, Your Honor. 24 THE COURT: All right. Thank you, Mr. Gorham. 25 We left off last week with the exhibit issues,

09:04AM

09:04AM

09:05AM

09:05AM

09:06AM

```
#: 24615
   so I want to take up the exhibits; and I understand the
1
2
   way counsel have prepared them, we can take up the
3
   exhibits for both cases at the same time, and that's
   fine.
4
            I then want to take up any other issues that
5
   may have been careted or are otherwise unresolved
6
7
   regarding the Verizon case and then take up T-Mobile and
8
   go back to any issues from the pretrial order that are
   different with respect to T-Mobile, then take up the
10
   MILs, to the extent they are different with respect to
11
   T-Mobile, and hopefully end the day with both cases
12
   being ready for trial.
13
            And I will say that it's my understanding that
   there are discussions going on in the Empire case which
14
   is, as I understand it, the only case ahead of
15
   Headwater/Verizon. So I think there's a very real
16
   chance that that case, that the Verizon matter will be
17
18
   first up on the 23rd, in two weeks.
19
            So having said that, I would like to hear from
20
   either side if there are additional issues that you want
21
```

to make sure are on the agenda for today. It would be helpful to know about them in advance.

Mr. Davis?

MR. DAVIS: Thank you, Your Honor.

So I think as we mentioned at the last pretrial

23

22

24

25 09:06AM

conference, the issue of indemnification we wanted to 1 talk about at some point during the conference as well. 2 3 THE COURT: And that is in this case affecting Apple; is that right? 4 5 MR. DAVIS: That affects at least Apple and 09:06AM Google, who have been identified with witnesses in the 6 7 Verizon and T-Mobile witness lists as potential 8 may-call-live witnesses. 9 THE COURT: All right. I will make sure that 09:06AM 10 that is on the agenda for later today. 11 MR. DAVIS: All right. Thank Your Honor. 12 MR. KREVITT: Good morning, Your Honor. only thing I would add is we've received, Your Honor, is 13 14 rulings of this morning and are digesting them. least one of the rulings, the summary judgment with 09:07AM 15 respect to the '042 patent implicates in our view, or 16 likely implicates in our view one of the motion in 17 18 limine rulings Your Honor had, and we'd like an 19 opportunity to think about that, not stand at the podium 20 half-baked and give you my preliminary thoughts on that, 09:07AM 21 but we'd like an opportunity to address that at some 22 point, hopefully soon this morning. 23 And then in addition, Your Honor, as you'll 24 recall from when we were last together, if we have an 25 opportunity, we thought it might be helpful for Your 09:07AM

Honor to hear brief argument with respect to the claim 1 construction issues. One of those patents was the '042 2 3 patent. That, of course, has been resolved. The other is the '541 patent that has a claim construction issue 4 baked in explicitly so by the Plaintiffs and our related 5 09:08AM Daubert motion. 6 7 So if we have time, I just wanted to remind the 8 Court that we had discussed and think it may be helpful 9 to address those briefly. 10 THE COURT: And I do intend to go back through 09:08AM 11 the MILs, to the extent that T-Mobile has a different 12 take on any of them. The issue that you're mentioning about the '042 I assume relates to the copying question? 13 14 MR. KREVITT: Actually, no. Your Honor. maybe let me just identify for the Court. You'll recall 15 09:08AM 16 that MIL 4 was a motion in limine that Verizon filed with respect to a Mr. Russell. He had filed a 17 18 whistleblower. We had extensive discussion. 19 Your Honor had extensive discussion with 20 Mr. Rosenthal on our side and Mr. Chang for Headwater 09:09AM 21 about whether the Cooklev report actually tied what was 22 in those documents to the '042 patent or not. Mr. Chang 23 referred you to paragraph 90 and walked you through 24 several paragraphs in the Cooklev report. 25 Ultimately Your Honor concluded -- I think your 09:09AM

#: 24618

7

words were that you were persuaded that Mr. Cooklev --1 2 or I'm sorry; it may be Dr. Cooklev; I'm not sure -- had 3 connected those allegations, those paragraphs to the 4 '042 patent and, therefore, denied our motion in limine. 5 There is no more '042 patent in light of Your 09:09AM Honor's rulings; there is no more Dr. Cooklev in light 6 7 of Your Honor's rulings. He is here only to talk 8 about -- or would have been here only to talk about the '042 and, as a consequence, there is no basis for any of those documents to come in, given that they are relevant 09:09AM 10 11 only to the '042 patent. That's the ruling. 12 We are digesting Your Honor's ruling in light of the other MIL, including the copying, but the one 13 14 that I am certain that we believe requires revision is Motion in Limine Number 4, which was tied explicitly and 15 09:10AM 16 entirely to the '042 patent. 17 THE COURT: And I feel the need to say for the 18 record that I recognize that the recommendation on the 19 '042 is not -- has not been adopted and may or may not 20 be adopted, but I will also say that I am proceeding on 09:10AM 21 the assumption that it will be with the understanding 22 that if it's not --MR. KREVITT: Yes, Your Honor. 23 THE COURT: -- we will revisit the issue. 24 Ι 25 just say that because I don't want the record to reflect 09:10AM

that I am assuming the outcome. 1 MR. KREVITT: I should have said that as well, 2 3 Your Honor. THE COURT: 4 No. MR. KREVITT: Apologies. 5 09:11AM THE COURT: I'm more best to say that, not you. 6 7 In any event, all right. I will note that that's 8 something that, at the end of the day, we'll address. 9 MR. KREVITT: Thank you, Your Honor. 09:11AM 10 THE COURT: Thank you, Mr. Krevitt. 11 All right. With respect to the exhibits, I 12 would like to take up first the Defendants' objections to the Plaintiff's exhibits. And we have had emailed to 13 us, either yesterday or this morning, an updated bucket 14 list on those, and I'll see that those bucket lists are 09:11AM 15 exhibits to the minutes so that it will be 16 understandable in the record what we're talking about 17 18 when we refer to it, but the first of those relates to 19 marking and that's bucket 1 of group 1. 20 So if the Plaintiff wants to tell me about 09:12AM 21 those and then I'll hear from the Defendant as well. 22 MR. HOFFMAN: If we can have the... 23 Your Honor, we have some slides that we 24 prepared. May I approach? 25 THE COURT: Yes. 09:13AM

09:13AM

09:14AM

09:14AM

09:14AM

09:14AM

25

And, Mr. Hoffman, let me just say that I don't 1 2 know the level at which you were able to confer with the 3 other side about these things. If you think it would be more efficient for me to hear what their objections are 4 before you tell me about the exhibits, I'm open to go 5 6 either way. 7 MR. HOFFMAN: I think, Your Honor, since we 8 already are set up here, maybe at least for this one, it makes sense for me to proceed. 9 10 THE COURT: All right. 11 MR. HOFFMAN: It might make sense to do it the 12 other way for some of the other buckets. So, Your Honor, what's at issue here is the 13 marking page Your Honor's heard quite a bit about, the 14 ItsOn marking page in last week's hearing and ruling on 15 16 the summary judgment on marking. So obviously these mark -- in terms of relevance, there's a high degree of 17 18 relevance for these marking page, not only for marking 19 but also for notice as it relates to willfulness and 20 also for validity. 21 So the degree that the objection is really 22 about hearsay because it's an ItsOn document, at least 23 for willfulness, the documents are not being offered for 24 the matter -- for the truth of the matter asserted.

They are being offered to show these are documents that

were produced from Headwater's records and they're kept 1 in the normal course of business. 2 3 Your Honor, I put on the screen a deposition from Krista Jacobsen, which was -- who was the internal 4 counsel at Headwater, and I can -- if Your Honor would 5 09:15AM like a copy of that, I can also give you a copy. 6 7 Ms. Jacobsen testified that Headwater worked 8 with ItsOn to figure out which patents should be on the 9 marking page, which patents the ItsOn products 09:15AM 10 practiced. They collaborated with them on the contents 11 of the marking page and, of course, ItsOn was closely 12 related, at least early on, with Headwater and its primary licensee and also its main pathway to 13 14 commercializing its patents. So it's natural that Headwater would maintain records of the ItsOn marking 09:15AM 15 16 page. THE COURT: Are you contending that these 17 18 marking pages would be admissible whether or not the 19 Defendants are going forward with a defense of failure 20 to mark? 09:16AM MR. HOFFMAN: Yes, Your Honor. It's part of 21 22 the argument for how Defendants were given or made aware of the patents by Headwater and ItsOn in terms of 23 24 willfulness, and it's also relied on by our expert in

terms of validity as well, in terms of commercial

25

09:16AM

1 success and practice. I'd also point out, Your Honor, that both 2 3 damages experts as well -- oh, sorry. Actually that's for the next one. 4 Yeah, so we don't believe it is hearsay and it 5 09:16AM 6 is relevant to issues besides marking, Your Honor. 7 THE COURT: All right. 8 MR. VINCENT: Your Honor, Robert Vincent for 9 Defendants. On these marking pages, Defendants recognize Your Honor's order of this morning on the 09:17AM 10 11 summary judgment of Defendants, at least Verizon's 12 marking summary judgment; and although it has not been admitted in T-Mobile, I imagine that a similar order is 13 14 going to be issuing soon on a similar motion in the T-Mobile case. 09:17AM 15 16 Notwithstanding that fact, these marking pages remain hearsay for all of the reasons that counsel just 17 18 explained as to why they might be relevant. 19 THE COURT: How long --MR. VINCENT: They cannot be evidence as to 20 09:17AM 21 practice of the patents. 22 THE COURT: How are they hearsay as to notice? 23 MR. VINCENT: Well, for Verizon there's no evidence at all that I'm aware of -- counsel can correct 24 25 For Verizon, there's no evidence that Verizon ever me. 09:18AM

knew about the Web page. There's zero evidence that 1 2 ItsOn or Headwater or anyone conveyed the existence of 3 the marking page to Verizon, to any Verizon employee. There -- it cannot be evidence of notice to Verizon when 4 there's simply no evidence that any Verizon employee 5 09:18AM ever knew about it. 6 7 For T-Mobile, there is evidence that ItsOn 8 conveyed the existence of the website to Sprint 9 emplovees. There's no evidence that any Sprint 09:18AM 10 employees visited that website. But nevertheless, for 11 Sprint, T-Mobile, it cannot be -- it is hearsay for the 12 concept that any ItsOn product practiced those patents. Your Honor heard extensive discussion last week 13 14 about this issue, and all -- at most, what the Headwater 15 and ItsOn employees testified was that the process was 09:19AM 16 that they, at least one claim of those patents, at least 17 one claim was practiced. They put it -- of some product 18 was put on the website, not the asserted claims. 19 they're not even -- and it wasn't -- didn't mention the 20 '613 patent. Only the '541 patent was listed on the 09:19AM 21 website. So it's definitely hearsay for trying to 22 establish that the products practiced the patent. 23 Again, Your Honor, not to revisit the arguments 24 last week, they have a burden to show that -- to link, 25 to show a nexus to link, to establish that these 09:19AM

09:20AM

09:20AM

09:20AM

09:21AM

09:21AM

22

23

24

25

13 PageID #: 24624 products practice the asserted claims here, and they 1 2 have no evidence, no witness testimony, no competent 3 testimony to establish that fact. 4 They cannot -- certainly can't do so because a patent appears on a website. That is insufficient 5 itself substantively. It's also, under the rules of 6 7 evidence, hearsay for that purpose, to the extent they 8 are going to try to somehow get that inference before the jury, that the existence of a patent on a website, a 10 patent number on a website somehow means that these 11 asserted claims were practiced. It's insufficient 12 substantively, but for these purposes, it's hearsay for that purpose. 13 14 So I think, Your Honor, that's -- all of these issues, I think Your Honor mentioned notice; I've 15 16 addressed that. Practice, practice of the patents. 17 It is -- these documents are hearsay for those 18 So to the extent -- in the Verizon case, purposes. 19 again, the Verizon case, there's no basis at all for 20 these to come in for issues for purposes of notice 21

purposes. So to the extent -- in the Verizon case, again, the Verizon case, there's no basis at all for these to come in for issues for purposes of notice because there's no evidence that Verizon ever saw it.

For T-Mobile/Sprint, even if they came in because Sprint had knowledge of the website, even though there's no evidence that anyone visited, they can't come in for any purpose to in any way insinuate that the ItsOn products

that were sold to Sprint practiced the patents and 1 that's one of the bases on which counsel said that they 2 3 were relevant and probative. That can't be the case. That's definitely hearsay. That's an out-of-court 4 statement, and what we know about those, the creation of 5 09:21AM those websites necessarily means they cannot show that 6 7 these asserted claims were practiced. 8 THE COURT: Well, to the extent it is hearsay, 9 Mr. Vincent, the witnesses could still testify that they 09:21AM 10 believe they marked it through that marking page, even 11 if the marking page is not in evidence. How would that 12 be hearsay? 13 MR. VINCENT: A witness could testify that they 14 had a marking page. A witness could testify -- again, the Defendants are differently situated. But for at 15 09:22AM least T-Mobile and Sprint, their witnesses could say 16 17 that a marking page existed and the '541 patent was 18 listed on the page. 19 What they can't say, what they can't imply, 09:22AM 20 what they can't use that evidence for is to argue that 21 that means these -- that means the asserted claims here 22 were practiced. 23 Again, we're talking about practice because 24 counsel raised that as one of the reasons why these 25 documents are relevant and admissible. That cannot be 09:22AM

1 the case. THE COURT: All right. Thank you, Mr. Vincent. 2 Thank Your Honor. 3 MR. VINCENT: 4 MR. HOFFMAN: Your Honor, many of these arguments just made go to Daubert motions and motions 5 09:23AM for summary judgments that are pending rather than 6 7 evidentiary issues. The -- counsel didn't really 8 respond to the argument that these are documents kept in the normal course of business. 10 Again, ItsOn and Headwater shared management 09:23AM 11 and ownership of; and, more importantly, Headwater 12 was -- we have testimony that Headwater was directly 13 involved in working with ItsOn to identify the patents, 14 to put them on their page. And ItsOn also was their 15 licensee and primary partner in monetization; therefore, 09:23AM was completely within the normal course of their 16 17 business to retain records of the marking page, and the 18 pages we're talking about were produced by Headwater 19 from its records. 09:24AM 20 THE COURT: Are these marking pages websites 21 that were maintained by Headwater or ItsOn? 22 MR. HOFFMAN: The websites themselves were 23 maintained by ItsOn. The printouts of the website were 24 kept in Headwater's records and that's what we're 25 looking at here. 09:24AM

THE COURT: So you're saying that the exhibits 1 themselves are Headwater documents? 2 3 MR. HOFFMAN: Yes, Your Honor. They are printouts from the marking page that Headwater 4 maintained in its files. 5 09:24AM 6 THE COURT: And --7 MR. HOFFMAN: And Dr. Raleigh can testify to 8 that at trial. 9 THE COURT: Has he testified to that already? He hasn't. I don't think he was 10 MR. HOFFMAN: 09:24AM 11 asked directly about that in his deposition. 12 THE COURT: What is your way to connect these marking pages to Verizon in terms of notice? 13 14 MR. HOFFMAN: Well, first, it seems like 15 there's a concession that these were provided to 09:25AM 16 T-Mobile, so I just want to note that. 17 And, Your Honor, I don't -- counsel I think 18 correctly pointed out that they are not directly 19 relevant to Verizon for the notice issue, but that's why 20 we would look to the business records exception there 09:25AM 21 and for T-Mobile that it's not being offered for the 22 truth of the matter because it's being offered as evidence of notice. 23 And it's not the only evidence of notice. 24 Ιt 25 is a piece of a number of communications that, together, 09:25AM

09:27AM

Page 18 of 238 17 PageID #: 24628 show notice to T-Mobile. THE COURT: As you know, one of the requirements of 803(6) is that the records are prepared by a person with knowledge. What evidence do you have that the person who prepared these documents had knowledge of whether the patents practiced or the product practiced the patents? MR. HOFFMAN: Well, in terms of the contents of the document, again we have testimony about the consultation between Headwater, its counsel, and ItsOn engineers to making the determination for the contents of the document. In terms of preparing the printout, I don't

believe, again, that that's been addressed in deposition, but Dr. Raleigh didn't address that at trial.

THE COURT: And what will he say that will indicate that the person responsible for putting the patent on the marking page had knowledge of whether the ItsOn services practiced the patents that were on the page?

MR. HOFFMAN: Well, Dr. Raleigh has testified about the way in which the marking page was determined. Again, consultation between Headwater's lawyers and engineers at ItsOn, so people who knew the patents well

```
and people who knew the products well, consulting to put
       1
         it on there.
      2
       3
                   He's identified who those people are.
         Lavine, for example, was usually the engineer on the
       4
                      Krista Jacobsen was usually involved, if
      5
         ItsOn side.
09:27AM
         not always on as internal counsel for Headwater. And,
      6
      7
         again, Ms. Jacobsen also testified about that process
      8
         and the way in which Headwater collaborated with ItsOn
         and the ItsOn engineer to determine what goes on the
09:28AM
      10
                And obviously the ItsOn engineers had knowledge
      11
         of the products, and Headwater had knowledge of ItsOn
      12
         patents.
                   THE COURT: All right. Thank you, Mr. Hoffman.
      13
      14
                   MR. VINCENT: Just quickly, Your Honor, a
         couple of responses, just first to make sure the
      15
09:28AM
      16
         record's clear.
      17
                   We do not concede that the marking pages were
      18
         ever provided to Sprint or T-Mobile. There is evidence
      19
         that Sprint employees were aware of the link but no
      20
         evidence that anyone ever visited that link to see what
09:28AM
      21
         patents were, if any, were listed on that page.
      22
                   More to the point, Your Honor, Your Honor asked
      23
         an important question about what evidence there is about
      24
         how these -- how this marking page was created, and this
      25
         goes -- this is such a critical point that touches so
09:28AM
```

many issues.

09:29AM

09:29AM

09:29AM

09:30AM

09:30AM

We know Ms. Jacobsen testified -- and we cited this testimony in our briefing -- we know that they -all that was done was there was a process in place to determine if they believed at least one claim was practiced. And when confronted with the marking page in her deposition and shown the '541 patent, the only patent that matters here, when shown the '541 patent on that page, she was asked, "Can you tell me whether or not ItsOn practiced that patent," she says, "I can't. Ι can't for any specific patent. I know there was a Whether it was followed, I can't tell you process. that." That's point one. So whether there was a process says nothing

about whether that process was followed for this patent because the person who created -- who testified on this issue said she couldn't tell.

And secondly, again, just one claim. What claim? This marking page doesn't list any claims at all, and that is particularly problematic in this case, Your Honor, with the '541 patent. Because logically if you were going to pick a claim, you'd pick the independent claim, Claim 1.

That claim no longer exists, Your Honor.

Headwater disclaimed that claim, along with several

```
others, in the IPR proceedings, and the legal effect of
      1
         that means it's treated as if it was never part of the
      2
       3
         patent.
       4
                   So whether ItsOn practiced Claim 1 of the '541
         patent is irrelevant. It's not protected by any patent.
      5
09:30AM
         Whether the accused products practice Claim 1 is
      6
      7
         irrelevant.
                       They don't have -- Headwater does not have
      8
         a patent protection on Claim 1.
      9
                   The only way it matters in this case is if
      10
         there is evidence that ItsOn practiced the Claims 79 and
09:30AM
      11
         83 of the '541 patent, and there's not any competent
      12
         evidence that they practiced any claim, Your Honor.
         There is certainly no evidence that ItsOn practiced
      13
      14
         Claims 79 and 83. That's all that matters.
                   So, again, these marking pages are only
      15
09:31AM
         relevant to the extent ItsOn practiced those claims, and
      16
         there is no evidence of that happening.
      17
      18
                   THE COURT: We've already talked about the fact
      19
         that the witnesses will be able to talk about what was
      20
         on the marking page. The question we're dealing with
09:31AM
      21
         here is whether the marking page is admissible, and I
      22
         think that there is a reasonable likelihood that
      23
         Dr. Raleigh can establish the requisites under 803(6)
      24
         for that.
      25
                   What I'm going to do is to say that Plaintiff's
09:31AM
```

```
21
```

Exhibit PX35, and I guess in the T-Mobile case, it 1 appears to be PX29 and 35? 2 3 MR. VINCENT: Yes. In the T-Mobile case, there is an email, an email string. I think that there's --4 just to be clear, I think the top of the email string is 5 09:32AM an ItsOn internal email. The rest with -- that would be 6 7 The rest of it is emails with Sprint, with hearsay. 8 Sprint employees. 9 And so that, again, to the extent the marking pages or the existence of the link is relevant, then 10 09:32AM 11 that email, we would not have that portion of the email 12 that is the discussions with Sprint employees, we agree there wouldn't be a separate reason for excluding that. 13 But the marking pages themselves and that email are all, 14 again, hearsay for the purposes we discussed. 15 09:32AM 16 All right. Well, PX35 will be THE COURT: allowed to remain on the exhibit list with an asterisk, 17 18 and I'll make clear when I see the final exhibit list 19 that it's clear to Judge Gilstrap that the order out of this hearing will be that PX35 cannot be used in front 20 09:33AM 21 of the jury until Dr. Raleigh has laid a foundation 22 under 803(6) that passes muster with Judge Gilstrap. 23 As far as PX29 in the T-Mobile case, it seems 24 from what Mr. Vincent just said that the resolution 25 there should be that the email, to the extent it was 09:33AM

```
1
         just between ItsOn employees, would be redacted, but the
         portion that was shared with Sprint could be admissible.
      2
       3
                   Does the Plaintiff have an argument against
         redacting the part that was not sent to Sprint?
       4
       5
                   MR. HOFFMAN: No, Your Honor.
                                                   That makes
09:34AM
      6
         sense.
       7
                   THE COURT: All right.
      8
                   MR. VINCENT: And just to add, Your Honor, I
         note -- I have not had a chance to review all of Your
09:34AM
      10
         Honor's rulings this morning. I know we have summary
      11
         judgment motions on issues of notice and things like
      12
         that.
      13
                   To the extent those rulings affect the
      14
         relevance of the things we discussed, that might be a
         reason to revisit, but I understand Your Honor's ruling
      15
09:34AM
      16
         today.
      17
                               I think, frankly, the hearsay issue
                   THE COURT:
      18
         is for the circumstance that notice is not still
      19
         necessary. To the extent that notice is still a
09:34AM
      20
         relevant part of the case, I think it's a nonhearsay use
      21
         of the document. So I don't expect that to change it,
      22
         but if you think it does, you can certainly raise it
      23
         again.
      24
                   MR. VINCENT: Yes, Your Honor. I understand
      25
         with that explanation. I agree with that explanation.
09:35AM
```

09:35AM

09:35AM

09:36AM

09:36AM

09:36AM

25

23

THE COURT: All right. While you're up there, 1 2 Mr. Vincent, tell me about your objection to the next 3 bucket, which is entitled willfulness/copying. PX26 and 93 and 13, it looks like. 4 MR. VINCENT: Yes, Your Honor. These, 5 according to the list we have from Headwater, appear to 6 7 be all directed to Verizon. PX26 is an email to a 8 Mr. Diaz at Verizon, supposedly attaching an attachment which is not part of that exhibit. And PX93 -- again, I'm going by the list we 10 11 were given -- it's a compilation. It's a compilation of 12 several presentations or several slide decks that Headwater purportedly gave to Verizon, patent briefs. 13 14 They are dated 2009 and 2011. 15 Again, the list we have, there are some 16 duplicates on that list. Obviously I'm assuming those 17 would be removed. But the argument here, and the reason 18 why they should be excluded, is because these go to the 19 investments that Verizon made in Headwater's last ItsOn. 20 And these documents, the 2009 patent brief, for example, 21 that document predates any of the filing dates of the 22 asserted patents. They contain numerous other patent 23 assets. 24 When Verizon's investments began, there were

approximately 30-some-odd patent assets, none of which

```
were the applications or the patents at issue here.
      1
                                                                And
      2
         by the time Verizon ended those investments, there
         was -- I believe the marking page has 88 patents listed,
       3
       4
         numerous patents.
                   These patent briefs that are part of PX93,
       5
09:37AM
         again, predate the patents, contain many other patents
      6
      7
         not relevant to the asserted patents. And so, again,
      8
         can't provide notice and can only confuse the jury into
         thinking that to lump Headwater's patents, IP together,
09:37AM
      10
         to think to that, to come to the mistaken conclusion
      11
         that Verizon was investing, Verizon was knowledgeable
      12
         and interested in Headwater's last ItsOn because of the
         asserted patents, asserted claims, and that's clearly
      13
      14
         not the case.
                   That's why we had the MIL last week about not
      15
09:37AM
         allowing investments and that type of evidence in.
      16
                                                               Ιf
         so, Verizon would be then compelled to bring witnesses
      17
      18
         to explain why the investments had nothing to do with
      19
         these patents. So this is, I think, another flavor of
09:38AM
      20
         that same argument, Your Honor.
      21
                   THE COURT:
                               All right. Thank you, Mr. Vincent.
      22
                   Mr. Davis, tell me the response to the
      23
         relevance objection.
      24
                   MR. DAVIS: So, Your Honor, on the relevance
```

objection for these exhibits, so we're looking at

25

09:38AM

representative exhibits PTX26 and 93.

09:38AM

09:39AM

09:39AM

09:39AM

09:40AM

If I can have the podium, and I have copies of these slides as well, if I may hand those up.

And so what we see here, Your Honor, are PTX26 and 93, and I wanted to highlight as one example the lower right-hand corner from PTX93. So this is a -- what was called an IP portfolio review. You can see it's dated August 24th, 2011. This was provided from Headwater to Verizon, and it provided a number of these types of documents describing Headwater's patents.

I wanted to highlight, as an example, Number 16 that you see here that refers to background services, noncritical downloads that are happening, applying policies and DAS, device-assisted services. It also says it's related to patent area number 15 above that, which discusses increasing network efficiency and avoiding congestion. That is the subject matter of the '541 and '613 patents.

Those claims recite traffic control policies; they recite foreground and/or background determinations and making policy decisions based on that. And so these detailed patent briefs and IP portfolio reviews that Headwater provided to ItsOn are direct -- or, I'm sorry, that Headwater provided to Verizon are directly relevant to the asserted claims.

THE COURT: And where did the remaining 1 asserted patents stand in relation to the August 2011 2 date of this? 3 4 MR. DAVIS: Oh, ves. I see, Your Honor. Those patents were not issued at that time. They claim 5 09:40AM priority back to provisional applications -- or 6 7 actually, nonprovisional applications, I believe. The 8 priority date here is May 25th, 2010. 9 And so I take the point, Your Honor, that maybe 10 you are making that we don't see here the Patent 09:40AM 11 Number '541, the Patent Number '613, but we are 12 describing the way these documents were structured, Headwater was describing to Verizon in great detail all 13 14 these different areas of patents that it had. And so, you know, I think it's certainly fair 15 09:41AM 16 from our perspective to say that these are supportive of Headwater's willfulness claims and its copying 17 18 assertions that this is Headwater putting Verizon on 19 notice of its patent portfolio. 20 It's -- the standard for admissibility of 09:41AM 21 evidence of willfulness or copying does not require that 22 the specific patent number be included. They show that Verizon was well aware that Headwater had an extensive 23 24 patent portfolio, including in specific subject matter 25 areas that are relevant to the claims here. 09:41AM

```
27
```

```
1
         demonstrates a willful blindness.
                   THE COURT: And this is part of which exhibit
      2
      3
         that you have on the screen as your Slide 6?
                               Oh, yes, Your Honor. This is from
      4
                   MR. DAVIS:
         PTX93 in the Verizon case.
      5
09:42AM
                               What about 13 and 26?
      6
                   THE COURT:
      7
                               Oh, yes. So in the top left
                   MR. DAVIS:
      8
         corner, I have a screenshot of PTX26. This is -- this
         is an email from someone at ItsOn to folks at Verizon,
         copying Dr. Raleigh at ItsOn. The subject line is "IP
09:42AM
      10
      11
         review."
                   This is from July 2011, and here the email is
      12
         saying -- and I'm sorry. Maybe actually this is -- I'm
         sorry. This is PTX13, Your Honor.
      13
      14
                   PTX26 is the detailed patent brief.
                                                         That one
         is a little bit earlier. That's from October 2009.
      15
09:43AM
         That has some relevant IP disclosures as well. But the
      16
         email that I was referring to, PTX13, that's talking
      17
      18
         about here is a slide deck that discusses our IP.
      19
                   And so, you know, taken together or
09:43AM
     20
         individually, Your Honor, what this is showing, all this
      21
         evidence, is that Headwater was consistently providing
      22
         information to Verizon about its patenting activities,
         including with sufficient detail that it links to the
      23
      24
         asserted claims.
      25
                  We're not talking about just a presentation
09:43AM
```

```
where Headwater says we have 50 patents generically.
      1
      2
         It's stepping through in detail these are subject matter
       3
         areas that we have patent applications or issued patents
         in.
       4
                   THE COURT: And do you have similar documents
       5
09:44AM
         that cover the area after these asserted patents had
      6
      7
         been issued?
      8
                   MR. DAVIS:
                               No, Your Honor, I don't believe so.
      9
                   Yes, the exhibits that we have here are from
      10
         this general time frame of 2009, 2011, before the
09:44AM
      11
         patents issued.
      12
                   THE COURT: Can you show me something in
         Exhibit 26 that is relevant to the asserted patents in
      13
         the way that what you showed about Exhibit 93 was?
      14
                   MR. DAVIS: Yes, Your Honor. Let's see here.
      15
09:44AM
         Oh, Your Honor, I'm sorry. I think I was confused about
      16
      17
         how this worked. Okay. I'm sorry.
      18
                   So PTX26 is what you see on the upper left
      19
                   That is the email attaching and describing that
      20
         there's an IP review that Headwater's providing.
09:45AM
      21
                   PTX93 actually is a compilation exhibit and so
         that includes both what you see on the right-hand side,
      22
         the August 2011 IP portfolio review; it also includes
      23
      24
         what you see in the lower left corner, the detailed
      25
         patent brief that is another document within PTX93.
09:45AM
```

THE COURT: So 26 is the email. 1 What is 13? 2 MR. DAVIS: 13, I have to check, Your Honor. 3 Give me just a minute here. 4 So 13 is a June 2009 email to Verizon, again talking about IP of Headwater that ItsOn has licensed in 5 09:46AM general, but again I recognize that that's June 2009. 6 7 That is before the priority date of the patents and so 8 we don't have as much detail as we do linking the specific claim limitations with foreground and 09:46AM 10 background like we see in that August 2011. 11 THE COURT: So what is the relevance of 13? 12 MR. DAVIS: Well, I think, Your Honor, that you're seeing some pieces of the IP that is going to 13 14 eventually materialize into the '541 and '613 claims. You don't yet see all of it like the 15 09:47AM 16 foreground/background aspect, but you see the policies 17 and traffic policies start to be developed at that 18 point. 19 THE COURT: All right. And all of the exhibits 20 in this bucket were clearly provided to Verizon by 09:47AM 21 Headwater? 22 MR. DAVIS: That's right, Your Honor. I don't believe there's any dispute about that aspect of it. 23 24 THE COURT: Is there any discussion of the 25 investments that have been excluded by MIL? 09:48AM

MR. DAVIS: I don't believe so, Your Honor, but 1 2 if there is a portion of the underlying documents, we'd 3 certainly be happy to redact that. THE COURT: All right. Thank you, Mr. Davis. 4 5 MR. VINCENT: Respond quickly, Your Honor. 09:48AM 6 I want to make an important response here, and 7 this -- I don't want to overemphasize the point here, 8 but it touches on so many issues. 9 Headwater has claimed that a 2009 patent brief, as Headwater's counsel said, is somehow linked, has 10 09:48AM 11 elements of the '541 patent, has flavors, has --12 Dr. Raleigh testified in this case that the conception 13 date, the conception date of the '541 patent is no earlier than May 2010, and he did so -- he had to do 14 so -- because there was a standing issue. 15 Because if he 09:49AM had conceived of it earlier, there was an issue about 16 whether he owned the patents, about whether Qualcomm 17 18 owned the patents. 19 He testified that the conception date of the 20 '541 patent is no earlier than May 2010. How in the 09:49AM 21 world could a 2009 patent brief then be linked to claims 22 here that had not been conceived of. That cannot make 23 sense, Your Honor. It cannot, and it infects this 24 entire analysis because what Headwater's trying to do --25 again, this touches on so many issues. They are saying, 09:49AM

09:50AM

09:50AM

09:50AM

09:50AM

09:51AM

```
31
```

well, it has this kernel, this nugget of an idea that then evolved. That's not what the law requires.

The law requires a nexus to the claims.

Headwater does not have a claim on policies and background data. They don't have claims on those. They disclaimed Claim 1. Claim 1 itself is a specific way of blocking background data with policies, but they don't have patent on that.

They have a patent on a very specific way of doing -- applying a policy to protect background data using intercepting API messages. There is -- it is logically impossible for a patent brief in 2009 or 2010, it is impossible for that to give notice of these patents when they haven't even been conceived of. It's impossible to give notice of patents where they don't mention the patents, don't mention the applications, and cite concepts like foreground and background that they don't have a patent on.

It's not enough just to point, to pluck out some abstract concept of the claims and say that satisfies it. That's not true, and that's an important point that I, again, I don't want to emphasize too much but it touches on so many issues, Your Honor.

That's why these are prejudicial, because they are not linked to the claims, and allowing them in will

09:51AM

09:51AM

09:52AM

09:52AM

09:52AM

allow the jury to draw the false conclusion that they are.

THE COURT: All right. I agree with your statement that those documents are not sufficient to establish what the Plaintiff is contending, but I disagree that they are inadmissible just because they are not sufficient. And the question that I have to decide is are they relevant in the sense that they make the Plaintiff's argument more likely than it would be without them.

And I guess a related question is: Is that an unfair inference. And I don't think the jury's going to have any trouble understanding arguments based on date, which I know your side will very forcefully deliver. But I do think that these documents are relevant to show that Verizon and Headwater had the kind of relationship where the claim that Verizon was aware of Headwater's patents is more likely to be true than it would be without these. Certainly it differentiates from the ordinary case where first notice of the patents is the service of a lawsuit.

So I will obviously -- you can cross-examine and make your point very forcefully about the date of these things, but I don't think that the jury will be misled when all of the relevant dates are put before

```
Case 2:23-cv-00379-JRG-RSP
                           Document 317-1
                                         Filed 06/26/25
                                                      Page 34 of 238
                                                                    33
                            PageID #: 24644
       1
         them.
       2
                   So I'm going to overrule the objection based on
       3
         the assumption I'm not hearing disputed that all of
          these documents were delivered to Verizon and,
       4
         therefore --
       5
09:53AM
                   MR. VINCENT: Your Honor, may I have just one
       6
       7
         moment, please?
       8
                   THE COURT: You may.
       9
                   MR. VINCENT:
                                  Okay. Your Honor, one,
         there's -- I understand Your Honor's ruling. One
      10
09:53AM
      11
         addition to the exhibit here. PX26 -- Mr. Robb just
      12
         reminded me -- is the email, Your Honor, remember we
         were here a few months ago about production of a native
      13
         email that we have still not received?
      14
                                                    That was the
         email that supposedly attached -- Your Honor will
      15
09:54AM
      16
          remember we had a hearing about a motion to compel where
      17
          they had mixed and matched exhibits, an email and a
      18
         presentation.
      19
                   We asked for the native, and we have still not
      20
          received that actual native email showing what
09:54AM
      21
         attachment was actually made, what was actually attached
      22
```

to that email.

So the presentations, I'm not -- I don't know that the -- all of the presentations were not given to Verizon, but this email that they've cited I think as

23

24

25

09:54AM

PX26, that was the email that was at issue that we still 1 2 don't have the native to know what was attached to that 3 email. THE COURT: So you're saying you received that 4 email, but you don't know what attachments to it you 5 09:54AM 6 received? 7 MR. VINCENT: Yes. Your Honor, we received a 8 version of the email that had no attachments. And not 9 to relitigate that, to revisit that issue, we received a version of that email that did not have attachments. 09:55AM 10 11 In a deposition, Headwater attempted to have a 12 witness link an exhibit, a presentation, to that email, 13 but that is not how they were kept. As of today, I do not believe we have received. 14 And Your Honor ordered them to produce a native 15 09:55AM version of that email, and we still have not received a 16 native version of that email to know what attachments 17 18 were actually included on that native email. 19 again, that is, I believe, PX26. 20 THE COURT: All right. Thank you, Mr. Vincent. 09:55AM 21 Mr. Davis, tell me about Exhibit 26. 22 MR. DAVIS: So, Your Honor, my understanding is 23 we've produced to Verizon what we have and explained it 24 to them in correspondence that -- the document I'm 25 looking at, our correspondence with Verizon, and we say: 09:56AM

```
As to this document, it was produced; you should have
      1
      2
         the metadata native; the metadata shows the file name as
         Χ.
       3
       4
                   I'm not sure, beyond that, what the issue is,
         if there's -- I don't believe there is anything more for
      5
09:56AM
      6
         us to produce.
       7
                   THE COURT: Well, at this point I'm overruling
      8
         the objections to 13, 26, and 93; but after we have a
      9
         break, I will revisit that if Verizon is not successful
         in conferring and confirming what you have said,
09:57AM
      10
         Mr. Davis.
      11
      12
                   MR. DAVIS:
                               All right. Thank you, Your Honor.
                   THE COURT:
      13
                               So we can move on to Exhibit 438,
      14
         which is Group 4.
                   MR. HOFFMAN: Your Honor, this might be a good
      15
09:57AM
      16
         place for Defendants to explain what their objections
      17
         are, since we're not really sure.
      18
                   THE COURT:
                               All right.
      19
                   MR. VINCENT: Yes, Your Honor.
      20
                   The exhibits in this bucket are all things that
09:57AM
      21
         were produced after the close of discovery for which
      22
         they are hearsay and which we believe they will be used
      23
         for -- to convey the truth of the matter, or at least
      24
         attempt interpretation of what those documents say.
      25
                   So, for example, there is data that was
09:58AM
```

```
1
         produced by Apple that Plaintiff's experts relied on in
         a supplemental report. We have motion practice on that
      2
       3
         supplemental report, whether that should be allowed or
         not.
       4
       5
                   But regardless of whether that report is
09:58AM
         allowed, there is data for which they have no testimony
      6
      7
         explaining, authenticating, providing the relevance to
      8
         these documents and that is the issue, Your Honor, is
         that these were produced -- these were not just produced
09:58AM
      10
         late, but there is no testimony explaining the import of
         these documents in the manner in which Plaintiff's
      11
      12
         experts are relying on them.
      13
                   THE COURT: So it's nondisclosure and
      14
                      Is that what you're saying?
         relevance?
      15
                   MR. VINCENT:
                                 And hearsay, Your Honor.
09:58AM
      16
                   THE COURT: I don't see hearsay as one of the
         objections listed on this.
      17
      18
                   MR. HOFFMAN: Your Honor, there may be some
      19
         confusion in that I think Your Honor is looking at
      20
         bucket 4, but I believe counsel has addressed bucket 5.
09:58AM
      21
                   MR. VINCENT:
                                 I'm sorry. Yes, you're right,
      22
         Your Honor.
                       So I apologize. John, I jumped ahead.
      23
                   I can keep on this bucket or I can go back to
      24
         the bucket Your Honor actually asked me to address.
      25
                   THE COURT:
                               Why don't we take up 4 before we
09:59AM
```

1 take up 5. MR. VINCENT: Okay. I apologize, Your Honor. 2 3 I apologize. 4 Yes, so the ItsOn MSA. This is listed on -this document is a master service agreement between 5 09:59AM ItsOn and Sprint and, yet, Headwater is trying to 6 7 introduce that document in Verizon's case. 8 It is -- whether or not their experts cite it for whatever purpose, it is a hearsay document. document that's irrelevant to Verizon's interactions 10 09:59AM 11 with Headwater and ItsOn and is prejudicial because to 12 give Your Honor some background about the Sprint/ItsOn interaction -- again, this is for the Verizon case they 13 14 are trying to introduce this exhibit. 15 The ItsOn interactions with Sprint, Sprint 10:00AM obtained a ItsOn product called roaming reduction 16 because Sprint was a distant third at the time in 17 18 carriers, and they were paying Verizon whenever one of 19 their customers roamed onto Verizon's network. 20 wanted to reduce the amount of roaming that happened and 10:00AM 21 so they reduced the amount of money they pay Verizon. 22 Those figures, those amounts are irrelevant to 23 the Veri- -- to both cases but especially the Verizon 24 And the issue here with introducing it in Verizon case.

as an exhibit, introduce it to the jury, it has figures,

25

10:00AM

```
it has, you know, data regarding Sprint, a third party,
      1
      2
         and regarding a context, roaming, which again is
       3
         irrelevant to what -- to the issues here in this case.
       4
                   So whether or not it's relevant to Sprint,
         which, again, we don't agree that the exhibit is
      5
10:01AM
         necessary for any purpose, it's definitely irrelevant to
      6
       7
         any issues in Verizon such that it needs to be admitted
      8
         into the case.
      9
                   Again, whether or not an expert wants to -- has
10:01AM
      10
         relied on it, that does not mean it needs to be admitted
         into the case.
      11
      12
                   THE COURT: All right.
      13
                   MR. HOFFMAN: Your Honor, taking up the
      14
         relevance issue first, as counsel indicated, both
      15
         experts, both damages experts for both sides are relying
10:02AM
      16
         on this agreement as direct inputs into their
         calculation of damages.
      17
      18
                   Laura Stamm, Verizon's expert, uses the
      19
         share -- revenue share provisions within the agreement
      20
         as a direct input into calculating her reasonable
10:02AM
      21
         rovaltv.
                    Here is a paragraph where she does that.
         similarly, Mr. Bergman relies on it as well.
      22
                                                         So it's
      23
         clearly relevant, and Verizon essentially admitted that
      24
         it's relevant because its own experts, it's promulgated
      25
         in expert report that says it's relevant.
10:02AM
```

As to hearsay, again, ItsOn is Headwater's only 1 2 licensee and its primary channel for commercializing its 3 This is the agreement under which almost all of ItsOn's royalty payments to Headwaters were made. 4 5 So this isn't just some random agreement. 10:03AM is the core agreement that -- by which the Headwater's 6 7 patents are commercialized, including the 8 patents-in-suit and, therefore, Headwater maintains this agreement within its records because, again, it's the source of its royalty income from ItsOn. 10 10:03AM 11 THE COURT: All right. Thank you, Mr. Hoffman. 12 MR. HOFFMAN: Thank Your Honor. THE COURT: Mr. Vincent, if both experts use 13 14 this in their analysis, that is a pretty solid response to the relevance objection. Is there some portion of it 15 10:03AM that you would contend is unfairly prejudicial? 16 So, yes, Your Honor. 17 MR. VINCENT: That is the 18 issue in that the document as a whole refers to, again, 19 this roaming reduction scenario and has terms of an 20 agreement that, to my understanding, are not relied on 10:04AM 21 by any expert that, again, are relevant to both cases. I mean, we're talking here about Verizon, not 22 23 T-Mobile. They have this on Verizon's exhibit list. 24 And, again, what counsel just said is that this is about

commercialization of Headwater's patents. So to the

25

10:04AM

```
40
```

extent that we can come to an agreement about, at least 1 those portions should not be included. 2 3 THE COURT: I mean, licenses with third parties come in all the time for the purpose of calculating 4 5 reasonable royalty, and there are licenses that don't 10:04AM involve the Defendant in any way. 6 7 MR. VINCENT: That's right, Your Honor, and the 8 predicate to allowing those licenses in is to show a 9 sufficient nexus to the asserted claims in the case. 10 The problem with the evidence here is that they have not 10:05AM 11 made a connection, again, introducing this evidence in 12 the Verizon case. 13 THE COURT: It just has to be comparable 14 There's no nexus to the claims required for technology. a comparable license. 15 10:05AM 16 MR. VINCENT: I understand, Your Honor. Ιt doesn't require an analysis as would a practicing or 17 18 other types of inquiries, but there has to be a 19 connection, and the connection has to be such that, you 20 know, there is a relevance to the issue for which it's 10:05AM 21 presented. 22 And, again, from my understanding is that the experts use this for a limited purpose, not for 23 24 everything in the master services agreement. There are 25 issues; there are provisions in that agreement that no 10:05AM

```
41
```

1 party is viewing as relevant to the case.

10:06AM

10:06AM

10:06AM

10:07AM

10:07AM

THE COURT: I understand that, but it's not worth redacting things unless there is some prejudice that can be shown to flow from them. Can you point out anything in PX438 that you can show has an unfair prejudice?

MR. VINCENT: Yes, Your Honor. And that has to do with one of our -- T-Mobile's motions in limine and also relates to a Verizon motion in limine that we're going to argue that later today in that, again, Your Honor has ruled, and I think Headwater conceded, that for -- in the Verizon case, payments to Verizon -- sorry. Payments by Verizon to Headwater are irrelevant, and Headwater agreed to keep those out because there is not sufficient evidence to link those investments to these patents.

The same thing applies in this case. The payments that Sprint made to ItsOn for this roaming reduction product, either they didn't practice at all and that's -- we believe there's no evidence that they did practice at all, or they practiced all 88 patents that were on the marking page, and there's no tie to this, these asserted patents.

And so either way there's prejudice, Your

Honor. Either there's no evidence that they are tied to

```
these patents, in which case these payments will give
      1
         the false impression and prejudicial impression that
      2
       3
         Sprint was paying for these patents -- again, it's
         prejudicial in the T-Mobile case; it's doubly
       4
         prejudicial in the Verizon case -- or if they say they
      5
10:07AM
         do practice, then they practice all of those patents.
      6
      7
                   And, again, whether we practice -- whether
      8
         we're paying for one or 88 patents, again, for the same
      9
         reasons that the payments for Verizon's investments were
10:07AM
      10
         held irrelevant and agreed to be excluded, these
      11
         payments and the payment terms should also be excluded
      12
         in both cases.
                   THE COURT: The reason that the Verizon
      13
      14
         payments were excluded is that they definitely create a
         risk of unfair prejudice to Verizon and the jury reading
      15
10:08AM
      16
         more into them than they should. The payments to Sprint
         don't seem to me to carry that risk.
      17
      18
                   MR. VINCENT:
                                 I understand, Your Honor.
                                                             Ι
      19
         think -- and from our perspective, I think the
      20
         underlying reasoning is the same or similar because
10:08AM
      21
         either there is no connection or there's a connection to
      22
         dozens and dozens of patents.
                   In either case, the risk is the jury will draw
      23
      24
         the connection saying that we're paying all -- they are
      25
         going to say that Sprint paid millions of dollars for
10:08AM
```

10:09AM

10:09AM

10:09AM

10:10AM

10:10AM

```
43
```

```
these two patents and that's simply not the case --
1
2
   actually, one patent because there's only one patent
 3
   that is alleged to be practiced here and that's simply
   not the case under any conceivable set of facts.
 4
                         I understand that. I don't have
 5
            THE COURT:
   any evidence before me that the Plaintiff is saying
6
7
   that; and obviously if they misstate the facts, that
8
   will be your job to point out that that's not true.
                                                          But
   let me just inquire from them as to the intended use of
10
   this MSA.
11
            MR. HOFFMAN: Your Honor, the only intended use
12
   is as evidence of the reasonable royalty as disclosed by
13
   both experts.
                  So they will be bound by Rule 26 and
   bound to the reports to use it only in that fashion, and
14
   we have no intention of using it for any other purpose.
15
16
            THE COURT:
                         So you do not contend that the
17
   payments by Sprint under this MSA were tied particularly
18
   to the asserted patents?
19
            MR. HOFFMAN: Your Honor, I don't actually know
20
   the answer to that question. I'm sorry. I -- it
21
   involves an analysis that I'm just not aware of having
22
               I don't think we contend one way or another,
   been done.
   but I'm not sure.
23
24
            THE COURT: Well, you know whether you're going
25
   to contend that to the jury?
```

```
1
                   MR. HOFFMAN: Yes, Your Honor, and we -- we
         don't intend to, I believe -- we don't intend to
      2
       3
         represent to the jury that the specific -- this
         agreement specifically covers or relates to the
       4
         patents-in-suit.
      5
10:11AM
                   I mean, ItsOn is a licensee to all of
      6
      7
         Headwater's patents. It may well be that certainly some
      8
         portion of Headwater's patents are implicated within
         this agreement, but as to whether -- I don't believe
      10
         either expert specifically makes representation as to
10:11AM
      11
         whether the agreement practices that, the
      12
         patents-in-suit.
                   But we would argue that Defendant has conceded
      13
      14
         the relevance and the comparability, at least for the
         purpose of profit split, and its own expert finding it
      15
10:11AM
      16
         relevant in the direct input into her calculation of
      17
         damages and our expert doing same. It's a third-party
      18
         agreement with a competitor, Verizon.
      19
                   THE COURT:
                               It's one thing to contend that the
     20
         technology at issue in the MSA was comparable enough for
10:11AM
      21
         the damages experts to consider it in connection with
         reasonable royalty on the asserted patents; it's another
      22
      23
         thing to say that the asserted patents were what the MSA
      24
         was about.
      25
                   MR. HOFFMAN: Yes, Your Honor. I don't --
10:12AM
```

again, I don't believe either expert makes that 1 2 representation, and we have no intention of making any 3 argument outside of their reports. 4 THE COURT: All right. That is probably the most important is that what you are going to represent 5 10:12AM about this MSA will be what is already disclosed in your 6 7 expert's report. 8 MR. HOFFMAN: Yes, Your Honor. 9 THE COURT: All right. Well, I'm going to 10 overrule the objection to 438 with that understanding. 10:12AM 11 That takes us -- let me hear from Plaintiff first on 12 this next bucket they have produced because if there's 13 not an adequate response to that, we don't need to get 14 to anything else. 15 MR. DAVIS: Thank Your Honor. 10:13AM 16 So on the late-produced issue, this was 17 produced by Apple in response to a May 2024 subpoena. 18 What happened with this, the representative exhibit 19 that's PTX1115, this is a -- it's a one-page daily traffic data. It's analytics information provided by 20 10:13AM 21 Apple. 22 So what transpired is Apple provided a couple 23 of depositions to us in response to the subpoena. 24 depositions were timely taken, January 9th and 10th in 25 2025. And during the course of that examination, 10:13AM

10:14AM

10:14AM

10:14AM

10:15AM

10:15AM

Headwater's attorney asked the witnesses: 1 2 analytics information do you have that's relevant to our 3 claims here? Do you have analytics information for the accused feature or data usage generally for cellular 4 versus Wi-Fi? 5 6 And what the witness testified is that Apple 7 does have a data analytics team, that they have such 8 information. And so the next day after that deposition, we wrote to Apple and said: Please produce this to us. 10 This is responsive to our longstanding requests for this 11 sort of analytics information, and the witness just 12 confirmed that you have a repository or a system for providing this. 13 14 That same day, another deposition of a Apple witness was taken. That witness also confirmed that 15 Apple has this information. So Headwater corresponded 16 with Apple for a period of a few weeks, where Apple was 17 18 investigating this. They said: We have some 19 information that you're requesting but not all of it. 20 And ultimately what they produced, after having 21 said prior to the depositions that they didn't have this 22 information -- we had followed up with them but then it was revealed in the depositions that they did have the 23 24 information -- ultimately Apple said on February 27th: 25 We completed the investigation; here's the information

we found; we'll produce it to you.

2 Once they did, we supplemented accordingly, 3 right away; let the other side know.

And so that explains the timeliness issue, Your Honor. This is -- the information was responsive to our longstanding requests on a subpoena served long ago.

You know, we took the depositions in a timely fashion, and it was only then that we had the definitive proof that Apple had some of this analytics information we'd been requesting.

THE COURT: So what is the date that you produced this to the Defendants?

MR. DAVIS: We produced this -- and I'm sorry, Your Honor. I don't have the exact date, but it would have been right after we received it. We -- I know the email that we -- I was just looking at the email that was sent to us. It was February 27th saying: This is when you'll receive it; you'll receive it shortly.

I believe it was another week or so after that that we ultimately received the production and then right away we provided it to the other side.

And I should add, Your Honor, that we were able to provide this to the other side in advance of the expert depositions so that, you know, any questioning could take place on that.

THE COURT: So mid-March, when? 1 2 MR. DAVIS: Yes. That's right. Let me -- let 3 me see if we mention in our briefing exactly when we received this. This is our -- Docket 195 is our motion 4 for leave to supplement the expert reports. 5 It looks 10:17AM like -- so the dates I have here, Your Honor, are 6 7 that -- oh, yes. Okav. 8 Apple produced the document on March 12th, 2025, and then we provided the supplemental expert 9 10:17AM 10 report of Dr. Wesel on March 15th, and that addressed, 11 you know, very briefly the March 12 Apple production. 12 And so I think the timeline is relatively clear, Your Honor, that we acted quickly once we 13 14 received the documents, and unfortunately we weren't in a position where we could realistically even move to 15 10:18AM compel this information from Apple because we had asked 16 for it, and Apple said "We don't have it." And so it 17 18 was only through the deposition in January that we 19 understood, yes, Apple actually does have at least some 20 of the information we were requesting. 10:18AM 21 THE COURT: And so you say you filed a motion 22 for leave to supplement Wesel's report, or how did that 23 happen? 24 MR. DAVIS: Yes, that's right, Your Honor. 25 So we served the supplemental expert report of 10:18AM

```
1
         Dr. Wesel on March 15th. We also served a supplemental
         report of Dr. Bazelon -- that's another Headwater
       2
       3
         expert -- on March 19. Both of those were in advance of
       4
         those experts' depositions.
       5
                   THE COURT: And was leave granted?
10:18AM
                               Leave was -- the motion's still
      6
                   MR. DAVIS:
      7
         pending, Your Honor.
      8
                   THE COURT: All right. Thank you, Mr. Davis.
      9
                   MR. DAVIS:
                               Thank you.
                   MR. VINCENT: Your Honor, if we could be
      10
10:19AM
      11
         permitted.
                     Because these issues implicate the motion
      12
         for leave and Mr. Robb knows these issues much more than
         I do, I'd like for Mr. Robb to address the statements by
      13
      14
         counsel on this issue as it relates to this.
      15
                   THE COURT:
                               Certainly.
10:19AM
      16
                              Thank Your Honor.
                   MR. ROBB:
      17
                   The -- both the timing and the prejudice
      18
         associated with the production and reliance on that
      19
         document is fully addressed in our opposition brief to
      20
         the motion for leave.
10:19AM
      21
                   I don't want to repeat all the arguments there,
      22
         but to briefly recap, the problem is the Apple document
      23
         we believe, strong reason to believe, is not
      24
         representative of all Apple users, given the manner in
         which it was collected.
      25
10:20AM
```

10:20AM

10:20AM

10:20AM

10:21AM

10:21AM

25

1 The consequence if that data is used instead of 2 data that both parties, up until that moment, had agreed 3 was the correct data relating to how much users actually consume in data per month would have the consequence of 4 5 essentially damages. 6 Their experts and our experts all know that 7 that evidence is not correct. The Apple evidence is not 8 right. Every document cited, produced in the case, relied on by both experts shows that that evidence is 10 not correct and not representative of all users. 11 Their own experts effectively concede this 12 where they say "If I were to use this Apple data, then 13 this would have the following impact," where it 14 the data savings, but they don't increases by actually come out and say it because, again, it's 15 16 contradictory to every piece of evidence in the case. 17 The extreme prejudice to us because of delayed 18 production is because it was produced months after the 19 close of fact discovery. We did not have a chance to 20 take discovery against Apple on the manner in which the 21 data was collected and its lack of representativeness. So we have a strong reason to believe why it's 22 23 not representative, but we didn't have a chance to test 24 that during discovery. So given the fact that, if

credited, it would massively increase damages in a

```
manner that their own experts are not actually standing
      1
         behind and we didn't have the opportunity to test it
      2
       3
         during discovery, it's prejudicial to us.
       4
                   And then our brief, which I refer to Your
         Honor, walks through the full history of the disputes
      5
10:21AM
      6
         and communications between Apple and Headwater.
       7
                   THE COURT: And tell me.
                                              Is that pending on a
      8
         motion for leave to supplement the report, or is this a
      9
         Daubert motion directed to the report?
                              It's the former, Your Honor.
10:21AM
      10
                   MR. ROBB:
      11
         motion for leave to supplement Dr. Wesel's report and
      12
         Dr. Bazelon's report.
      13
                   THE COURT: All right. Thank you, Mr. Robb.
      14
                       ROBB:
                              Thank Your Honor.
                   MR. DAVIS:
                               Your Honor, if I may just briefly
      15
10:21AM
      16
         respond.
      17
                   THE COURT:
                               Mr. Davis, is there any reason why
      18
         this, the admissibility of this Apple production,
      19
         shouldn't be determined along with the pending motion?
10:22AM
      20
                   MR. DAVIS:
                               No, Your Honor. I agree that the
      21
         determination on that motion would settle this.
                                                            The
      22
         only thing I wanted to clarify, Your Honor, is that --
      23
                   THE COURT:
                               Did you disagree with the argument?
      24
                   MR. DAVIS:
                               Well, something to that effect,
```

Your Honor. I think I wanted to clarify a couple of

25

10:22AM

```
1
         brief things.
      2
                   Mr. Robb said that -- or suggested that
       3
         everyone knows the Apple data is correct. I don't know
         what he's referring to. We certainly have not conceded
       4
         or suggested that the Apple data is incorrect.
      5
10:22AM
                   What he's referring to when he says that our
      6
      7
         own experts don't stand behind it, what happened, Your
      8
         Honor, is our experts' opening reports had already gone
         in.
              That's why it's a motion for leave to supplement
      10
         the expert reports.
10:22AM
      11
                   And so when we received this additional Apple
      12
         data, what the experts said was, well, if you look at
      13
         the Apple data, it actually shows an even greater
      14
         benefit to the inventions. And so the result of that --
      15
                   THE COURT:
                               This is in your briefing, I assume?
10:23AM
      16
                               It is, Your Honor.
                   MR. DAVIS:
                                           Well, I'll take it up
      17
                   THE COURT:
                               All right.
      18
         in that fashion. Thank you, Mr. Davis.
      19
                   MR. DAVIS:
                               All right.
                                           Thank you.
      20
                   THE COURT:
                               And we will take the morning recess
10:23AM
      21
         and come back and move on to the next bucket.
                                                          Thank
      22
         you, and take 15 minutes.
      23
                   (Recess from 10:23 a.m. to 10:40 a.m.)
      24
                   THE COURT: And we're ready for the next
                   Mr. Robb?
     25
         bucket.
10:40AM
```

MR. ROBB: Thank Your Honor. We changed seats. 1 2 Mr. Sim, can you pull up PX797? 3 Your Honor, bucket 6 we're asking not be admitted due to hearsay. Exhibit 797 is representative 4 of the bucket. This is a document prepared by a third 5 10:41AM party called Strategy Analytics and, in particular, 6 7 individual at Strategy Analytics called Paul Brown. 8 That document was then provided to Samsung. then in this case cross-produced it to the parties in 10 10:41AM this case. 11 Strategy Analytics and Samsung were working 12 together to do battery testing that was based on user profiles as far as how they -- minutes of the day that 13 14 they might be on chat, that they might be on the Internet, something like that. 15 10:41AM 16 On the left-hand column, there's the Wi-Fi connected in the morning -- then Mr. Sim scrolls down --17 18 Wi-Fi not connected -- scroll down farther -- Wi-Fi not 19 connected. 20 Dr. Wesel is relying on this document to 10:42AM 21 establish the hours per day that users are connected to 22 Wi-Fi or not connected to Wi-Fi. The number of hours per day a user is connected or not connected to Wi-Fi is 23 24 a hotly contested issue between the parties. Dr. Wesel 25 has his opinions, and Defendants have put in opinions by 10:42AM

Ms. Sarah Butler. There are Daubert motions pending 1 related to both of those individuals. 2 3 The question here, though, is whether this document is admissible. We would respectfully submit 4 5 the answer to that is no. This is a hearsay document that's being offered for the truth of the matter 6 7 asserted in the sense that, quite literally, Dr. Wesel's 8 looking at the left-hand column and seeing that Strategy Analytics, when constructing the test, chose to 10 set the structure of the test as being here are the 11 hours of the day I'm going to have Wi-Fi off; here are 12 the hours of the day I'm going to have Wi-Fi on. 13 Because the document says this is what we're testing, he is inferring from that that is actually 14 how users use their devices. So he's using it for the 15 truth of the matter asserted. Setting aside the 16 17 methodological flaws with that, on the question of 18 admissibility, it's a third-party document. 19 actually double-third-party document. It is hearsay, 20 it's being offered for the truth of the matter asserted,

10:43AM 20 it's being offered for the truth of the ma 21 and it should be excluded for that reason.

10:42AM

10:42AM

10:43AM

22

23

24

25

10:43AM

There is a separate and independent reason why this document should be excluded. Strategy Analytics also goes by UX Connect, and the individual who actually did this testing, Paul Brown, were never disclosed on

1 the initial disclosures by Headwater. About a week or two before the close of fact 2 3 discovery, they presented us with the deposition that he took in the Samsung case and said: Will you agree that 4 this deposition can be applied in this case? 5 10:43AM 6 We said no. We were given no notice of that 7 deposition. We had no opportunity to participate. 8 never been disclosed in this case. It's not appropriate and too late. And so for those two independent reasons, we 10 10:43AM 11 think this document should not be an exhibit. 12 THE COURT: And, Mr. Robb, apparently Google and Samsung had some relationship with Strategy 13 14 Did either of the Defendants in this case Analytics. have such a relationship? 15 10:44AM 16 MR. ROBB: Certainly none that I'm aware of, Your Honor, and there's no evidence in the record that 17 18 we've had any relationship with Strategy Analytics. 19 THE COURT: All right. Thank you, Mr. Robb. 10:44AM 20 MR. ROBB: Thank Your Honor. 21 MR. DAVIS: Your Honor, the document you saw 22 from Mr. Robb, PTX797 in the Verizon case, I think as you explained, that's a Strategy Analytics average user 23 24 profile. That comes from a third party that Samsung and 25 other companies like Google -- I believe Motorola has as 10:44AM

```
well -- hires to perform battery testing.
      1
      2
                   These profiles that Strategy Analytics creates
       3
         are reliable.
                         They are the OEM partners of the
         Defendants who use them and use them to verify their
       4
         marketing claims about battery life.
      5
10:45AM
      6
                   These average user profiles are developed using
      7
         analytics taken from thousands of users' smartphones.
      8
         They are clearly business records of Samsung.
                                                          They are
         plainly relevant to Dr. Wesel's opinions.
      10
                   You know, it also just bears noting that
10:45AM
      11
         Samsung endorses, even claims to have participated in
      12
         the creation of the average user profile. They say, for
      13
         example, in documents, together with Strategy Analytics,
      14
         Samsung has developed day-in-the-life usage models, and
         they do so and they use Strategy Analytics in large part
      15
10:45AM
         because they have what's called the AppOptix telemetry
      16
         intelligence platform.
      17
      18
                   What that means, Your Honor, is that
      19
         Strategy Analytics uses real-world data from devices to
      20
         develop its profiles. And so, Your Honor, from our
10:46AM
      21
         perspective, it's plainly admissible. You know, the
      22
         Defendants can disagree with the conclusions being drawn
      23
         from it by Dr. Wesel and can challenge him on that.
      24
         certainly --
      25
                   THE COURT: Why isn't it hearsay?
10:46AM
```

MR. DAVIS: Why isn't it hearsay, Your Honor? 1 THE COURT: 2 Yes. 3 MR. DAVIS: Well, it's a business record of 4 Samsung, and the --5 THE COURT: That would perhaps make it an 10:46AM exception, but it is hearsay, it seems to me, unless you 6 7 have some way you can point out that it's not being 8 offered for the truth of the matter. 9 MR. DAVIS: Well, I think, Your Honor, that 10 it's being -- the way in which Dr. Wesel uses it is 10:46AM 11 simply for two purposes: To look at what is, as a sort 12 of benchmark of what is applications that are downloaded 13 to a user's smartphone and approximately how long in a 14 given day are users connected to cellular data as opposed to Wi-Fi. 15 10:47AM 16 Dr. Wesel didn't want to make that up on his That certainly would have been challenged by 17 own. 18 Defendants and so we looked to a source. We certainly 19 asked Defendants for any information they have about 20 The best we have, Your Honor, is what their OEM 10:47AM 21 partner uses, Samsung, and other OEMs, to make these 22 relatively simple points. THE COURT: Well, you've indicated that you 23 24 want to rely on the business record exception. What do 25 you have that establishes that this meets the 10:48AM

```
1
         requirements of Rule 803(6)?
      2
                   MR. DAVIS:
                               So, Your Honor, we have -- there is
       3
         evidence that the Strategy Analytics average user
         profile is used by Samsung, that it changes over time,
       4
         that it is -- there's a 2015 version, a 2017, a 2019, a
      5
10:48AM
         2022 version, that Samsung has used this for a decade of
      6
      7
         time to validate its battery testing.
      8
                   Samsung's website even refers to the Strategy
         Analytics, or now it's called UX Connect, as their
         source of validating their battery claims.
      10
10:48AM
      11
                   THE COURT: That might make it some adopted
      12
         admission as to Samsung. How does that establish that
         it meets the requirements of 803(6)?
      13
      14
                   MR. DAVIS: So, Your Honor, I take the point
         that, you know, Samsung is not the Defendant here.
      15
10:49AM
         note this was a admitted exhibit in the Samsung case,
      16
         but I take the point that, you know, Verizon did not
      17
      18
         hire Strategy Analytics; T-Mobile did not hire Strategy
      19
         Analytics.
10:49AM
      20
                   But the fact remains that, you know, these are
      21
         the OEM partners and, you know, it's also possible, Your
      22
         Honor, that this can be considered, you know, a type of
      23
         market report as well. But it's compiled data that's
      24
         relied on by those in the industry, including
      25
         Defendants' OEM partners, for providing reliable
10:49AM
```

```
1
         information about what users' typical behavior is.
                               How is it published to the
      2
                   THE COURT:
       3
         industry?
       4
                   MR. DAVIS: Well, it's certainly published to
         those who hire Strategy Analytics, so Strategy Analytics
      5
10:50AM
      6
                     I don't believe the average user profile is,
         partners.
      7
         you know, publicly available on a website, for example,
      8
         but the folks who hire Strategy Analytics use this
      9
         average user profile and so it's available to the
         relevant industry participants.
      10
10:50AM
      11
                   THE COURT: For hire?
      12
                   MR. DAVIS: For hire, yes.
                               I don't think that would make it a
                   THE COURT:
      13
      14
         market report. I'm not hearing anything that would be
         sufficient to qualify it as an exception to the hearsay
      15
10:50AM
      16
         rule.
                And certainly your expert can rely upon it and
         can even talk about it, but that doesn't mean that it
      17
      18
         can be admitted as an exhibit.
      19
                   MR. DAVIS: I understand, Your Honor.
         wanted to add that, Your Honor, I think there is not
     20
10:51AM
      21
         specifically a requirement under the market report
      22
         exception that it be free for use or not behind a pay
      23
         wall or something like that.
      24
                   You know, a lot of market reports, persons or
      25
         companies do need to pay for those reports because
10:51AM
```

```
60
```

```
1
         someone made a significant amount of effort and
      2
         investment in compiling the data.
       3
                   THE COURT:
                               But they're published. They may be
         published and require a subscription, but they're
       4
         published.
      5
10:51AM
                   MR. DAVIS: Yes, Your Honor. Yeah, I'm not
      6
      7
         sure -- you know, here it's published in the sense that
      8
         if you work with Strategy Analytics, you get the average
      9
         user profile.
                   THE COURT:
                               That's true of your expert's report
10:51AM
      10
      11
         as well.
      12
                   MR. DAVIS:
                               Yes.
                   THE COURT:
                               It's also not an exception to the
      13
      14
         hearsay rule.
      15
                   MR. DAVIS:
                               I understand, Your Honor.
10:52AM
         hopefully our expert report is not just a compilation of
      16
         data like the Strategy Analytics average user profile,
      17
      18
         but I take your point.
      19
                   THE COURT: Well, I'm going to sustain the
      20
         objection to 797.
10:52AM
      21
                   Are there other documents, other exhibits in
      22
         this bucket that you believe require a different
      23
         analysis?
      24
                   MR. DAVIS: Just a moment, Your Honor.
      25
                   So not necessarily, Your Honor. The other
10:53AM
```

10:53AM

10:53AM

10:54AM

10:54AM

10:55AM

61

exhibits in this bucket are produced by Google and 1 Samsung. You know, certainly we believe the foundation 2 3 has been laid. 4 If the issue is hearsay, I don't believe there's a different hearsay exception argument that 5 would be made with respect to those. 6 They are 7 analytical information that is provided by Samsung and 8 by Google based on their -- they certainly are maintained as business records. For example, there are Samsung presentations, 10 11 Your Honor. That would be Exhibit Number 1188. That is 12 a Samsung internal presentation that discusses an analysis that Samsung had performed of what factors are 13 14 relevant to customers, including battery life. THE COURT: And do you have a custodian from 15 16 Samsung who establishes the requirements of 803(6)? 17 Certainly we rely on testimony in MR. DAVIS: 18 our expert report. I don't believe there's a plan to 19 produce a deposition designation from the Samsung case 20 for that specifically. 21 I guess the only other thing I would add, Your 22 Honor, is if -- that we would be granted that if we are able to provide a business records declaration from 23 24 Samsung confirming that these are, in fact, you know, 25 business records of Samsung's, then, you know, that we

```
1
         be able to revisit this.
                               Well, I'm not going to rule on that
      2
                   THE COURT:
         hypothetical, but certainly feel free to attempt that.
       3
       4
                   MR. DAVIS:
                               All right. Thank you, Your Honor.
                   THE COURT: I will sustain the hearsay
       5
10:55AM
         objection to Group 6.
      6
      7
                   MR. ROBB: Your Honor, bucket 7 is essentially
      8
         identical, if Mr. Sim could please pull up 1070.
      9
                   Your Honor, 1070 is an Ericsson Mobility Report
      10
         from 2013.
                      It is hearsay and that is the basis of our
10:56AM
      11
         objection.
      12
                   If you scroll down to page 3, Mr. Sim.
                                                             Next
      13
         page.
      14
                   And here we see the document, which is an
         Ericsson document available on the Internet, reports on
      15
10:56AM
         various statistics about data usage, number of users in
      16
      17
         the world, those sorts of things. Those numbers are
      18
         used by Mr. Bergman in his background as he discusses
      19
         the wireless industry.
      20
                   This document was not put in front of any fact
10:56AM
      21
         witness in the case. No Ericsson witness, as far as I'm
      22
         aware, no Ericsson witness was deposed. There is no
         basis to establish this as a business records exception,
      23
      24
         and Mr. Bergman relies on it.
      25
                   The fact that it is reporting, for example, the
10:57AM
```

```
number of mobile subscriptions as we see on this page,
      1
      2
         the fact that it reports that, he's using it to
       3
         establish the fact that it reports that, and it is
         inadmissible for that reason.
       4
       5
                   THE COURT:
                               All right.
10:57AM
                   MR. ROBB:
      6
                              Thank you.
       7
                   THE COURT:
                               Thank you, Mr. Robb.
      8
                   MR. HOFFMAN:
                                 One moment, Your Honor, please.
       9
                   Your Honor, the Ericsson Mobility Reports are
      10
         used by both Dr. Bazelon and Mr. Bergman for the
10:57AM
      11
         industry information within them. These, in fact, do
      12
         fall under the market reports exception like, in the
         case like shown here, United States v. Olson, the Gun
      13
         Trader's Guide, for example, that was used in testimony
      14
                  These are quite similar, and there's actually
      15
10:58AM
         quite a bit of evidence in the record that these are
      16
      17
         market reports that are used and relied on in the
      18
         industry.
      19
                   THE COURT: How is this disseminated to the
      20
         industry?
10:58AM
      21
                   MR. HOFFMAN:
                                 Ericsson has a website, and much
         of this information is available for free on the
      22
                    Some of it's available for pay, but it is
      23
         website.
      24
         published on their website and then all the materials
      25
         here are published data.
10:58AM
```

THE COURT: Does your expert refer to this as 1 some kind of market report or other similar publication? 2 3 I don't know if he uses the word MR. HOFFMAN: "market report" but, yes, Your Honor, he characterizes 4 5 it fairly as market report. And I'll point out that 10:59AM there's another case that, Aerospace Lines, of a similar 6 7 finding. 8 But in terms of the record here, so Steven Rice, who is Verizon's VP of network planning, was asked 10 about the Ericsson Mobility Report. He testified that, 10:59AM 11 in fact, people in his department do refer to that 12 report. 13 They do so because Ericsson -- specifically for 14 these Defendants, Ericsson is a major provider of equipment to Verizon and that -- and more than that, 15 10:59AM Your Honor, Verizon itself, on its website, has a number 16 of documents where it cites to the Ericsson Mobility 17 18 Report for exactly the kind of data that the experts 19 rely on. So here's one example. I have these articles 20 10:59AM 21 if you would like, Your Honor, and here's one example 22 where they are citing to statements in the report, 23 another example where they are providing specific 24 figures about exabytes per month in terms of global 25 mobile traffic. 11:00AM

```
1
                   Here's another example where Verizon's citing
         to Ericsson Mobility Report regarding the number of
      2
       3
         connections in the industry. And so, Your Honor, we
         would argue that this does fall under the 803(17)
       4
         exception and is admissible for that reason.
      5
11:00AM
      6
                   THE COURT:
                               Show me the part of Exhibit 1070
      7
         that you are seeking to rely on.
      8
                   MR. HOFFMAN: That may take me a moment, Your
      9
         Honor.
                 I don't have that in front of me in terms of
      10
11:01AM
         the number.
      11
                   THE COURT: Do you have anything that shows the
      12
         exhibit?
      13
                   MR. HOFFMAN: I'm sorry, Your Honor?
      14
                   THE COURT: Do you have anything that shows the
                   I'm just trying to get a feel for what the
      15
         exhibit?
11:01AM
      16
         format of this exhibit is.
                   MR. HOFFMAN: Your Honor, may I approach with
      17
      18
         the document?
      19
                   THE COURT: Yes.
     20
                   MR. HOFFMAN: This is actually a compilation
11:01AM
      21
         document. It has three Ericsson reports under
      22
         Exhibit 1070. This is the first one, but they are all
      23
         essentially of the same nature.
                   There's also another set of exhibits that
      24
     25
         are -- Ericsson on its website has what's called the
11:01AM
```

```
Ericsson Mobility Visualizer, and it is essentially a
      1
         tool by which users can run queries against all the data
      2
      3
         in the Ericsson Mobility Reports.
                  On screen now is a representation of what that
      4
              So it's essentially the same data but in a format
      5
         is.
11:01AM
         where it can be queried. But it's a publicly available
      6
      7
         database of the data from the mobility report.
      8
                  THE COURT: And your expert is using this for
         some of the usage numbers that are in it?
                  MR. HOFFMAN: Yes, Your Honor. Both
      10
11:02AM
      11
         Dr. Bazelon -- particularly, Dr. Bazelon relies on the
      12
         Ericsson Mobility Reports for information about network
         traffic and connections.
      13
      14
                  THE COURT: All right. Thank you, Mr. Hoffman.
                                 Thank Your Honor.
      15
                  MR. HOFFMAN:
11:02AM
      16
                               Mr. Robb, this looks and sounds
                  THE COURT:
         like it qualifies as a market report under, I think it's
      17
      18
         17 -- 803(17). Is there something in it that you're
      19
         concerned is not in the nature of a market report?
         Certainly the whole document does not need to come in if
     20
11:03AM
      21
         there's something in it that you're worried would be
         misunderstood.
      22
                  MR. ROBB: Yes, Your Honor. I can show -- if I
      23
      24
         could please have this screen shown. For some reason
```

the screen isn't showing properly. With your patience,

25

11:03AM

Your Honor, then I will read in the passage that I meant 1 to refer to. 2 3 Usage of the spectrum has increased greatly as a result of advancements in wireless technology. 4 Ericsson Mobility Report from November 2013 stated that 5 11:03AM the number of mobile subscriptions worldwide had grown 7 6 7 percent from the prior year, while the number of mobile 8 broadband subscriptions grew even faster, at a rate of 40 percent, exceeding 2 billion. There's then a citation to the Ericsson 10 11:04AM 11 Mobility Report. 12 Further, the amount of data usage per subscription also continued to grow steadily, and around 13 14 55 percent of all mobile phones sold in Q3 2013 were smartphones, compared to 40 percent in 2012. 15 11:04AM There is, again, then a citation to the 16 17 Ericsson Mobility Report. 18 So the -- our point, Your Honor, is that this 19 is -- these are documents produced by Ericsson 11:04AM 20 that their expert is not -- he's not treating it or he's 21 not analyzing whether it's a report that's broadly 22 distributed and simply compiling data. And, in fact, there's no evidence that I'm 23 24 aware of that indicates how it's a compilation of data, 25 what analyses they did to perform it, anything that 11:04AM

```
would establish it as a market report. Certainly it
      1
      2
         doesn't meet any of the other quotations lists
       3
         directly -- sorry, quotations lists or directories.
       4
                   And without -- they took no deposition of an
         Ericsson witness. Their own experts didn't lay the
      5
11:05AM
         foundation of how it meets -- how it's compiled,
      6
      7
         et cetera. We just don't think there's an evidentiary
      8
         basis for that, Your Honor.
      9
                   THE COURT: All right. I think that's part of
      10
         the reason that market reports are accepted, because
11:05AM
      11
         they are generally accepted in the industry, and
      12
         certainly I think this looks like one of those.
                                                            The
         fact that your own client cites to it certainly leans in
      13
      14
         the same direction.
                   I'll overrule the hearsay objection as to this
      15
11:05AM
         document, which is Exhibit 1070.
      16
      17
                   Is there anything else in this bucket,
      18
         Mr. Robb, that you would contend should be analyzed
      19
         differently?
      20
                   MR. ROBB:
                              No, Your Honor. They rise and fall.
11:06AM
      21
                   THE COURT:
                               All right. Thank you.
                                                        Then I'll
      22
         overrule the objection to this bucket.
      23
                   MR. ROBB:
                              Turning to the next bucket, Your
      24
         Honor, bucket 8 are FCC documents.
      25
                   Mr. Sim, if you could please pull up 1101.
11:06AM
```

Your Honor, this is a print-off from the FCC website reporting on the results of an FCC auction. Ιf Mr. Sim scrolls -- zooms in. There's a gross bids --There's a gross bids and a net bids line thank you. item of 44 and 41 billion dollars. This ties to the large numbers MIL that was the subject of argument last week. The dispute between the parties has nothing to do with the gross bids, the net bids, or even the average price paid at this auction. So no one disputes -- and I think I now can say that without dispute because their expert and our expert used literally the same number -- that the result of the AWS-3 auction was \$2.53 per unit. Think of it as a price per square unit for this auction. The way that number is calculated, of course, has to do with taking the total fees generated from the auction divided by the number of units sold at the auction, but there is no dispute about either of those two numbers. Instead, the dispute between the experts is about which FCC auctions should inform the average price

Instead, the dispute between the experts is about which FCC auctions should inform the average price of the company Spectrum Holdings. So Dr. Bazelon relies on this number and the \$2.53, and Dr. -- which is Headwater's expert. Verizon's expert, Dr. Hazlett, relies on this plus other auctions and averages those

1 numbers.

11:10AM

Reliance on -- sorry. This document being used to show the overall number is inherently prejudicial because of the large numbers effect that we had raised with Your Honor last week.

70

It is also not necessary to show this because, again, there is no dispute between the parties that the consequence, that the result of the auction 97 is a \$2.53 number. Neither expert is going to dispute that. It's just simply a matter of do you take the average of all the auctions or do you focus on this auction.

And so for that reason, this document should not come in because it is unduly prejudicial and it doesn't go to any disputed issue in the case.

THE COURT: All right.

MR. HOFFMAN: So, Your Honor, I think we talked a fair amount about this at last week's hearing. Your Honor may remember that Dr. Bazelon has a chart in which he shows his calculations of what the price of the --sorry, what the cost of spectrum is on a megahertz per population basis; and you may recall in that chart, he cites directly to the documents that we're talking about as a direct input into how he calculates that.

You know, the Federal Circuit has ruled that experts have to tie their opinions to real facts and to

25

71 PageID #: 24682 real evidence, and what Verizon proposes is that Mr. --1 or Dr. Bazelon be deprived of the underlying evidence in 2 his opinion, which both hurts, is prejudicial to us as a 3 party but also undermines his ability to explain to the 4 jury where these numbers come from and how they are 5 calculated. 6 7 And again, Your Honor, we talked about last 8 week the Court's prior ruling of Finesse, which was right on this issue in terms of Dr. Bazelon relying on 10 price paid for in auction and that those be admissible, as they were the underlying basis of his calculation. 11 12 I would also point out that there's some other 13 documents in this category. For example, a couple of 14 them are what counsel showed, which is essentially what he showed in another one for another auction exactly 15 16 like that. 17 There's a third document in this category, 18

There's a third document in this category, which is a larger report from the FCC. It's a government document on a government website as part of the normal actions of the FCC, and it provides industry data and data specific to both -- well, anyway, it provides industry data that is cited and relied on by Dr. Bazelon.

So this is a page from that market report, PX1092, another one and so we think that's -- if the

```
concern here is just the big number as it relates to the
      1
         auction, we believe that these are a different,
      2
       3
         different category, Your Honor.
       4
                   THE COURT: All right. Thank you, Mr. Hoffman.
                   I'm going to overrule the objection, which is
       5
11:12AM
         largely based on Rule 403. This is not the sort of
      6
      7
         number that I think Uniloc and LaserDynamics are worried
      8
         about.
                   The unnecessarily large revenue or profit
      10
         numbers have the consequence of making the jury thinking
11:12AM
         that the Defendant can afford whatever this small amount
      11
      12
         is that the Plaintiffs are seeking. This is not a
      13
         number that relates to the Defendants' revenues.
      14
                   I think it's reasonable for the Plaintiff's
         expert to rely upon it, so I'll overrule the objection
      15
11:13AM
         to Exhibits 1092, 1101, 1103 in the Verizon and 1090,
      16
         1099, 1101 in T-Mobile.
      17
      18
                   Mr. Robb, what's next?
      19
                   MR. ROBB:
                              Thank Your Honor.
     20
                   Moving to bucket 9, 278 is identified as
11:13AM
      21
         representative.
      22
                   Mr. Smith, if you could please pull up 278.
      23
                   Your Honor, 278 is an excerpt, or a portion of
      24
         the errata with exhibits attached to Mr. Bergman's
      25
                   It is hearsay, and it is not properly
         report.
11:13AM
```

```
admissible as an exhibit.
      1
                   THE COURT: All right. Sounds like hearsay.
       2
       3
                   What's the response, Mr. Hoffman?
                   MR. HOFFMAN: Your Honor, may I approach and
       4
         give you an excerpt from 278?
      5
11:14AM
      6
                   THE COURT: You may. And I'll hand you back
      7
         1070 while you're at it.
      8
                   MR. HOFFMAN: Thank you, Your Honor.
      9
                   THE COURT: Mr. Hoffman, these may be good
         demonstratives for when your expert is testifying, but
      10
11:14AM
      11
         how can they not be hearsay?
      12
                   MR. HOFFMAN: Your Honor, our contention is
         that these are 1006 summaries. The spreadsheets that
      13
      14
         these are based on are run to tens of thousands, in some
         cases hundreds of thousands of lines.
      15
11:15AM
      16
                   Those spreadsheets themselves are in evidence,
         or will be in evidence. Those are agreed without
      17
      18
         objection.
                     They are on T-Mobile and Verizon's list, the
      19
         underlying documents, but they are just too voluminous
         to be of any value or any way for the jury to understand
11:15AM
     20
      21
              And that's what Schedule 3.3 and 3.4 are.
                                                           These
      22
         are 1006 summaries.
                   And I'll point out, Your Honor, these are
      23
         exactly the kind of summaries that Your Honor overruled
      24
      25
         objections to in both the Samsung 422 and Samsung 103
11:15AM
```

```
1
         case for exactly this reason.
                   THE COURT: All right. They may be --
      2
       3
         Schedules 3.3 and 3.4 do not appear to reflect that
       4
         there's some judgment of the expert that goes into
      5
         categorizing the numbers. The Schedule 4.1 is a part of
11:16AM
         me to determine that regard, but let me put Mr. Robb to
      6
      7
         that task.
      8
                   MR. HOFFMAN: If I could just add quickly, Your
      9
                  Instead of 4.1, we propose to the other side
         that we redact essentially everything except the last
      10
11:16AM
                      Mr. Bergman relies, calculates profit margin
      11
         two lines.
      12
         from this data, which is from a number of 10-Ks and so
         voluminous, and we're fine with redacting essentially
      13
      14
         everything except the outcome of his calculations as the
         profit margin.
      15
11:16AM
      16
                   THE COURT: And tell me which lines that would
         leave?
      17
      18
                   MR. HOFFMAN: So that would leave total
      19
         operating profit margin and then operating margin
      20
         excluding certain costs, those last two lines at the
11:17AM
      21
         bottom of Schedule 4.1.
      22
                   THE COURT: All right. I'll hear the response
      23
         to that.
                              Your Honor, I think it's clear from
      24
                   MR. ROBB:
      25
         our own expert's report that we don't dispute the total
11:17AM
```

1 operating profit margin where the operating margin 2 excluding certain costs that Mr. Bergman calculates. 3 We, of course, dispute the way in which he uses it, which is the subject of a dispute between the parties. 4 As far as this document, a redacted version of 5 11:17AM this document being an exhibit, it's a chart that their 6 7 expert created. It's a visual aid. 8 THE COURT: Well, if it is, in fact, a 1006 9 summary of your records, the 3.3, Schedule 3.3 and 3.4 10 look to be that. Do you contend that they are anything 11:18AM 11 other than an aggregation of what's in the underlying 12 documents that your clients produced? MR. ROBB: No, Your Honor. The primary dispute 13 14 is with respect to 4.1. THE COURT: All right. Well, I'll overrule the 15 11:18AM 16 objection to 3.3 and 3.4. 17 Turning to 4.1, if it is redacted down to those 18 last two lines, if I heard you right, you just said you 19 are in agreement that that information is correct? MR. ROBB: Yes, Your Honor. The issue that 20 11:18AM 21 we're struggling with is that it does not meet the 1006 22 exception because these are pulled straight from the 10-Ks and that's just a straight mathematical operation. 23 There's no more -- I don't believe at least 24 25 that there's any more numbers that he used to generate 11:19AM

11:19AM

11:19AM

11:19AM

11:20AM

11:20AM

```
76
```

these other than the numbers that appear. So it's not a summary of a voluminous record.

Not to step on the toes of my colleague who is going to argue next, there's a separate issue with showing the 10-K overall operating figures and those things that actually are steps that result in the operating margin. So we don't think those should be shown.

This is an issue where the parties don't dispute the substance; it's just that this itself doesn't meet the qualifications of an exhibit, and the top line numbers are violative of the Court's notes.

I would -- in light of Your Honor's ruling on the first two pages, if I can suggest, perhaps at the lunch break, we and counsel can discuss whether to either enter some sort of stipulation as to just these numbers such that the 10-Ks and the rest of the chart are not necessary, redacted version as counsel had proposed or something along those lines.

THE COURT: I can tell you that I'm not likely to admit 10-Ks, maybe pages here and there from 10-Ks, but they definitely are what I would call voluminous records.

MR. ROBB: Yes, Your Honor. Again, I apologize for stepping on the toes of my colleague's argument,

11:20AM

11:20AM

11:21AM

11:21AM

11:21AM

24

25

```
77
```

which is coming next. Headwater has already -- we made 1 that point to Headwater; they agreed to limit them. 2 3 now it's in the realm of twenty or thirty pages per 10-K. 4 5 We still have a MIL problem with them in the sense that the pages that are included still include the 6 7 top line revenue numbers, et cetera, that is the subject 8 of the court's standing MIL. The issue we're trying to navigate is, again, we don't dispute the actual profit The big numbers can't be shown because of the 10 11 standing MIL. This itself doesn't meet the definition 12 of the compilation, so that's the issue that I would request to have an opportunity to negotiate with 13 14 counsel. THE COURT: Well, I am willing to admit the 15 16 bottom two lines, and I guess that would also include 17 the very top line that has the fiscal year. Otherwise, 18 the bottom two lines don't have? 19 MR. HOFFMAN: Yes, Your Honor. Okay. Well, then I'll admit 3.3 20 THE COURT: 21 and 3.4 as they are, and I will admit 4.1 with 22 everything redacted between the top line and the bottom I'm satisfied that those qualify under 1006. 23 two lines.

MR. ROBB: Yes, Your Honor.

And I think Your Honor already said that it's

```
an issue that's near and dear to our heart, so if I
       1
         could ask for clarification. When you say the top line,
       2
       3
         you mean the fiscal year line, not the services revenue
       4
         number line?
       5
                   THE COURT: That is what I mean.
11:22AM
      6
                   MR. ROBB:
                              Thank you, Your Honor.
       7
                   MR. HOFFMAN: Your Honor, if I may, there's a
      8
         couple of other exhibits in this category that are
      9
         significantly different from the one we just addressed.
      10
                   THE COURT: All right. Go ahead and address
11:22AM
      11
         those.
      12
                   For the record, what is the exhibit number that
         we were just talking about? I don't see it on the
      13
      14
         document.
                   MR. ROBB: 278, Your Honor.
      15
11:22AM
      16
                   MR. HOFFMAN: And also, I believe the same
      17
         ruling reasonably applies to T-Mobile's PX89, which has
      18
         the same, essentially the same schedules.
      19
                   THE COURT: All right. And what is the exhibit
     20
         you are now wanting to address, Mr. Hoffman?
11:22AM
      21
                   MR. HOFFMAN: Your Honor, the exhibit we want
      22
         to address is PX1113 in the Verizon case and 1111 in the
      23
         T-Mobile case, and these are some relatively voluminous
      24
         spreadsheet.
                   And, Your Honor, if I may approach.
      25
11:23AM
```

1 So this is the declaration from the records 2 custodian for Ceramic Software, which is also 3 commercially known as Airwave data -- I'm sorry, Airwave Research. 4 Mr. Bazelon relies on the population data from Airwave in his calculations. 5 11:24AM 6 As you can see in the custodian's declaration, 7 what this is it's information that's compiled by the 8 FCC that Airwave essentially pulls out of the FCC database and compiles it in the fashion you see here. 10 So the underlying data is government data, and 11:24AM 11 essentially the only way to, I guess, put that database 12 in front of the jury is through Airwave's analysis, which, I don't know that I would say that everybody in 13 14 the industry uses it, but certainly Dr. Bazelon typically uses it and testifies as to its reliability in 15 11:24AM 16 terms of the population data. And, again, it's essentially FCC data reorganized. 17 18 THE COURT: Well, I assume you are offering 19 Mr. Weinberger's declaration in support of the business records exception? 20 11:25AM 21 Yes, Your Honor. MR. HOFFMAN: 22 THE COURT: All right. And I would argue that also the 23 MR. HOFFMAN: 24 exception applying, so it's government records, at least 25 arguably applies to this because, again, it's the 11:25AM

1 presentation of FCC data. And then, Your Honor, there is one more, which 2 3 I don't have here for some reason. So there's one other 4 exhibit, which is exhibit in the Verizon case, PX277. That's essentially a chart from Mr. Bazelon's report 5 11:25AM that summarizes or collates the data, which again is 6 7 voluminous, from Airwave into a single -- into a single 8 schedule. 9 THE COURT: All right. Thank Your Honor. 10 MR. HOFFMAN: 11:26AM 11 MR. ROBB: In light of Your Honor's ruling with 12 respect to compilations, we will acknowledge that the same ruling applies to 277, which is a chart prepared by 13 Dr. Bazelon relying on the Airwave materials. 14 With respect to the Airwave materials 15 11:26AM 16 themselves, though, there are a few issues. So first is disclosure. Airwave Research was never disclosed in the 17 18 initial disclosures. We have never heard of 19 Mr. Weinberger before. This declaration was, on its face, executed on 20 11:26AM 21 May 2, 2025. We did not receive a copy of it until 22 May 29, 2025. It was, I believe, the day before the pretrial conference from last week. 23 We've had no 24 opportunity to seek discovery on any of these issues, so

it's untimely in that regard, and the conclusory

25

11:27AM

```
1
         language in paragraph 3 we don't think is sufficient in
         light of the lack of discovery on that.
      2
      3
                               The business records declarations I
                   THE COURT:
         don't think have to be disclosed during the discovery
      4
         period as long as the records that the declaration is
      5
11:27AM
         addressing were timely disclosed. Were these underlying
      6
      7
         records which are Exhibits 1111 and 1113, were those
      8
         timely disclosed?
      9
                   MR. ROBB: First time they were disclosed, Your
         Honor, was in Dr. Bazelon's report. So they were never
11:27AM
      10
      11
         produced during fact discovery, and the company was
      12
         never disclosed during fact discovery, and Headwater
         never disclosed that they were going to rely on this
      13
      14
         theory of damages during fact discovery.
      15
                   THE COURT:
                               All right. And then so when --
11:28AM
      16
         Dr. Bazelon's opening report, when was that served?
      17
                   MR. ROBB:
                              I believe it was January 29th, Your
      18
         Honor.
      19
                   THE COURT: The discovery cutoff, as I recall,
      20
         was February 7?
11:28AM
      21
                   MR. ROBB: Yes, Your Honor. There was a quirk
      22
         in the schedule. It was originally set for before then.
      23
         I believe it was, like, the parties had agreed on a
```

close of fact discovery, or the date was set in late

January. We asked for it to be moved to February 7th.

24

25

11:28AM

That ruling had not yet been decided. The parties then 1 2 served their opening reports, then discovery was pushed 3 about a week after that. 4 And so due to that essentially lag period, his initial report was served approximately eight days 5 11:29AM before the close of the final discovery, fact discovery 6 7 cutoff. 8 THE COURT: And so tell me about the prejudice 9 to you from that. What would you have done about whatever is disclosed in these two exhibits? 10 11:29AM 11 MR. ROBB: Our expert would have liked to have 12 more time to determine whether he agreed with the analysis that Dr. Bazelon performed on these. 13 14 Our expert, given the limited time of discovery, put in criticisms of the FCC auctions and of 15 11:29AM some of the theories and models presented by 16 Dr. Bazelon. He offered no criticisms of the Airwave 17 18 analyses that Dr. Bazelon had put in simply because he 19 didn't have time to perform those analyses. 20 THE COURT: All right. Mr. Robb, under the 11:30AM 21 circumstances, I think that the disclosure was 22 sufficiently timely, given the nature of the evidence and the fact that I don't think the Plaintiffs had it 23 24 before their expert provided it to them. 25 So I don't think it was withheld, and anyway, I 11:30AM

```
will overrule the objections to 1111 and 1113.
      1
                   MR. ROBB:
                              Thank Your Honor.
      2
       3
                   With your permission, I'd like to just check
                      It will take ten seconds.
       4
         one thing.
       5
                   THE COURT:
                               Certainly.
11:30AM
                                 And, Your Honor, I believe
      6
                   MR. HOFFMAN:
      7
         counsel conceded that PX277 is a 1006 summary, and we
      8
         would ask that the objection to that be overruled as
      9
         well.
                   THE COURT:
                               It is.
      10
11:31AM
      11
                   And perhaps, Mr. Robb, if I can interrupt you
      12
         and ask the Plaintiff to identify for me in the next
         bucket what portions of these 10-Ks are they seeking to
      13
      14
         admit?
      15
                   MR. HOFFMAN: Your Honor, may I approach?
11:31AM
      16
                   THE COURT: Yes.
                   MR. HOFFMAN: Your Honor, what I've handed you
      17
      18
         is -- I think counsel mentioned that we had put together
      19
         a excerpted version of the 10-Ks to try to cut down, I
      20
         guess, the issues. Even within these, you know, we're
11:32AM
      21
         certainly willing to cut them down to just that
      22
         information which is directly relied upon by the
      23
         experts.
      24
                   I should say that both of the -- well,
     25
         Dr. Bazelon and Mr. Bergman rely on these, and some of
11:32AM
```

the issues are connected to Daubert issues as well. 1 But 2 there are essentially, within this document, there are 3 three categories of information that we ask be admitted. It doesn't seem like the HDMI is connected. 4 But, Your Honor, if you could please look --5 11:32AM there it goes. Sorry. 6 7 So within the data that you have here, if you 8 look at the screen or you look at PTX265, this is a 9 picture from essentially the third page of the document, and this shows the information from -- so there's a 10 11:33AM 11 chart here that admittedly includes dollar numbers. 12 We're not using those and we're fine redacting them. What the experts rely on is the connection data 13 14 shown on the screen. We would find where the only issue in the chart is connection data, redacting dollar 15 11:33AM figures from that. 16 17 The second category is statements by Verizon in 18 their 10-Ks that the experts rely on as provided a 19 couple -- there's a number of them, so I provided just a 11:33AM 20 couple examples of how they are being used. 21 So this is Mr. Bergman's report where he's 22 citing to the 10-K regarding statements by Verizon as to 23 the importance of speed and coverage and other issues 24 going to the importance of capacity to Verizon and to 25 its competitive stature. 11:34AM

11:34AM

11:34AM

11:35AM

11:35AM

11:35AM

And then the third one, and admittedly I think 1 this is the controversial one, but counsel can correct 2 3 me if I'm wrong. And this is detailed to more detail in the Daubert motions both against Dr. Bazelon and 4 Mr. Bergman and go to their MIL 5, and which Your Honor 5 I think ruled this morning you would hold until you 6 7 ruled on the Daubert motions. 8 I think this particular issue with the 10-Ks, this third category of data probably rises and falls on 10 But as described in the briefing, it's 11 Defendants' position that they don't actually need 12 excess capacity and that they have enough capacity and, 13 therefore, the invention provided capacity savings has 14 no value to them. Both Mr. Bergman and Dr. Bazelon point to their 15 16 continued investment in capacity as evidence that they are not satisfied and that they are continuing to invest 17 18 because if they don't continue to invest at high levels, 19 they will quickly run out of excess capacity because 20 traffic is ever growing. So this is a cite from 21 Mr. Bergman's report relying on that data from the 22 It's essentially one line. 10-Ks. If you look, Your Honor -- well, anyway, I'm 23 24 sorry, Your Honor. I don't have the direct cite. 25 So, again, there are three categories that we

would ask be found admissible, and we would work with 1 Verizon and T-Mobile to make sure we're on agreement 2 3 about which those are. 4 Again, it's within the 10-Ks, disclosed data by 5 the Defendants about connections and subscribers, pretty 11:36AM much what you see on screen here, but also there's one 6 7 for different periods, statements about the importance 8 of capacity and narrative statements within the 10-Ks, and third, information about the continued capital investment in capacity by the Defendants, which is 10 11:36AM 11 really an issue that they themselves have created by 12 countering our case by arguing that they have all the capacity they need and so our invention has no value. 13 14 Thank Your Honor. THE COURT: All right. Thank you, Mr. Hoffman. 15 11:36AM 16 Good morning, Your Honor. Hannah MS. BEDARD: Bedard on behalf of the Defendants. 17 18 THE COURT: Good morning. 19 MS. BEDARD: So I will quickly address the 20 10-Ks which are in bucket 10, and again, these are 11:37AM 21 Verizon Plaintiff's Exhibit 265 and T-Mobile Plaintiff's 22 Exhibit 75. So these are both compilations of the SEC filings. We looked at, it sounds like from the 23 24 Plaintiff's side that there's three categories that they 25 want to keep in this case and that they are okay with 11:37AM

redacting the many large numbers.

11:38AM

11:38AM

11:38AM

11:39AM

11:39AM

I'll note that the Verizon exhibit has been excerpted down to 32 pages. Almost all of those pages do have the large numbers on them. So, for example, they have Verizon's total operating revenues, total expenses and so for that, we think that that runs afoul of this Court's standing MIL 3 and also runs into the same issues that the Court identified discussed in bucket 8 in terms of the prejudice that that could cause to the Defendants.

THE COURT: It definitely does. And so there are obviously significant further redactions required. The narrative statements that were the first two categories, I think, that the Plaintiff is arguing for, they don't appear problematic from the large figure standpoint. Do you have other objection to them?

MS. BEDARD: We don't have other objections to -- for the first two categories, the connection data and the narrative, the narrative statements. For those we can discuss with the Plaintiff side whether we should just entirely redact from the 10-K or if we should perhaps excerpt from the 10-K and cite that the, you know, source of that information is the Defendants' 10-K, and we're happy to discuss with the Plaintiff or take Your Honor's direction on what would be the most

PageID #: 24699 88

efficient way to present that information.

11:39AM

11:40AM

11:40AM

11:40AM

11:41AM

THE COURT: If they want the cover sheet, in effect, or parts of the cover sheet that show it's an official filing, I would allow them that, and they can redact down to the information in the first two categories.

As far as the third category, I do expect that that will be decided in connection with the Daubert issue, and --

MS. BEDARD: Understood, Your Honor. We would just point out that there is a disconnect in the Plaintiff's argument here in terms of their willingness to redact the big numbers but their intent to get in the big numbers by proxy of how much billions of dollars have been spent on spectrum.

And so we understand the distinction that Your Honor may make in terms of a decision that is pending on the MIL 5, but we do think that they are using these numbers, the big, big numbers regarding spectrum in order to point out the amount of money that the Defendants may be able to pay, and it runs into the same issue of making the jury believe that the Defendants will be able to afford to pay whatever amount the Plaintiff asks for because it will appear small in comparison to the amount of money that has been spent on

```
1
         spectrum.
      2
                   THE COURT:
                               I know their argument is that by
       3
         arguing that the Defendants have all the spectrum they
         need, they open the door to what the Plaintiff would
       4
         regard as a rebuttal of that.
      5
11:41AM
                   I know that's an argument that will be taken up
      6
      7
         in connection with that Daubert motion to decide whether
      8
         that is an admissible theory, and I will just make sure
         that this issue that you are raising here in connection
      10
         with whether those large numbers are the sort that are
11:41AM
      11
         only being put up to skew the damages arising or whether
      12
         they have a proper and necessary role in the analysis.
      13
                   So I'm going to carry that part of it to be
      14
         decided with that Daubert motion, but I will rule that
         the other parts of the 10-K that we just talked about
      15
11:42AM
         are the subject of a negotiated redaction, and we will
      16
         be sure to set a final hearing time before the 23rd so
      17
      18
         that if there are issues about any redactions ordered in
      19
         this process that we can get back to them and decide
     20
         them.
11:42AM
      21
                   MS. BEDARD:
                                Understood.
                                              Thank you, Your
      22
         Honor.
      23
                   THE COURT:
                               Thank you.
      24
                   MR. SIM:
                             Good morning, Your Honor. Charlie
     25
         Sim for the Defendants.
11:43AM
```

THE COURT: Good morning. 1 MR. SIM: When Your Honor's ready, I'd like to 2 3 move on to bucket 11, Android and Samsung technical documents. 4 5 THE COURT: All right. Go ahead. 11:43AM 6 MR. SIM: These are three PowerPoint 7 presentations that were produced by Samsung in 8 connection with Headwater's subpoena to Samsung in this All three of these documents are cited in 10 Headwater's infringement expert report for the truth of 11:43AM 11 the matter asserted in those documents, namely dozens 12 and dozens of citations that go to the operation of some of the accused Android features in this case. 13 14 So I submit that these documents are hearsay in that they were produced by a third party and are being 15 11:43AM offered for the truth of the matter asserted and that no 16 17 exception applies to hearsay. 18 Samsung produced a representative for deposition in this case. He was shown one of these 19 three documents, the exemplary document Plaintiff's 20 11:44AM 21 Exhibit 806. He expressed no familiarity with that 22 document, but Headwater did ask him one question that 23 goes to this issue. They asked, quote: Any reason to believe that this is not a business record of Samsung? 24 25 Answer: No. 11:44AM

```
1
                   Plainly, a lay witness such as Samsung's
         representative, who is not familiar with requirements of
      2
       3
         the business records exception or any other exception to
         hearsay, and there was no other deposition testimony
       4
         going to whether or not these documents would constitute
      5
11:44AM
      6
         business records.
       7
                   THE COURT:
                               Mr. Sim, if these are along the
      8
         line of technical manuals or the like, typically I find
      9
         that those are nonhearsay in the sense that what is
      10
         important is what they describe about the technology,
11:45AM
         not whether or not that's true.
      11
      12
                   Tell me more about whether these technical
      13
         documents are in that form or whether they are something
      14
         different than operating manuals or the like.
      15
                   MR. SIM:
                             Certainly, Your Honor. Maybe it
11:45AM
         would be helpful if I show you our exemplary document,
      16
         if I may have the ELMO.
      17
      18
                   THE COURT: All right.
                   COURTROOM DEPUTY: Use the dial.
      19
      20
                   MR. SIM:
                             I'm sorry?
11:45AM
      21
                   COURTROOM DEPUTY: Use the dial.
      22
                   MR. SIM:
                             I'm sorry.
      23
                   So I can flip through a couple pages here, but
         all three of these documents were PowerPoint
      24
      25
         presentations prepared by Samsung. They were all
11:46AM

11:47AM

22

23

24

25

92 PageID #: 24703 designated confidential, attorneys' eyes only by Samsung 1 for production in this case. And for all purposes for 2 3 all review of these documents, it appears they were generated for internal use by Samsung in both English 4 5 and Korean in instances. So I'll show you a few pages of these documents. 6 7 Now, while the pages of these documents refer 8 at times to some of the features accused in this case, 9 they are by no means technical manuals; in fact, have 10 very little explanation narratively on them. 11 appear to be used for some internal purpose at Samsung. 12 Samsung's representative at his deposition was not able 13 to provide any more information than that. But they are 14 not documents produced for wide dissemination, or apparently even dissemination outside a specific team at 15 16 Samsung, for the purpose of explaining the nuances of some of these features. 17 18 For instance -- I'm not sure you can see that 19 so well, Your Honor, but Headwater's expert in his 20 infringement report repeatedly replies on this page, in 21

so well, Your Honor, but Headwater's expert in his infringement report repeatedly replies on this page, in addition to many other pages of this document, which appears to reproduce source code, the origin of which is unclear to us, but there is no narrative explanation as to really what is going on on this slide. It is, at best, simply a description of -- you know, I recognize

```
some variables here from the public source, Android
      1
      2
         code, and all of that documentation is already on the
       3
         parties' joint exhibit list.
       4
                   So does that answer Your Honor's question?
                               I think it does at this point.
       5
                   THE COURT:
11:47AM
      6
                   Let me hear from Plaintiff as to why that
      7
         shouldn't be deemed hearsay.
      8
                   MR. DAVIS:
                               Thank you, Your Honor.
      9
                   I also wanted to add that in addition to the
      10
         testimony Mr. Sim talked about from Samsung's witness
11:48AM
      11
         Mr. Schiksnis, he was also asked: Do you have any
      12
         reason to believe that any of the documents produced by
         SEA -- that's Samsung Electronics America, who was
      13
      14
         subpoenaed -- are not regular records of the company?
      15
                   And, again, he said:
                                          No.
11:48AM
      16
                   So the witness was asked. You know, we
         attempted to establish he was not familiar with every
      17
      18
         single document produced by Samsung.
      19
                   I also wanted to raise this with respect to the
     20
         prior bucket that we addressed, Your Honor, because
11:48AM
      21
         those documents, those Samsung documents in bucket 6
      22
         like PTX797 in the Verizon case, those were also
         produced by Samsung. That's -- those are documents that
      23
      24
         Mr. Schiksnis was testifying about that --
      25
                   THE COURT: I would have answered that question
11:49AM
```

the same way, though I don't think that establishes the foundation you need.

MR. DAVIS: All right. So, Your Honor, the -- I think to your point, you know, these are deeply technical documents. The network policy document that is the exemplary PTX806, this has been testified about extensively by Samsung's witnesses. In fact, all of the documents in this bucket were testified about by Samsung's witnesses.

You know, Verizon and T-Mobile in this case, they are selling Samsung products. They point to Samsung as the source of information about the technical operation of Samsung products. Samsung, they have indemnification agreements because Samsung is so deeply involved in this case.

And so -- and I'll give you just another example, Your Honor, that -- maybe two more. So as you may recall, the Defendants also have a motion for summary judgment of noninfringement with respect to the '613 patent. That's based on a jury finding in the 422 case with respect to Samsung products.

So Defendants are saying that these materials which were the subject of that case are so relevant and so tied up in how the accused products work that they should be granted summary judgment and, yet, they are at

       These are the documents from the Samsung 422
       They shouldn't be able to have it both ways.
case.
         I'll also add, Your Honor, that they are
pointing to internal Samsung features. They are not
publicized as noninfringing alternatives. Those are not
described in public documents. They are from internal
Samsung documents like these.
         Their expert report talks about this.
Paragraph 624 of Dr. Jeffay's opening report refers to
                        and other internal Samsung
          How does he know how these operate without
features.
relying upon these types of Samsung documents.
         So how is it that Defendants can use these
technical documents describing Samsung's features.
                                                    Thev
are not in publicly available user guides. They are in
exactly documents like these, the internal Samsung
technical documents. How can they use them and, yet,
claim these documents are unreliable hearsay; we
couldn't possibly use them to substantiate claims about
how the accused products work.
                    Well, are you objecting to their

use of them?
```

MR. DAVIS: No. Your Honor.

THE COURT: Well, that's how they can use them. 1 MR. DAVIS: I'm sorry? 2 3 THE COURT: If you don't object, obviously I 4 can't address whether they are proper or not. I understand, Your Honor. 5 MR. DAVIS: I think 11:52AM the point I'm just conveying is that this seems like a 6 7 disingenuous type of position from Defendants, that when it suits their purposes, they think it's perfectly 8 permissible to use these technical documents to support their claims, their assertions. But when the Plaintiff 10 11:52AM 11 uses them, these documents from an indemnifying third 12 party, who the Defendants agree is the definitive source 13 on how the products that they sell work, they say that 14 these are unreliable documents. 15 I assume that when you talk about THE COURT: 11:53AM 16 the Defendants are using them, you are saying that their experts rely upon them in their reports? 17 18 MR. DAVIS: That's right, Your Honor. 19 THE COURT: And so do yours. And they are not 20 trying to keep your expert from relying on them. It's 11:53AM 21 just a question of are they admissible to the jury, and 22 that's the issue that we are currently exploring. 23 I understand, Your Honor. MR. DAVIS: 24 I'll add as well that there are

SAM-THIRDPARTY -- that was the Bates number used by

25

11:53AM

```
Samsung in this case -- there are SAM-THIRDPARTY
      1
      2
         documents on both the joint exhibit list and on
       3
         Defendants' exhibit lists.
                   THE COURT: Well, I understand that. I don't
       4
         know what you want me to make of that, though. I need
      5
11:54AM
      6
         an argument that's based on the rules of evidence.
       7
                   MR. DAVIS:
                               I understand, Your Honor. I think
      8
         the view that we took was I thought, in our view, a
      9
         principled stand that we are not going to try to have it
      10
         both ways like we think the Defendants are trying to do
11:54AM
      11
         and so that's why we didn't raise objections to the same
      12
         documents or the same types of documents that Defendants
      13
         are relying upon.
      14
                   THE COURT: Well, I guess to follow that line
         of argument, are you saying that the Defendants are
      15
11:54AM
      16
         seeking to admit Samsung internal presentations?
      17
                               I'm not certain, Your Honor, what
                   MR. DAVIS:
      18
         the specific Sam third-party documents are on their
      19
                I can check that. I don't -- it's not these
      20
         documents, I can certainly tell you that much.
11:55AM
      21
                   THE COURT:
                               Obviously these are multipage
      22
         presentations. It is possible that as to some
      23
         presentations, the outcome would be differently, I mean
      24
         some pages.
      25
                   What part of -- I think we're looking at 806.
11:55AM
```

```
What part of that are you specifically seeking to use
      1
         with the jury?
      2
       3
                   MR. DAVIS: Yes.
                                     Sure, I can explain that,
         Your Honor.
                       If I may have the ELMO.
       4
                   So the first slide I would point to is Slide 3.
       5
11:55AM
         This is simply a list of accused features.
      6
                                                       These are
      7
         network access rules, and it's part of the network
      8
         policy. The claim term is apply a policy. And the
         power saving mode is accused, doze mode is accused, app
      10
         standby, data saver, roaming reduction, all accused.
11:56AM
      11
                   On Slide 4, what we would point to, Your
      12
         Honor -- and I won't belabor the point because it's very
         small type -- but what we see here is there are certain
      13
      14
         elements of the Samsung system that existed prior to the
         claimed inventions, but there are other aspects,
      15
11:56AM
         especially including this middle aspect here, that
      16
         existed after the claimed inventions.
      17
      18
                   And so much like in the Samsung cases, the
      19
         Defendants here, their lead prior art reference is a
      20
         prior art Android device. And so we would point out
11:56AM
      21
         that, well, these pieces, or aspects of those pieces,
      22
         did exist before, as you're suggesting, but then later
      23
         the network policy was added and that's what was accused
      24
         of infringing.
      25
                   From there, Your Honor, it's -- you know, there
11:57AM
```

```
may be little bits that we would point to, including the
       1
       2
         excerpt that Mr. Sim pointed out, where we have, for
       3
         example, some code variables that are reflected in
         Android code and also Samsung code.
       4
                   I'll add for the record, Your Honor, that
       5
11:57AM
         Samsung did make available, albeit a bit belated, did
      6
      7
         make available source code for inspection. Headwater
      8
         inspected it; Defendants did not. They chose not to,
         for whatever reason. But, you know, pointing to sort of
      10
         variables about how the accused products work, the
11:58AM
      11
         firewall rules that are set that show the blocking of
      12
         network access.
      13
                   I don't know if that answers your question,
         Your Honor, if that gives you a sense of the specifics
      14
         of how we would use a document like this.
      15
11:58AM
      16
                   THE COURT: And do you have physical copies of

      17
      18
                   MR. DAVIS:
                               We do. I'm sorry. 804 is the --
      19
                   THE COURT:
                               The T-Mobile version?
      20
                   MR. DAVIS:
                               Yes.
                                     It's the exact same, Your
11:58AM
      21
         Honor.
      22
                   THE COURT:
                               All right.
                               So, and we do have physical copies
      23
                   MR. DAVIS:
      24
         of all three documents in this bucket, which, each of
      25
         which has a Verizon number and a T-Mobile number.
11:58AM
```

```
100
                           PageID #: 24711
       1
                   THE COURT: All right. If you would hand those
      2
         up, I'm going to look at those over the lunch hour, and
       3
         we'll resume with this after the lunch.
       4
                   MR. DAVIS:
                               Certainly. Thank Your Honor.
                   THE COURT:
                               And we'll be in recess until
       5
11:59AM
         1 o'clock. And if you would just pass those to
      6
       7
         Mr. Saltz, he'll bring them.
      8
                   MR. DAVIS:
                               Thank Your Honor.
      9
                   (Recess from 11:59 a.m. to 1:06 p.m.)
                   THE COURT: I believe we are on bucket 11 of
01:06PM
      10
      11
         the Plaintiff's exhibits. And over the lunch hour, I
      12
         looked more closely at PTX806, 808, and 717, which are

                               The 806 document, is that one that
      17
                   THE COURT:
      18
         you can confirm comes from Samsung?
      19
                   MR. DAVIS:
                               Yes, Your Honor. All three of them
     20
         do.
01:07PM
      21
                   THE COURT:
                               Well, and by "comes from," I mean
      22
         was created by?

                               Oh. Yes, that is true for all
      23
         three of them.
      24
```

THE COURT: Well, it does not appear to be the

25

01:07PM

```
Case 2:23-cv-00379-JRG-RSP
                           Document 317-1
                                         Filed 06/26/25 Page 102 of 238
                                                                   101
                            PageID #: 24712
         case for -- 717 says it's from communications research
       1
       2
          team?
                   MR. DAVIS:
       3
                                Oh, let me take a closer look at
          that one, Your Honor.
       4
       5
                   THE COURT: All right.
01:07PM
                                I see. Your question, Your Honor,
       6
                   MR. DAVIS:
       7
               Is communications research team something within
          is:
       8
          Samsung --
       9
                   THE COURT:
                                Yes.
      10
01:08PM
                   MR. DAVIS:
                                -- as opposed a third party?
      11
                   THE COURT: That is my question.
      12
                   MR. DAVIS: I believe that's within Samsung,
          Your Honor. And where I come up with that is the -- in
      13
      14
          the lower left corner of --
                   THE COURT:
                                I do see that now. In the fine
      15
01:08PM
      16
          print, at the bottom of each slide, it says: Samsung
          DMC R&D communications research team.
      17
      18
                   MR. DAVIS:
                                That's right, Your Honor. Yes, so
      19
          that's our understanding that this is a team within
      20
          Samsung.
01:09PM
      21
```

21 THE COURT: Quite a lot of 717 is not in 22 English?

MR. DAVIS: Yes, that's right.

THE COURT: What would you propose that the

01:09PM 25 | jury do with that?

```
1
                   MR. DAVIS:
                               So I think, Your Honor, we've
         handled that in a variety of different ways.
                                                         We could
      2
       3
         provide a translated version. We could also provide a
         version that slims down this document, since it does
       4
         span 17 pages and just focuses on particular portions
      5
01:09PM
         that either have no Korean on them or a much longer
      6
      7
         amount of Korean on them and then provide translation of
      8
         that if needed.
      9
                   THE COURT: What is your understanding of what
      10
         717 was created for?
01:10PM
      11
                               I believe this is -- so this is
                   MR. DAVIS:
      12
         explaining two different features, doze and app standby,
         that were released in Android version M, or Marshmallow.
      13
      14
         So my understanding is that this sort of explains
         internally within Samsung what these features do, how
01:10PM
      15
      16
         they are implemented and what they provide, when we see
      17
         various state diagrams and explanations and the like for
      18
         it.
      19
                   THE COURT:
                               And have you obtained any testimony
     20
         from anyone with Samsung about 717?
01:10PM
      21
                   MR. DAVIS:
                               Yes.
                                     There was some testimony.
      22
         have the citation I need to pull up the testimony.
                                                               That
         is from -- let's see -- the February 29, 2024 deposition
      23
      24
         of Mr. HongJung Son, who was Samsung's 30(b)(6)
      25
                    This was Exhibit 12 to that deposition.
01:11PM
         designee.
                                                               Ι
```

don't believe this was a document he personally created. 1 He did create the PTX808, so he was able to explain 2 3 I don't believe he created PTX717. 4 THE COURT: Frankly, 808 appears to me to be an evaluative document. It is, in large part, comparing 5 01:12PM Google and Samsung as opposed to a technical document 6 7 about the performance characteristics of Samsung, which 8 806 appears to me to be. 9 MR. DAVIS: I see. Yeah. Your Honor, I can explain 808 a little bit as well. I think the primary 01:12PM 10 11 portion of 808 is the timeline that begins on page 17 of 12 the document, where -- this may be what Your Honor's referring to where there's a timeline up above for 13 14 Samsung and a timeline below for Google, and they were sort of proceeding on these parallel tracks of providing 15 01:13PM 16 power-saving functionality, and over time, we see that some of it blends together as well. 17 18 There are enhancements made. There are 19 that appear on the Google side and also on the 20 Samsung side. And so I think what Mr. Son was 01:13PM 21 explaining there is how in Android S oS -- that's the 22 name of the presentation -- the Android S operating system release, how different power-saving features 23 24 operate, some of those being Samsung-created, like 25 , and others being created by Google for 01:13PM

purposes of Android generally. And so they are all 1 2 features that are part of the Samsung products by virtue 3 of Samsung practicing Android and then additionally having some of their own power-saving features like 4 5 01:14PM THE COURT: Both 717 and 808 appear to me to 6 7 have large components that are in a classic hearsay use 8 where the relevance would be the truth of the matter asserted. 806 appears to me to be more of just a 01:14PM 10 technical performance manual or explanation. So I think 11 in order to get 717 and 808 in, you would need to have a 12 business record foundation. I see, Your Honor. Yeah, that --13 MR. DAVIS: 14 To that point, the deposition testimony I understood. was referring to on PTX717, Mr. Son was asked -- the 15 01:15PM exhibit was introduced with him. We asked: 16 This was also a confidential document produced from Samsung's 17 18 records? 19 He says: I see it starts with a Sam Bates 20 number. I would gather that it is a Samsung document. 01:15PM 21 What is the DMC R&D center? We asked: 22 That group no longer exists, but it's He says: 23 a research center. So he testified about this document. He did 24

not write this document like he did the other PTX808.

25

01:15PM

1 THE COURT: A critical part of 803(6) is 2 evidence that the contents were added by a person with 3 knowledge at or about the time described as opposed to a historical record, and I'm afraid that that testimony 4 that you refer to so far is not relatively close to an 5 01:16PM 803(6) declaration, especially if what you're after is a 6 7 timeline and one that compares it to another product. 8 So do you have anything else on the business records side? 9 10 On 808, give me just a moment. 01:17PM MR. DAVIS: 0r I don't know if it would be most efficient for me to 11 12 sort of revisit this once I can locate it in the -- in Mr. Sun's deposition transcript. 13 14 THE COURT: If you want to come back to this at the end of the day, I'll give you that opportunity; but 15 01:17PM at this point, I'm going to sustain the hearsay 16 17 objection to 717 and 808 and overrule the objection to 18 806. Understood, Your Honor. Thank you. 19 MR. DAVIS: MR. VINCENT: Your Honor, with respect to 20 01:18PM 21 buckets 12 and 13, those are wholly T-Mobile exhibits, 22 for the T-Mobile case, and at least the last bucket is directly relevant to one of the T-Mobile MILs that will 23 24 be argued that will go a long way, if not completely 25 resolve the objections that are for that bucket of 01:18PM

exhibits.

01:18PM

01:19PM

01:19PM

01:20PM

01:20PM

If it's all right with Your Honor -- I've cleared with counsel -- we would propose to postpone argument on those exhibit buckets for T-Mobile until after the argument of the T-Mobile MILs because it's -- at least for the last bucket, those arguments will largely overlap.

THE COURT: All right. Then we'll move on to the Defendants' exhibits.

MR. DAVIS: Thank Your Honor.

This takes us to bucket 1 that's applicable to both Verizon and T-Mobile. The representative exhibit here is DTX113 in the Verizon case. And the issue that we have here, how this bucket got its name "ItsOn bugs" is there are a number of documents -- this is one of them on Defendants' exhibit list -- where they want to portray the ItsOn software as sort of defective in some way, and we think this is just totally irrelevant because the bugs that they are pointing to have nothing to do with the accused functionality, program background determinations, interaction of users, et cetera. They have to do with things like what we see here on the slide.

This is Slide 12 in our presentation. We have an email from Dr. Raleigh to someone else at ItsOn, and

what he's saying is: My father is a Virgin DDR 1 subscriber. 2 That means data done right. That was a 3 program using the ItsOn software. And he's saying that the device is hung up in activation process. He says 4 there are fatal bugs that he encountered in trying to 5 01:20PM activate a phone that he was demonstrating to customers 6 7 as well. What Defendants like about a document like 8 this is, see, it says fatal bugs; these are a big problem; the ItsOn software was bad. Well, at the end of the day, Your Honor, these 01:21PM 10 11 are -- we think these are just normal software 12 development bugs; but even if they are a serious 13 problem, it has to do with an activation process that 14 has nothing to do with the claimed functionality. And so we think these sorts of documents are 01:21PM 15 16 just being introduced purely to prejudice the jury into making an improper comparison of the accused products to 17 18 the ItsOn software or something to that effect. 19 think it's just not relevant. THE COURT: All right. And everything in this 20 01:21PM 21 bucket is of that nature? 22 MR. DAVIS: That's right, Your Honor. The only thing I would add is that Defendants also, they can't 23 24 use this material for secondary considerations. They 25 have no expert opinions on that. Their damages experts 01:22PM

```
1
         don't rely on these materials and so it's unclear how
         they would even use them at trial.
      2
      3
                   THE COURT: I assume Dr. Raleigh will testify?
      4
                   MR. DAVIS: Yes, they -- that's right, Your
                 They could certainly use them, you know,
      5
01:22PM
         cross-examination-wise and that's essentially what we
      6
      7
         have seen in prior Headwater cases.
      8
                   THE COURT: All right. Did we address this in
      9
         prior Headwater cases?
      10
01:22PM
                   MR. DAVIS:
                               This did come up, I believe, in the
      11
         103 case. I don't believe it did in the 422 case, if
      12
         memory serves.
                   THE COURT: And I assume it was admitted?
      13
      14
                   MR. DAVIS: Yes, Your Honor.
                                                 This was -- I
         don't believe this specific document, but things of this
      15
01:23PM
      16
         nature about the subject of ItsOn bugs were allowed.
      17
                   THE COURT: And if I'm recalling correctly, it
      18
         was on the theory that the Plaintiff will be bolstering
      19
         ItsOn, and the Defendant sees this as rebuttal to that?
      20
                   MR. DAVIS:
                               I'm not sure if that was exactly
01:23PM
      21
         Samsung's argument, but -- and I'm not sure that that's
      22
         Defendants' argument here exactly. But to that point,
         you know, I think our issue is just we want to prove for
      23
      24
         marketing and other purposes that the ItsOn software
      25
         practiced the '541 patent. Practicing the patent
01:23PM
```

```
doesn't have anything to do with being successful
      1
      2
         through an activation process or anything like that.
       3
                   So I think where we are drawing the line, Your
         Honor, is -- and trying to do it in a principled way is
       4
         that ItsOn is relevant, but this type of thing is not
      5
01:24PM
         relevant because it's sort of poisoning the well about
      6
      7
         ItsOn on something entirely unrelated to the accused
      8
         functionality.
      9
                   If Defendants had evidence of problems with the
      10
         ItsOn software with something related to the patent
01:24PM
      11
         claims, like determining foreground versus background or
      12
         something to that effect, I think we would see that as
         relevant, but what we see in these ItsOn bugs documents
      13
      14
         is just unrelated.
      15
                   THE COURT: All right. And so 403 is the
01:24PM
      16
         primary rule you're relying on?
      17
                   MR. DAVIS: That's right, Your Honor.
      18
                   THE COURT:
                               All right. Thank you, Mr. Davis.
      19
                   MS. DOMINGUEZ:
                                   Good afternoon, Your Honor.
     20
         Kate Dominguez for Defendants.
01:25PM
      21
                   The first thing I want to do is clarify the
      22
         record on whether this was raised only in the 103
      23
         Samsung matter or also in the 422. It was actually
```

raised and addressed in the objection. Headwater's

objection overruled in both cases.

24

25

01:25PM

1 I would refer you to, in the 422 case, Docket 2 Number 351. That's the pretrial hearing transcript. 3 page 221, lines 17 through 18 was Your Honor's ruling allowing these types of exhibits over the exact same 4 objections that the Plaintiff is making here. And then 5 01:25PM in the 103 case, I would refer Your Honor to Docket 360 6 7 That was the order denying Plaintiff's at page 2. MIL 2. 8 For the same reasons for the Court's ruling in both of those cases, Defendants submit that these are 01:26PM 10 11 incredibly important documents to counter the one-sided 12 narrative that Headwater wants to present. So over Defendants' objections, which we've 13 been arguing since last week and in many, many different 14 papers across our SJs, our Dauberts, our MILs, Headwater 15 01:26PM 16 insists on injecting ItsOn and its products and its business into every aspect of this case. 17 18 Every one of Headwater's experts uses ItsOn's 19 products and its business to bolster the asserted 20 patents and claim they are valuable, that they provide 01:26PM 21 benefits. As Your Honor, I'm sure, knows, we have 22 Dauberts on much of those discussions because, as set forth in our papers, they are using their experts as 23 24 nothing more than mouthpieces for facts, or Headwater's 25 view of the facts. But if Headwater is going to be 01:27PM

talking about ItsOn, and we know that they are, and 1 2 showing one half of the story and claiming that because 3 ItsOn used the patents, it provided all these benefits, in fairness, we need to be able to present the other 4 side of the story. And what these products show is that 5 01:27PM the same products that Headwater is waving around as 6 7 evidence of benefits of using the Headwater patents, 8 those products were actually a massive failure. caused serious problems rather than delivering benefits. 01:27PM 10 And I would just note: I don't think that the 11 document that has been selected here, which is DX113 in 12 the Verizon case and DX115 in the T-Mobile case, is 13 representative on that, on that front because I think --14 we think that's relevant anyway because it goes to some of the reasons for the failure of ItsOn, and that's also 15 01:28PM an issue in the case, which I'll get to. 16 But as to being focused on the activation 17 18 process, many, many other documents -- and they are in 19 this bucket, and we can pull them up and look at them if 20 Your Honor would like -- they are not specific to the 01:28PM 21 activation process, and they do go to the functionality 22 that Headwater is attempting to connect to the patents 23 in this case. 24 THE COURT: Ms. Dominguez, I'm satisfied that

I'm going to overrule the objection to this bucket, as

25

01:28PM

```
in the past, and I'll give Plaintiff an opportunity to
      1
         tell me if the next bucket should be distinguished.
      2
                                   Thank Your Honor.
       3
                   MS. DOMINGUEZ:
                   THE COURT:
       4
                               Thank you.
                   MR. DAVIS:
                               Your Honor, so the next bucket is
       5
01:28PM
         also related to ItsOn. I -- there are distinguishable
      6
      7
         in the sense that they don't focus on bugs, but I think
      8
         given Your Honor's ruling on bucket 1, I don't think you
         are going to be persuaded by our position on bucket 2.
      10
01:29PM
                   THE COURT:
                               I suspect you're right.
      11
                   MR. DAVIS:
                               So --
      12
                   THE COURT:
                               I don't really know bucket 2,
      13
         but --
                   MR. DAVIS:
      14
                               So let me just very briefly talk
         about one of those documents.
      15
01:29PM
      16
                   THE COURT:
                               All right.
                               So one of those documents that I'll
      17
                   MR. DAVIS:
      18
         show up on the screen, Your Honor, is the assignment.
      19
         We see this on the left side of the screen, the
      20
         assignment from ItsOn to ItsOn ABC.
01:29PM
      21
                   We think this is just confusing to a juror that
      22
         we're introducing this idea of an entity for an
         assignment for the benefit of creditors. We see no
      23
      24
         reason for something like this in the case in that it
      25
         has nothing to do with the relevant issues for ItsOn,
01:30PM
```

```
1
         certainly nothing about the technical merits or anything
         like that.
      2
       3
                   THE COURT: The subject of that document I
         don't think is problematic. There may be details in it
       4
                     Part of the ruling on the issue about
      5
         that are.
01:30PM
         spoliation is that the parties are permitted to tell the
      6
      7
         jury that certain documents are not available following
      8
         the liquidation of ItsOn. So the fact that there was a
      9
         liquidation I don't think is problematic.
      10
01:31PM
                   If there's something in here that the
      11
         Defendants would rely on to suggest that Headwater is
      12
         responsible for the absence of those documents, then
         that's something that I think should not be allowed.
      13
      14
         But I don't have enough understanding of this general
         assignment, as I sit here, to know whether that's true.
01:31PM
      15
      16
                   Do you?
                               No, I don't believe so, Your Honor.
      17
                   MR. DAVIS:
      18
         I don't believe there's anything in particular in that
      19
         document that is along the lines of what you're
     20
         describing.
01:31PM
      21
                   THE COURT:
                               I don't see a problem with the jury
      22
         knowing that ItsOn failed. I think that is something
         that is unavoidable. So if that is the nature of your
      23
      24
         objection to the assignment, I'll overrule that.
      25
                   MR. DAVIS:
                               Understood, Your Honor.
01:31PM
```

```
And the reason I'm still standing here is just
      1
         that I'm handling the next bucket.
      2
      3
                   THE COURT:
                               Okay. If I want you to sit down, I
         will tell vou.
      4
      5
                   MR. DAVIS:
                               Okay. Thank you.
01:32PM
      6
                   THE COURT:
                               All right. So I'll overrule the
      7
         objections in the second bucket.
      8
                   MR. DAVIS:
                               All right. So there was previously
         a bucket 3 that's been withdrawn in light of a MIL
      10
         ruling, so that takes us to bucket 4. That is called
01:32PM
      11
         unelected prior art. There is just one exhibit in this
      12
         bucket. We see it on the screen here at our Slide 14.
         It's a user guide. It's about 200 pages long.
      13
      14
         user guide for a product called the T-Mobile myTouch 3G
      15
         slide.
01:32PM
      16
                   This is not a prior art reference that is being
         used as part of an invalidity mapping in this case, so
      17
      18
         it's unelected prior art. Introducing that evidence
      19
         would directly violate court MIL Number 4, which
     20
         obviously Your Honor's familiar with. So the user
01:33PM
      21
         guide's not relevant; the product it describes is not
      22
         relevant.
                   I think what we heard through the
      23
      24
         meet-and-confer process with Defendants is that they
     25
         believe it's relevant to discuss state of the art.
01:33PM
```

1 think the problem there, Your Honor, you know, it's especially a slippery slope in this particular instance 2 3 because their prior art reference is a different T-Mobile device. It's called the T-Mobile G1, entirely 4 different smartphone. But I think especially because of 5 01:33PM that fact that they are relying on a different T-Mobile 6 7 smartphone, I think it would be particularly confusing 8 to the jury and they may blend this together with the T-Mobile G1 when that's not something that Defendants' 01:34PM 10 expert has analyzed. 11 And, again, just reiterating that this is a 12 very substantial document. It's around 200 pages. Ιt has a whole lot of detail in it and so we don't see this 13 as just a basic document to show something, you know, 14 generic about the state of the art. 15 01:34PM 16 THE COURT: All right. Let me hear the 17 response. 18 MR. VINCENT: Yes, Your Honor. 19 The response is straightforward. It's not just 20 state of the art, and it's -- I think Plaintiff's 01:34PM 21 counsel has a misunderstanding of what our elected art 22 The election of art is the Android system art. is. It's the Android 1.6 operating system running on these 23 24 prior art devices.

We have an exemplary device, the T-Mobile G1

25

01:34PM

01:35PM

01:35PM

01:35PM

01:36PM

01:36PM

device by HTC. This user manual is from another HTC device, and it's cited in our expert reports to describe the functionality of the very feature that we are seeing renders obvious the asserted claims.

It is the Android feature that is we are asserting renders obvious the patents, and he is using this user guide to explain how that feature worked on devices at the time. And so it's not unelected. It's not simply state of the art. It goes directly to our theory of an invalidity and how this Android system art works, whether it's on a T-Mobile HTC G1 phone or an HTC myTouch phone.

The functionality -- I think he talks about this in his report that the functionality is the Android 1.6 functionality that was at issue.

THE COURT: Do you have another phone that is elected prior art?

MR. VINCENT: We have a physical T-Mobile G1 phone, and the purpose of using this myTouch user guide is it has descriptions of the exact same Android feature that is at issue that will help the jury understand how it worked.

It's a contemporaneous document. There's no question about whether it was -- whether it's an authentic document, whether it actually applies to the

```
correct Android version, and it explains how this
      1
      2
         functionality works.
       3
                   There's no dispute, as far as I'm aware, that
         the Android, at least at this -- for admissibility
       4
         purposes that the Android 1.6 somehow worked differently
      5
01:36PM
         on the T-Mobile G1, the HTC G1 versus the HTC myTouch.
      6
      7
         The description of the Android feature is what's
      8
         important.
      9
                  We also have a myTouch phone as well. We have
         a physical phone of the myTouch as well. So, again, we
01:37PM
      10
         are not limiting ourselves to a particular device. The
      11
      12
         point is the Android features and the Android source
      13
         code 1.6, that is what is rendering it obvious. We have
      14
         phones that we can demonstrate had that version of the
         software on it to prove up that it was, you know,
      15
01:37PM
      16
         released and on phones and in customers' hands.
      17
                   THE COURT:
                               But this HTC myTouch 3G phone is
      18
         not any art that you are relying on for invalidity?
      19
                   MR. VINCENT: I'm sorry. No, the myTouch phone
     20
         is something. We have -- we have the physical device.
01:37PM
      21
                   THE COURT: This myTouch 3G phone, that's what
      22
         the exhibit is about, right?
      23
                   MR. VINCENT: Yes, Your Honor.
      24
                   THE COURT: And are you relying on that phone
     25
         as prior art?
01:37PM
```

```
MR. VINCENT: Yes, Your Honor, that's -- it's
       1
      2
         explained in our expert report. Now, which particular
       3
         phone we bring to trial, well, that's to be determined,
         but we are going to use -- we have made this phys- --
       4
         this device was mentioned in our expert reports, relied
      5
01:38PM
         on, running Android 1.6 for this feature that we're
      6
      7
         relying on this manual for.
      8
                   So, again, it is the Android system that is in
         our reports that we are relying on.
      10
01:38PM
                   THE COURT: And you listed it as one of your
      11
         priority art references in your disclosure?
      12
                   MR. VINCENT: Yes, Your Honor. We elected --
         again, it's the Android system art is how we described
      13
         it, and I don't -- I'm not aware of any objection to our
      14
         articulation of how we described that art.
      15
01:38PM
      16
                   The Android system art again is, this is the
      17
         same art that was at issue in the Samsung 422 case.
                                                                Ιt
      18
         is the same operating system, Android Version 1.6.
      19
         are relying on that version of Android as it appeared on
      20
         devices before the priority date of the patents.
01:38PM
      21
                   THE COURT: And so what I'm getting at is are
      22
         you separately listing the devices as prior art, or just
      23
         the Android operating system?
      24
                   MR. VINCENT: I think the way we articulate
      25
         it -- again, this is, I think, my view, a ministerial
01:39PM
```

```
matter of proving up the availability of the prior art.
      1
         We are relying on the Android operating system, but we
      2
       3
         have to show it was on phones that were sold before the
         priority date and so that is why the physical devices
       4
         come into play. There's nothing unique about them.
      5
01:39PM
         It's just that --
      6
       7
                   THE COURT:
                               I understand. It's a simple
      8
         question. Have you listed the devices on your election
      9
         of prior art, or are you just relying on the Android
01:39PM
      10
         operating system?
      11
                   MR. VINCENT: The answer is yes, Your Honor.
                                                                  Ι
      12
         apologize for misunderstanding your question.
      13
                   THE COURT:
                               Okay. And so the initial objection
      14
         I heard was that this particular phone is not listed;
      15
         you're telling me it is?
01:39PM
      16
                   MR. VINCENT: That's my understanding it is
         listed in our election.
      17
      18
                   THE COURT:
                               Okay.
                                      Thank you, Mr. Vincent.
      19
                   Mr. Davis, tell me why you disagree.
                   MR. DAVIS: So, Your Honor, we'll talk more
      20
01:40PM
      21
         about this when we get to bucket 6 as well, but the
      22
         Defendants' exhibit list has a physical T-Mobile G1
                   It has as another exhibit screenshots of a
      23
         device.
      24
         physical T-Mobile G1 device.
      25
                   I don't -- I didn't see on their exhibit list.
01:40PM
```

```
1
         Is there a particular exhibit number for the T-Mobile
         myTouch 3G Slide phone? I don't believe it's on their
      2
       3
         exhibit list.
                   THE COURT: Well, right now I'm not asking
       4
         whether it's on their exhibit list. I'm asking whether
      5
01:40PM
         it's on their list of elected prior art.
      6
       7
                   MR. DAVIS:
                               On their 282 notice, Your Honor?
      8
                   THE COURT:
                               I guess.
      9
                   MR. DAVIS:
                               It may be, Your Honor. I haven't
01:41PM
      10
         had time to check just now.
      11
                   THE COURT:
                               Well, isn't that the objection
      12
         you're making?
      13
                   MR. DAVIS: Well, the objection is our
      14
         understanding has been that they are relying upon the
01:41PM
      15
         T-Mobile G1 physical device. They need a system.
      16
         system is the T-Mobile G1 running a particular version
         of Android.
      17
      18
                   If they want to make -- if their prior art
      19
         argument is just here's what the Android code said, then
     20
         that to me would be a different argument. It sounds
01:41PM
      21
         like what they are saying now is they have arguments
      22
         about a T-Mobile G1 system and arguments about a
         T-Mobile myTouch 3G Slide system and that we can sort of
      23
      24
         mix and match any documents about any of those.
                                                            And
      25
         that's potentially the problem that we see.
01:41PM
```

```
121
```

THE COURT: What is your basis for arguing that 1 2 this particular phone is not elected prior art? 3 MR. DAVIS: We didn't see that mapped. briefly mentioned in Dr. Jeffay's opening report on 4 5 invalidity. It's mentioned in passing as, you know, an 01:42PM example of a prior art device that had Android software 6 7 on it, but we did not see that as part of the mapping 8 and I think probably got the indication from their exhibit list as well that the system they are intending to run at trial is a T-Mobile G1. 01:42PM 10 11 I'll add, Your Honor, that none of this came up 12 during the meet-and-confer process as well. This sort of idea that, "Oh, we're just using it as another 13 example of the same Android read," that's news to me as 14 of when Mr. Robb just stood up now. 15 01:43PM 16 THE COURT: All right. What's wrong with their 17 position? 18 MR. DAVIS: So I think, Your Honor, it's simply 19 that my understanding is they need to show a prior 20 art -- if they want to run system prior art, they need 01:43PM 21 to choose a system, show that it was available, and then map it to the claims. I believe they have attempted to 22 23 do that with the T-Mobile G1. They produced evidence 24 that they believe shows that it was publicly available 25 and sold. I don't know that they have established all 01:43PM

```
of that, and I don't think Mr. Robb tried to say that he
      1
         has with respect to the T-Mobile myTouch 3G Slide.
      2
       3
                   THE COURT:
                               These are not documents that are
         filed in the record, at least customarily, so I don't
      4
         have access to them. Do you want to show me where you
      5
01:44PM
         think this should have been and it's not?
      6
       7
                   MR. DAVIS:
                               I can try to do that, Your Honor.
      8
                   THE COURT:
                               Well, I don't see how else I'm
      9
         going to resolve this dispute.
                               So, Your Honor, I apologize.
      10
01:44PM
                   MR. DAVIS:
                                                              I mav
      11
         not be able to provide exactly what you're looking for.
      12
         I know their invalidity report mentions the G1 114
                  It mentions the myTouch 3G Slide five times in
      13
         times.
         sort of incidental introductory paragraphs, just saying
      14
         that there are prior art cellular phones.
      15
01:45PM
      16
                   They talk about a Samsung phone, an HTC Nexus
      17
         One phone. But in the actual stepping through claim
      18
         mapping, they talk about the T-Mobile G1 throughout
      19
         their report many, many times and so that I think is
      20
         what gave us the impression.
01:45PM
      21
                   I mean, for example, Your Honor, I'm reading
      22
         directly from Claim 1 is rendered obvious by the
         T-Mobile G1 running Android 1.6. For the reasons set
      23
      24
         forth below, it is my opinion that Claim 1 of the '541
      25
         patent is invalid as being at least rendered obvious by
01:45PM
```

```
the T-Mobile G1 running Android 1.6.
      1
                   That sounds very different from what Mr. Rob
      2
       3
         was just saying. I would expect the expert report to
         read, if that were the theory, it would say something
       4
                     It's my opinion that Claim 1 is rendered
         more like:
      5
01:46PM
         obvious by any number of prior art phones running
      6
      7
         Android 1.6.
                        Instead, they specifically call out the
      8
         T-Mobile G1.
                        That's why we think that the myTouch is
         unelected, because they don't have a claim mapping for
      10
01:46PM
         it.
      11
                   THE COURT: All right. Thank you, Mr. Davis.
      12
                   Mr. Vincent, would you show me where you have
         identified the HTC myTouch 3G, the one that's described
      13
      14
         in this exhibit, please?
      15
                   MR. VINCENT: Yes, sir. It is on our 282
01:46PM
      16
                     It is listed specifically, and --
         statement.
      17
                   THE COURT:
                               Can you show me that?
      18
                   MR. VINCENT: Yes, Your Honor.
      19
                   If I could have the ELMO, please.
     20
                   This is our 282 statement -- well, here you
01:47PM
      21
         have both the G1 and the myTouch, if it will stay on
      22
                        Both of those devices are listed, along
         long enough.
         with the relevant Android prior art -- sorry, the prior
      23
      24
         art code versions. Again, that is the basis of
      25
         Dr. Jeffay's opinions is that it's -- there's nothing
01:47PM
```

```
device-specific about the theory. It is the device
      1
         running Android 1.6, which he explains.
      2
       3
                   They have not moved to strike -- they have not
         moved to strike those opinions, nor is there any
       4
         indication by any expert that the description of the
      5
01:47PM
         accused -- of the prior art feature in this user guide
      6
      7
         that's the issue of this discussion is inaccurately
      8
         describing how the feature worked in the prior art.
      9
                   THE COURT:
                               All right. I do see that listed in
01:48PM
      10
         what's in the record as Document 285 on page -- let me
      11
         see.
      12
                   MR. VINCENT:
                                 I have page 4. I don't have the
         docket number on this copy that I have, but it's on
      13
      14
         page 4 of my version.
                   THE COURT: All right. Well, I see it there as
      15
01:48PM
         the T-Mobile myTouch 3G Slide manual?
      16
      17
                   MR. VINCENT: Yes, Your Honor.
      18
                   THE COURT: All right. Thank you.
      19
                   MR. VINCENT: Thank Your Honor.
      20
                   THE COURT:
                               Mr. Davis, is your complaint just
01:48PM
      21
         that you don't think it was adequately charted in the
      22
         expert report?
                   MR. VINCENT: Yes, Your Honor. I mean, I think
      23
      24
         that is right. That they don't even have Rule 26
      25
         support for a mapping with the myTouch 3G Slide.
01:49PM
```

```
1
                   We can look at -- maybe the easiest thing to
      2
         look at, I was reading an example in the claim mapping.
       3
         Maybe the easiest thing to look at would be the table of
         contents. I can show you on the ELMO, just briefly.
       4
       5
                   So you can see there is mapping of the
01:49PM
         T-Mobile G1.
                        There are sections dedicated to the
      6
      7
         T-Mobile G1.
                        The myTouch slide is not mentioned in
      8
         those mappings of the G1. It's a different system.
      9
                   THE COURT: I think they have adequately
         disclosed it as prior art and, therefore, I will
      10
01:49PM
      11
         overrule the objection to its admission.
      12
                   We can go to bucket 5, which is DX1.
                   MR. DAVIS: Yes, Your Honor.
      13
      14
                   So this one, bucket 5 we've titled
         unauthenticated and hearsay prior art documents.
      15
01:50PM
      16
         kind of gives you the basis for our objection.
         representative exhibit here, all of this has to do with
      17
      18
         a prior art system called JuiceDefender, and
      19
         JuiceDefender is a third-party software product.
         used in some of Defendants' obviousness combinations.
      20
01:50PM
      21
         The documents are unauthenticated/hearsay.
                                                       There's no
      22
         testimony, no leaking information to overcome those
      23
         objections.
      24
                   This is -- what you see on the screen, Your
     25
         Honor, on Slide 15 is an exemplary excerpt of one of
01:51PM
```

It's a Lifehacker website that says: 1 these. 2 JuiceDefender saves batteries by automating Android 3 data. 4 This is clear hearsay, and we would submit much more so objectionable hearsay than something from an OEM 5 01:51PM JuiceDefender is not something that's produced 6 7 by anyone related to this case. There's no deposition 8 to support it, et cetera. 9 THE COURT: All right. MR. VINCENT: Your Honor, I guess we were 01:52PM 10 11 surprised to hear this objection given that these 12 exhibits were originally on the filed joint list and didn't realize there was an issue to be had here. 13 14 These JuiceDefender articles, at least the vast majority of them subject to this objection, were at 15 01:52PM 16 issue in the Samsung litigation. Samsung had a 17 declaration from the archive custodian explaining, 18 authenticating at least the versions on the Internet 19 archive, showing how that's done and authenticating 20 them. 01:52PM 21 They were admitted in the Samsung litigation, 22

They were admitted in the Samsung litigation,
and we were under the impression that we had an
agreement that they would be -- that we didn't need to
declaration to admit them here.

01:52PM

We can do so. It seems to me that's -- seems 1 2 unnecessary busywork to get, again, identical or nearly 3 identical declaration to show that these articles were, in fact, on the Web at the time, before the priority 4 I mean, that's essentially, I understand, what 5 01:52PM the objection is. 6 7 So, again, Plaintiff is continually giving, and 8 today handed Your Honor a declaration from a third party authenticating documents. If that's what Your Honor 01:53PM 10 rules is necessary, we can do that. We can again get an 11 identical declaration from Mr. Wright, or near-identical 12 as what was produced in Samsung, if that's what Your Honor rules. But, again, I think the issue is simply we 13 were under the impression we had an agreement here. 14 Obviously we don't. If we need to authenticate them, we 15 01:53PM 16 can do that, but again, I think that's what the issue is 17 here. 18 THE COURT: You know, it's not just my rule, 19 Mr. Vincent. It's the Federal Rules of Evidence. 20 MR. VINCENT: Understood, Your Honor. 01:53PM 21 THE COURT: Okav. Well --The issue is, again, it was our 22 MR. VINCENT: understanding that these materials were produced and 23 24 made available in not just Samsung, and we disclosed the 25 JuiceDefender as part of our prior art disclosures 01:53PM

01:54PM

01:54PM

01:54PM

01:55PM

01:55PM

throughout the case. And, again, like, we were under 1 2 the understanding that there was an agreement that we 3 would have to go through the hoops to do this. have the declaration here from the Samsung case that 4 applies to some of these very articles we're talking 5 about, and to the extent we need to do that for any 6 7 remaining stragglers, we can do that as well. 8 THE COURT: Do you have anything in writing about the agreement you're referring to? 10 MR. VINCENT: That I'm not aware of, Your 11 I wasn't part of those negotiations. It was on 12 the joint list that we filed with the court as an agreed 13 exhibit. So obviously it got on the joint list that was filed in this case. These exhibits were on that list. 14 So I think at least we have that evidence to at least 15 show that we understood there was an agreement there for 16 these exhibits. 17 18 Now, again, there was miscommunication, 19 whatever the disconnect was, but that's where we have a 20 disconnect is that we thought there was an agreement 21 here. It was on the agreed list that was filed with the Court, I think it was just last week that they said, no, 22 23 we actually don't have an agreement on these. 24 the fact that, again, these were the subject of -- this 25 evidence was admitted -- at least large portions of

1 these websites were admitted in the Samsung case. 2 THE COURT: All right. Thank you, Mr. Vincent. 3 MR. DAVIS: Your Honor, if I may, I can address 4 that supposed agreement. 5 THE COURT: All right. 01:55PM Okay. So we received Defendants' 6 MR. DAVIS: 7 exhibit list. We objected. Seven different grounds for 8 objections for these JuiceDefender materials. May 7th objections, for example. What happened after that, Your Honor, and we 01:55PM 10 11 appreciated them doing this, but the folks from the 12 T-Mobile/Verizon team sent us a draft of what they 13 deemed a potential joint exhibit list. What they said 14 in their email was this proposed joint exhibit list includes the materials that both sides have on their 15 01:56PM respective lists and also materials that either side did 16 not object to. 17 18 In addition -- as it turns out, that was not 19 In addition, the Verizon/T-Mobile team added 20 another handful of documents, including this Exhibit 1. 01:56PM 21 They added some additional documents that apparently 22 they were proposing as joint exhibits, but those had 23 objections associated with them. We never waived any 24 objections. 25 We didn't discover that discrepancy between 01:56PM

```
what they described the proposed joint list being and
      1
      2
         what it actually was until a little bit later. We, of
      3
         course, pointed that out to them and said: Consistent
         with our prior objections, we're not waiving our
      4
         objections. What you said in your email was this list
01:56PM
      5
         was only supposed to include things we did not object
      6
      7
         to.
      8
                  So that's the disconnect. There's no
      9
         agreement, Your Honor. It was just a miscommunication.
01:57PM
      10
         You know, maybe we should have checked more closely with
      11
         what they had put on this proposed joint list, instead
      12
         of taking at face value their description of how it was
      13
         created. And so once we discovered that, we told them,
         cleared it up and said, no, these are still objected to,
      14
         for the same reasons we've objected to them all along.
01:57PM
      15
      16
                               All right. The documents need
                  THE COURT:
      17
         authentication. That's what is missing. And they would
      18
         be nonhearsay if they are authenticated because they are
      19
         not being offered for the truth; they are being offered
     20
         to show that they existed before the priority date.
01:57PM
      21
         Isn't that the case?
      22
                  MR. DAVIS: Not exactly, Your Honor. I think
         some of them may be being used -- and maybe Mr. Rob can
      23
      24
         speak to it.
                       Some of them are being used to convey
      25
         something about timing of JuiceDefender, but I believe
01:58PM
```

they are also relying upon these materials for the 1 substance of JuiceDefender. 2 3 In other words, there is no additional -- this exhibit is the sum total of everything they have on 4 5 JuiceDefender. They don't have, for example, another 01:58PM exhibit that is the software itself or some user guide 6 7 or something like that that's outside of this bucket. 8 THE COURT: Well, in any event, they will require a declaration to satisfy that. At this point 01:58PM 10 I'm going to sustain the objection to the documents in 11 bucket 5, but if they produce a declaration, I'll 12 consider that, if and when. 13 Let's go to the next bucket. 14 So the next bucket, Your Honor, I MR. DAVIS: alluded to a little bit earlier. This is bucket 6, the 15 01:59PM T-Mobile G1 images and physical exhibit, and there's 16 actually two more exhibits under here which are Android 17 18 source code. 19 To be clear, we are not disputing that Android 20 source code obtained from Google Android is -- Google 01:59PM 21 Android is a legitimate source for Android source code. 22 We agree with that. The problem is none of this is all 23 linked together. 24 What they have are some screenshots. This is 25 DTX108 in the Verizon case. These are screenshots that 02:00PM

```
132
```

```
were -- or photos that were taken by Samsung's counsel
      1
      2
         in the 422 case a long time ago of a particular
       3
         T-Mobile G1 device that they had.
       4
                   No expert, no person, as far as I know,
         associated with the Defendants has ever handled the
      5
02:00PM
         physical device. They had no role in the screenshots.
      6
      7
         They don't know what that physical device was.
      8
                   They have a different T-Mobile G1, same model
         but not the same physical exhibit, on their exhibit
02:00PM
      10
                That's not what appears in the photographs.
      11
         There's also no evidence linking the Android source code
      12
         that they point to to these devices.
                   In other words, they have a physical Android G1
      13
      14
         device on their exhibit list, but they can't show, you
         know, by virtue of going to the settings or something
      15
02:01PM
         like that, here's the version of Android that this
      16
      17
         device is running. So they are just sort of pulling
      18
         these disparate sources of information and saying they
      19
         are all one consistent system. That's essentially the
     20
         objection there, Your Honor.
02:01PM
      21
                   THE COURT: All right.
      22
                   MR. VINCENT: And just so the record's clear,
         it's Mr. Vincent that's arguing on behalf of Defendants.
      23
      24
                   MR. DAVIS:
                               Oh, I'm sorry.
      25
                   MR. VINCENT: I'm Rob Vincent, so we sometimes
02:01PM
```

```
1
         get mixed up.
                         That's perfectly fine.
                   So let me clear another thing up. I think
      2
         Mr. Davis said there's no one from Defendants who can
      3
      4
         link these together. That's not true.
                                                   Ms. Hannah
         Sifuentes was a witness. She has now testified in three
      5
02:02PM
         separate legal proceedings on these exact screenshots
      6
      7
         that are the representative exhibit in this case.
      8
                   She testified in her Samsung deposition.
                                                              She
      9
         handled the phone at issue in these screenshots and said
02:02PM
      10
         and testified that, from her personal experience, she
      11
         knows what the phone is, knows what the accused --
      12
         sorry, the accused -- the prior art features look like,
         and she walked through all those and authenticated them
      13
      14
         and provided testimony about these screenshots.
      15
                   She testified about these screenshots in the
02:02PM
      16
         Samsung trial, and she testified about these exact same
         screenshots that I'm holding in my hand in her
      17
      18
         deposition in this case. She said under oath:
      19
         what these are; I know where they came from; I am
     20
         familiar based on my experience with this Android
02:02PM
      21
         system, this Android prior art system.
      22
                   That's the testimony. And she's prepared to
      23
         say those things -- just as she said in the Samsung
      24
         case, she's prepared to say those exact same things at
```

25

02:03PM

this trial.

1 I believe the -- if I understand the objection 2 is because there is, on our physical exhibit list, a 3 different physical unit. Again, our prior art invalidity theory is not that a -- my specific phone 4 renders obvious the claims. It is this model of phone, 5 02:03PM or the model of phones running Android 1.6 renders 6 7 obvious the claims. And we have evidence from several 8 witnesses. Ms. Sifuentes, our experts. We have Google witnesses that testified about Android 1.6 and 10 authenticated that. 02:03PM 11 And the linkage is there, Your Honor, to link 12 phones that were sold, including the G1, including the myTouch with Android 1.6, and we have the source code of 13 14 Android 1.6 to describe exactly how it worked. the screenshots from the phone to show how it worked. 15 02:04PM 16 So all of these are linked through several witnesses. 17 THE COURT: All right. Thank you, Mr. Vincent. 18 MR. DAVIS: Your Honor, another thing I would 19 add on this is that Ms. Sifuentes is a T-Mobile She indeed testified in the Samsung case and 20 employee. 02:04PM 21 testified in the T-Mobile case. She's not testified in a Verizon case. I don't know if -- what Mr. Vincent's 22 referring to exactly that Ms. Sifuentes is -- her 23 24 testimony is applicable to the Verizon case. So maybe 25 there's different treatment that this requires here, but 02:04PM

1 I'm very familiar with Ms. Sifuentes. 2 What happened was that Samsung's counsel took 3 these screenshots, showed her screenshots. recalled, having been at T-Mobile for quite some time, 4 that ten years prior, she had used a T-Mobile G1 device 5 02:05PM and that the screenshots were generally consistent with 6 7 her recollection. She handled the physical device that 8 Samsung's counsel had, had brought to the deposition, and I'm not aware of -- I can be corrected on it certainly, but I'm not aware of Ms. Sifuentes testifying 02:05PM 10 11 in a Verizon case, though. 12 MR. VINCENT: I can pull that up, Your Honor, if I could. 13 14 THE COURT: All right. MR. VINCENT: Verizon issued a notice of 15 02:05PM subpoena to Ms. Sifuentes. In this case she was 16 deposed, and she was asked questions on behalf of 17 18 Verizon on this exact issue. This was an exhibit to her 19 deposition noticed by Verizon in which these were 20 discussed. 02:05PM 21 So she was noticed by Headwater in the T-Mobile 22 case, and simultaneously with that deposition, she was also noticed by Verizon, also AT&T, but she was noticed 23 24 by other parties, not just T-Mobile. So she testified

in all the carrier cases, and part of that testimony

25

02:06PM

```
136
```

relates exactly to these screenshots and other exhibits. 1 2 THE COURT: All right. I'll overrule the 3 objections to bucket 6, and that takes us to bucket 8. 4 MR. HOFFMAN: Your Honor, bucket 8 only relates to T-Mobile and the likely earlier bucket involving only 5 02:06PM T-Mobile. It's closely related to a motion in limine 6 7 for T-Mobile that's to be argued, so we would argue that 8 we should address the motion in limine first. THE COURT: All right. That leaves us with 02:06PM 10 bucket 9. 11 MR. DAVIS: Bucket 9, Your Honor, is specific 12 to the Verizon case. It's only one exhibit, DTX96. This is a Verizon patent that what Verizon says it's 13 relevant to supporting apportionment arguments, I 14 15 The problem we see is that this is going to be 02:07PM 16 confusing to the jury. This is a -- it's a Verizon patent that refers 17 18 to PCO values, and the problem here, Your Honor, is that 19 the -- it's a -- Headwater's infringement read for the 20 '042 patent, which I understand your Honor has ruled on 02:08PM 21 but also for at least one dependent claim of surviving 22 patents makes reference to PCO values. And so the confusion here, I think, Your Honor, 23 24 is that a juror may be misled into thinking that, well, 25 Verizon has this patent that talks about PCO and that's 02:08PM

accused; so, therefore, the patent office giving them a 1 2 patent discussing that must mean they have an ability to 3 practice that and not infringe Headwater's patent. 4 So that, I think, is the confusion. THE COURT: This is not a patent that Verizon's 5 02:08PM relying on for invalidity? 6 7 MR. DAVIS: No. Your Honor. 8 THE COURT: All right. Thank you, Mr. Davis. Your Honor, the patent at issue is 9 MR. ROBB: 02:09PM 10 primarily related to the '042 disputes, which are 11 largely resolved by Your Honor's ruling. We can address 12 that issue in more detail. The one lingering issue to the extent, assuming 13 14 Your Honor's ruling on the '042 sticks, is that they are -- there's an issue that I believe one of my 15 02:09PM colleagues will discuss relating to allegations about 16 Thomas Russell and the connection between what Verizon 17 18 was doing with its own internal development, vis-a-vis 19 the asserted patents and the device-side technologies. 20 THE COURT: Well, if you're arguing that it has 02:09PM 21 some relevance, that's fine. But the problem is under 22 Rule 403, I just don't believe that it's improper to admit exhibits patents that look confusingly similar to 23 24 the patents that you are relying on for invalidity. 25 so you can have your expert talk about it, but it will 02:10PM

```
not be admitted as an exhibit.
      1
                   MR. ROBB: Your Honor, can I just clarify
      2
       3
         something?
                   THE COURT: You can.
       4
                   MR. ROBB: We don't have any prior art that
       5
02:10PM
         looks like the patent at issue in this bucket.
      6
      7
         reason this patent is being proffered as an exhibit is
      8
         it goes to apportionment. There's no dispute that it
         comes after the priority date. Their expert essentially
         compared the value of the accused feature and attributed
02:10PM
      10
      11
         all of that to the asserted patent.
      12
                   THE COURT: You don't have patents that you are
         relying on as prior art for invalidity?
      13
      14
                              Specific to the PCO technologies
                   MR. ROBB:
      15
02:11PM
         that --
      16
                               I'm just talking about patents.
                   THE COURT:
                   MR. ROBB: Your Honor, I'm actually somewhat
      17
      18
         embarrassed.
                       I'm the member of my team who knows the
      19
         least about our device side.
      20
                   Yes, we do.
02:11PM
      21
                   THE COURT: I saw a bunch of them on the
      22
         listing there.
                          That's the problem. If this patent is
         allowed to come in as an exhibit and the jury remembers,
      23
      24
         well, the Plaintiffs didn't say anything about why that
      25
         patent doesn't invalidate, it must invalidate.
02:11PM
```

And so the Plaintiff's left in the position of 1 2 either spending the time to point out what's missing 3 from that or explain it and hope the jury remembers that that's not being offered for invalidity, or just taking 4 5 the risk. And, frankly, it has very little probative 02:11PM value that, as an exhibit, I mean, your expert can 6 7 certainly talk about what he sees in it that he's 8 relying on. But that's the basis for the Court's policy of not having unelected patents be admitted as exhibits. 10 Yes, Your Honor. 02:12PM MR. ROBB: Thank you. 11 THE COURT: I'll sustain the objection to DX96. 12 There are a couple of exhibits that All right. we have not addressed, but what I want to make sure we 13 14 do is to get final exhibit lists that address all the exhibits that have either been agreed as admissible or 02:12PM 15 have been ruled to be admissible. 16 17 And one thing I want to point out is I think 18 it's important that you keep the same exhibit numbers 19 that we've been using, even though there's large gaps in 20 them. The record's impossible to follow if you change 02:13PM 21 up the exhibit numbers after this hearing. So what I'll do is ask counsel to review their 22 23 lists and submit to each other by, say, Tuesday of next 24 week what each side believes to be their own final 25 exhibit list of preadmitted exhibits and then confer 02:13PM

about them if you have any disputes and file them into 1 2 the record as final exhibit lists by Friday of next week 3 and then we'll try and give you a date. 4 And I know we've got more to go today, but before we leave here, we'll try and give you a date 5 02:14PM where we'll take up any disputes that the parties cannot 6 7 agree on the way we've handled them and take up any 8 redactions that the parties may disagree about. 9 Is there any clarification of that that either 10 side needs? 02:14PM 11 MS. FAIR: Not from the Plaintiff, Your Honor. 12 MR. DACUS: Not from us, either, Your Honor. 13 THE COURT: All right. Then let me see. What 14 else do we need to take up in the Verizon matter before we go back to T-Mobile matter? 15 02:14PM 16 There was an objection that was talked about at last week's pretrial conference concerning certain 17 18 Verizon witnesses. I think they were largely deposition 19 issues. Have those been resolved by the Plaintiff? 20 MR. DACUS: Are these the first-day designation 02:15PM 21 issues, Your Honor, or something different? THE COURT: I recall that when we were going 22 over the agenda, the Plaintiff indicated that they had 23 24 objections that they wanted the Court to take up. 25 use of deposition testimony of Verizon witnesses, and it 02:15PM

```
Case 2:23-cv-00379-JRG-RSP
                           Document 317-1
                                         Filed 06/26/25 Page 142 of 238
                                                                   141
                            PageID #: 24752
       1
         sounds like that's no longer a major thing.
                   MR. HOFFMAN: Your Honor, I think the issue was
       2
       3
         there were several witnesses, and unfortunately I don't
          remember who they were, but they were late disclosed and
       4
          that was our objection. And Defendants responded that
       5
02:16PM
          they probably were all appearing by deposition, I
       6
       7
          believe, and that would resolve the issue of the
       8
          specific objection there.
       9
                   And I don't know if that, in fact, ultimately
02:16PM
      10
         was the case.
                         We can look back at the transcript and
      11
          find the list, and if we can confirm that they are
      12
         appearing -- not appearing live, I think that resolves
          the issue.
      13
      14
                   THE COURT:
                                I take it then that at the moment,
         there's no issue there for me to take up?
      15
02:16PM
      16
                   MR. HOFFMAN:
                                  I think we need to clarify it,
         yes, Your Honor, before we could. There may -- it may
      17
      18
         have been resolved.
      19
                   THE COURT: All right.
      20
                   While you're up there, Mr. Hoffman, are there
02:16PM
```

While you're up there, Mr. Hoffman, are there any depositions with objections that you intend to offer as evidence on the first day?

MR. HOFFMAN: There are, Your Honor.

THE COURT: Which ones?

21

22

23

24

25

02:17PM

MR. DAVIS: Yes, Your Honor. We have

```
1
         identified some first-day deposition designations.
                                                                The
         parties have conferred and managed to narrow that a bit.
      2
       3
         Headwater identified eight potential witnesses as
         first-day deposition plays. For two of those witnesses
       4
         so far, the parties have agreed to drop one another's
02:17PM
      5
         objections to their respective designations.
      6
      7
         witnesses are Mr. Chan of third-party Apple and
      8
         Mr. Venkatraman of third-party Apple. We do have
      9
         some --
                   THE COURT: What was the second Apple witness's
02:18PM
      10
      11
         name?
      12
                   MR. DAVIS:
                               Oh, yes.
                                          It's Venkatraman,
         V-e-n-k-a-t-r-a-m-a-n.
      13
      14
                               All right. And you're saying those
                   THE COURT:
02:18PM
      15
         two are now without objections?
      16
                   MR. DAVIS:
                               That's right, Your Honor.
      17
                   THE COURT:
                               And you said there are eight?
      18
                   MR. DAVIS:
                               There were eight total identified,
      19
         that's right. So I'll show on screen a little bit how
      20
         we --
02:18PM
      21
                   THE COURT: You're going to start your trial
      22
         with eight depositions?
      23
                               I know.
                   MR. DAVIS:
                                        It's -- I think as
      24
         Mr. Fenster alluded to, this is a bit of a challenging
      25
         cases in that there are party witnesses and third-party
02:18PM
```

OEM witnesses that make it a real challenge, but certainly take a point that the odds of us actually being able to play eight is highly low -- is very, very low. So there's another witness, Mr. Russell. There's an outstanding MIL, no longer an outstanding MSJ, but we do think that could impact the designations as well. So it probably makes sense to not go line by line through Mr. Russell's designations. There's another witness, a Verizon witness, Mr. Umamaheswaran. The parties -- Headwater provided some designations and asked for Verizon to provide narrowed counterdesignations. Both parties have designated quite a lot of his testimony. We haven't yet received the narrowed counterdesignations, I don't believe, but we think it makes sense to talk about the other four witnesses at least at this point. And the parties have done, I think, a good job of narrowing to a small number of objections that you'll see here on Slide 19. If it would be helpful to Your Honor, we have a

binder for you that has the deposition transcripts, if you'd like to page through as we go.

THE COURT: All right.

MR. DAVIS: And I believe, Your Honor, the tabs

```
should be in order of how we'll discuss these witnesses,
      1
      2
         beginning with the Sharkey trial testimony.
       3
                   So for context, Your Honor, Mr. Sharkey
         testified in the 422 case. Headwater's remaining
      4
         objections are targeted at two particular issues.
      5
02:21PM
                   The first issue, Your Honor, is that
      6
      7
         Mr. Sharkey had some particular testimony about plain
      8
         language that was at issue in the 422 case but is not at
         issue here and so this goes along the lines of
         Headwater's MIL 3 that you ruled upon.
02:21PM
      10
                                                   It's essentially
      11
         the same issue.
      12
                   If we -- in the 422 case, the relevant claim
         language recited interacting in the device display
      13
      14
         foreground, and here the relevant claim language is
         interacting with the user in a user interface
      15
02:21PM
      16
         foreground.
                       There's no display cited, and notably
      17
         Samsung's noninfringement argument at trial was tied to
      18
         that display limitation.
      19
                   So what we see in -- at 496:25, as a first
     20
         example, Your Honor -- I'll give you a few of them so
02:22PM
      21
         that you can get a sense of this. At Page 496, Line 25,
      22
         we see the quote -- I believe it's in the question --
      23
         "interaction in the display."
      24
                   The same quotation we see on Page 497, Line 6.
     25
         The same quotation we see on Page 498, Line 19.
02:22PM
```

```
1
         Similarly at Page 498, Lines 24 to 25, we see, quote,
         "screen turns off." That's again tied to the display
      2
       3
         limitation in that 422 case.
       4
                   THE COURT: Where is that now?
                   MR. DAVIS:
                               Oh, yes. I'm sorry. That's at
       5
02:23PM
         498, lines 24 to 25.
      6
       7
                   THE COURT:
                               All right.
      8
                   MR. DAVIS: We see at Page 501, Lines 13
         through 14, there is, quote "interacting in the device
      9
         display foreground," and we see that same language at
02:23PM
      10
      11
         Page 501, Lines 22 to 23.
      12
                   And so, you know, I think for the same reasons
         we discussed with respect to MIL 3, we think it's
      13
      14
         improper to have testimony be introduced where it was
         focused especially on the claim language that was at
      15
02:23PM
      16
         issue in the 422 case, that's not at issue here.
      17
                   THE COURT: So the designation that the
      18
         Defendant wants to use regarding, let's start with Pages
      19
         496 and 97. Where -- what portion are they seeking to
     20
         use?
02:24PM
      21
                   MR. DAVIS: They are seeking to use 496 through
      22
         497:8 -- oh, I'm sorry. I think I missed a line number.
      23
         They are seeking to use 496, Line 16 through 497, Line
      24
         8.
      25
                   THE COURT: All right. Let's just focus on
02:24PM
```

```
that, and your argument is that the phrase there
      1
         "interaction in the display" in the questions is a
      2
       3
         reference to a limitation that's not present in the
         asserted claims?
       4
       5
                   MR. DAVIS:
                               That's exactly right, Your Honor.
02:25PM
      6
                   THE COURT: All right. Then let me hear from
      7
         the Defendant on that.
      8
                   MR. DAVIS: If you don't mind, I'll just leave
      9
         this up for reference. I don't know if you mind.
      10
                   MR. VINCENT:
                                 I don't mind.
02:25PM
      11
                   MR. DAVIS: Okav.
      12
                   MR. VINCENT: So, Your Honor, I had a lovely
      13
         printout with a highlight that I cannot seem to locate,
      14
         but what Mr. Sharkey was asked in that testimony and
         explicitly testified -- and if I can get the cite, I
      15
02:25PM
         will provide it to Your Honor -- he was explicitly
      16
                 Are we talking about any patents here?
      17
         asked:
      18
                   He said no. There is no evidence that
      19
         Mr. Sharkey ever saw the patent at issue in the Samsung
      20
                He certainly wasn't asked questions about claim
02:25PM
         case.
      21
         language about that patent. He was opining about the
      22
         functionality of the accused features, the same
      23
         functionality and same accused features that are accused
      24
         in this case. That is what Mr. Sharkey's testimony goes
      25
         to.
02:26PM
```

```
147
```

1 Just because there is overlap in language 2 doesn't mean that it goes to one patent and not another. 3 Like, for example, Headwater is designating testimony from Mr. Sharkey about background, how Android handles 4 background data. It was relevant to that case; it's 5 02:26PM also relevant to this case. It doesn't mean it was 6 7 about a specific patent. It's about the functionality 8 of Android. That's what Mr. Sharkey was testifying about. He explicitly said in his testimony "I'm not talking 10 02:26PM 11 about any patents. I'm talking about the functionality 12 of Android." All of his testimony is about the functionality of Android, not -- he wasn't asked any 13 14 questions about claim language. 15 THE COURT: All right. Thank you, Mr. Vincent. 02:26PM 16 MR. DAVIS: So, Your Honor, I think this is squarely within the ruling on MIL 3. Mr. Vincent 17 18 pointed to --19 THE COURT: Mr. Davis, the intent of the ruling on MIL 3 was that if prior testimony was dealing 20 02:27PM 21 expressly with a limitation that was asserted in that 22 case and is not asserted in this case, then the 23 testimony would not be admissible. How is this 24 testimony talking about a claim limitation? 25 MR. DAVIS: Because this is not a coincidence 02:27PM

that Samsung's counsel used the language "interaction in 1 the display" and "interaction in the device display 2 3 foreground." That is explicitly the language from the 4 '976 patent in the 422 case. That language is not at issue here. 5 02:27PM 6 The reason Samsung was asking the questions 7 with that language was because their noninfringement 8 argument was based on there being no interaction in the 9 display. 10 02:28PM Mr. Sharkey, can -- they can have elicited the 11 self-serving testimony that Mr. Sharkey didn't look at 12 the patent or what have you, but the reason that question was asked with the words "display" in it was 13 14 because that was a claim limitation there and it's not here, unlike what Mr. Vincent said a moment ago where he 15 02:28PM 16 said, "Well, we designated language about background." 17 Well, the difference is, Your Honor, the word 18 "background" was in the claims in that prior case, but it's also in the claims in this case. 19 That's the 20 difference. We don't think it's appropriate for someone 02:28PM 21 who was testifying about claim language that is 22 different from what is here to be admitted. 23 THE COURT: Is your argument that Mr. Sharkey 24 was talking about a particular claim limitation in this

25

02:29PM

testimony?

MR. DAVIS: Yes. 1 2 THE COURT: And do you disagree with the 3 statement that Mr. Vincent made that Mr. Sharkey indicated in his deposition that he was not talking 4 about the claims? 5 02:29PM I do, Your Honor. I don't think it 6 MR. DAVIS: 7 could possibly be a coincidence that there are questions 8 after questions after questions that have "device display foreground," display, display, display in it and that was the claim limitation in that case. 02:29PM 10 11 THE COURT: Well, I'm not really concerned what 12 the motivation of the lawyer's question was. 13 concerned with whether the jury would be getting a 14 misrepresentation of the witness's testimony. 15 So my concern is not what the lawyer asking the 02:29PM 16 question was after but whether the witness was talking 17 only about or expressly about a claim limitation that 18 this jury will never hear about. 19 MR. DAVIS: I understand, Your Honor, yes. 20 to that concern, the issue is if Mr. Sharkey said, no, 02:30PM 21 the Android functionality did not detect interaction in 22 the display, that sounds very similar. There's overlapping language like the word "interact" with the 23 24 claim language at issue here. 25 And so what Defendants are -- what the jury is 02:30PM

```
150
```

```
going to conclude from that potentially, Your Honor, is
      1
         that, well, Mr. Sharkey, he's the authoritative source
      2
       3
         from Google. He said no interacting, and the claim
         limitation here says interacting; therefore, there's no
       4
      5
         interacting.
02:30PM
      6
                   But he didn't say there's no interacting at
      7
         all, and he didn't say there's no interacting in the
         user interface foreground, the actual terminology here.
      8
         He said there's no interacting in the device display
         foreground, which is different.
02:31PM
      10
      11
                   And so that's the confusing part for the jury,
      12
         Your Honor. And unfortunately we don't have any reason
         to believe that Mr. Sharkey will be there at trial live,
      13
      14
         so he can't clear it up during his testimony, either.
                               Well, this is a deposition that
      15
                   THE COURT:
02:31PM
      16
         you're offering.
      17
                   MR. DAVIS: Yes, this was his trial testimony.
      18
         I think both sides have designated from his deposition.
      19
                   THE COURT:
                               I understand that, but you know
         he's not going to be there. You're offering his prior
     20
02:31PM
      21
         testimony.
      22
                   MR. DAVIS:
                               Yes.
                   THE COURT:
                               So how is it that you didn't expect
      23
      24
         to be stuck with his prior testimony?
      25
                   MR. DAVIS:
                               Well, I think, Your Honor, it's
02:31PM
```

1 just the simple fact that much of his prior testimony is 2 relevant to the issues here, but we were very specific 3 in what we identified as our remaining objections. the portions where he's specifically saying "device 4 display foreground" or "display." 5 02:32PM THE COURT: Well, what I'm concerned about and 6 7 what the MIL was going after is an effort to portray his 8 testimony as something it wasn't, and this does not appear to me to be that. He's not being asked about some specific term that's going to be greatly at issue 02:32PM 10 11 to the jury and -- or would be. 12 MR. DAVIS: I think the issue is that it's 13 confusingly similar to a jury, that it's talking about 14 interacting and interacting with the user. And that has some overlap in language with claim terms at issue here. 15 02:33PM 16 Well, isn't it relevant? THE COURT: 17 MR. DAVIS: No, I don't believe so, Your Honor. 18 As just one example, I think there is testimony from 19 various sources that a display is a subset of a user 20 interface. For example, user interface could include a 02:33PM 21 speaker, something like that. 22 And so if Mr. Sharkey is saying there's no interacting in the device display, that does not mean 23 24 that even he believes that there is no interacting in

the device user interface foreground because that could

25

02:33PM

```
1
         be broader.
                   THE COURT: Yeah. I understand that, but it's
      2
       3
         not -- it doesn't make it irrelevant. It's less likely
         that there's interaction in the device display
       4
         foreground if there's no interaction in the device
      5
02:34PM
         display.
      6
      7
                   MR. DAVIS:
                               I see your point is if it's a
      8
         subset, then that is one possibility within the subset
         and so, therefore, it's relevant. I think the problem
         is it's unfairly prejudicial and that outweighs the
02:34PM
      10
      11
         potential relevance that it might have.
                                                    Because the
      12
         jury may draw these improper conclusions that he was
      13
         actually testifying about the claim language at issue
      14
         here because it is similar in some respects.
                   The jury is not going to be told, "Well,
      15
02:34PM
         Mr. Sharkey, just for context, he was testifying in
      16
      17
         another lawsuit that involved a different patent." And
      18
         so they would assume he's testifying about the subject
      19
         matter of this case.
      20
                   THE COURT: I'd be more sympathetic to your
02:34PM
      21
         objection if you were not the one calling the witness.
      22
                   MR. DAVIS:
                               We're not the only one calling the
      23
         witness, and these are not -- Mr. Sharkey is their prior
         art witness as well, Your Honor. So I assume that
      24
      25
         Defendants are not going to sit here today and say that
02:35PM
```

```
153
      1
         they would agree not to call Mr. Sharkey.
                   THE COURT: You took his deposition also?
      2
       3
                   MR. DAVIS: We did, Your Honor. Yes, there's
         questioning from -- in the Sharkey deposition, there's
       4
      5
         questioning from Samsung's lawyers and Headwater's
02:35PM
      6
         lawyers.
       7
                   THE COURT: So I assume in that deposition, the
      8
         parties only addressed the relevant claim terms?
      9
                   MR. DAVIS:
                               Yes.
                                     Yes, I think that's right,
                       I don't know if you had something in mind
02:35PM
      10
         Your Honor.
      11
         beyond the relevant claims, but --
      12
                   THE COURT:
                               My question is why are you using
         the trial testimony if it didn't deal with the relevant
      13
      14
         features?
      15
                   MR. DAVIS:
                               0h.
                                    Well, because Mr. Sharkey's
02:36PM
         testimony was not solely about things like interacting
      16
         in the display. He testified about other aspects as
      17
      18
         well, including subject matter that overlaps with what's
      19
         at issue here. As just one example, Your Honor,
      20
         something like blocking, that was at issue in both
02:36PM
      21
         cases.
      22
                   THE COURT: Well, let me hear from Mr. Vincent
         as to what the relevance of the answer to this question
      23
      24
         is that we're talking about here that asks whether there
```

is user interaction in the display. How is that

25

02:36PM

```
1
         relevant to the issues in this case?
                   MR. VINCENT: Your Honor, the specific
      2
       3
         question, if I understand, how the specific question and
         answer, the question to Mr. Sharkey about the
       4
         functionality of Android and interaction in the device
      5
02:37PM
         display foreground?
      6
       7
                   THE COURT: Well, the two questions that I'm
      8
         looking at, both ask about whether there's user
      9
         interaction in the display.
      10
                   MR. VINCENT: Your Honor, that's directly
02:37PM
      11
         relevant to our -- one of our fundamental
      12
         noninfringement defenses that we have moved for summary
         judgment on. Counsel wants to parse whether a user
      13
      14
         interface is a broader term than "display."
      15
                   Our experts have been -- have testified that in
02:37PM
      16
         the context of these patents, that is the display.
      17
         Mr. Sharkey, though, was not testifying about any claim
      18
         terms, and I have that testimony finally.
      19
                   If I could have the ELMO, please.
      20
                   This is at the -- at the top, this is his trial
02:38PM
      21
         testimony.
                     Line 2: "You have not been asked to look at
      22
         the patent or compare the patent -- the claim to either
         the accused products or the prior art.
      23
                                                   Correct?"
                   "I have not been asked to do that."
      24
      25
                   "And you have rendered no opinions and have no
02:38PM
```

1 opinions as -- on those subjects. Correct?" "That's correct." 2 3 Mr. Sharkey -- Headwater's counsel said the jury might think that Mr. Sharkey's talking about the 4 functionality of the accused feature. That's exactly 5 02:38PM what he's talking about. If they want to cross our 6 7 expert and say that, "Well, you know, he said 'device' 8 and that's not 'user interface,'" they can do that. But Mr. Sharkey wasn't opining about any claim 9 02:38PM 10 term of any patent. He was giving testimony about the 11 functionality of the accused features, the exact same 12 accused features as are present here, and he was using -- he was on this very issue. 13 14 There is a limitation in the '613 patent whether there is interaction with the user and the user 15 02:39PM interface, device user interface foreground. That is --16 his testimony is directly relevant to that point. 17 18 Whether it's dispositive, whether it is 19 conclusive, it is definitely probative of that issue, of 20 the functionality and how these accused features 02:39PM 21 operate. 22 And Headwater can cross our experts. They can explain why they don't think that matters. 23 24 definitely relevant. And as Your Honor put it, it 25 definitely makes it more probative, more likely than not 02:39PM

```
that -- and the Android features do not interact with
      1
         the user in the user interface foreground.
      2
       3
                   THE COURT:
                               All right. Thank you, Mr. Vincent.
       4
                   Mr. Davis, I agree with Mr. Vincent in this
                 I know what the intent of MIL 3 was, and this is
      5
         case.
02:39PM
                   If you have other examples, feel free to go
      6
         not it.
      7
         there.
      8
                   MR. DAVIS:
                               So no further examples on this
         point, Your Honor.
                              I think as I started, I mentioned
      10
02:40PM
         that we have two issues with respect to the Sharkey
      11
         trial designations.
      12
                   THE COURT:
                               All right.
                               Separately, we have an objection
      13
                   MR. DAVIS:
      14
         that we wanted to preserve for the record to the
         designations, any designations from 507:20 through
      15
02:40PM
      16
         510:18, 520:12 through 19, or 525:1 through 12.
      17
                   The objection there is a different issue,
      18
         specifically that Mr. Sharkey was testifying about the
      19
         operation of certain first-party Google applications
      20
         like Gmail, and he had no personal knowledge to support
02:40PM
      21
         that testimony.
      22
                   This issue, Your Honor, was something that was
         discussed extensively with you in the 422 case, so I
      23
      24
         think we understand your view on that and so I'm just
      25
         preserving that objection for the record. We understand
02:41PM
```

```
157
```

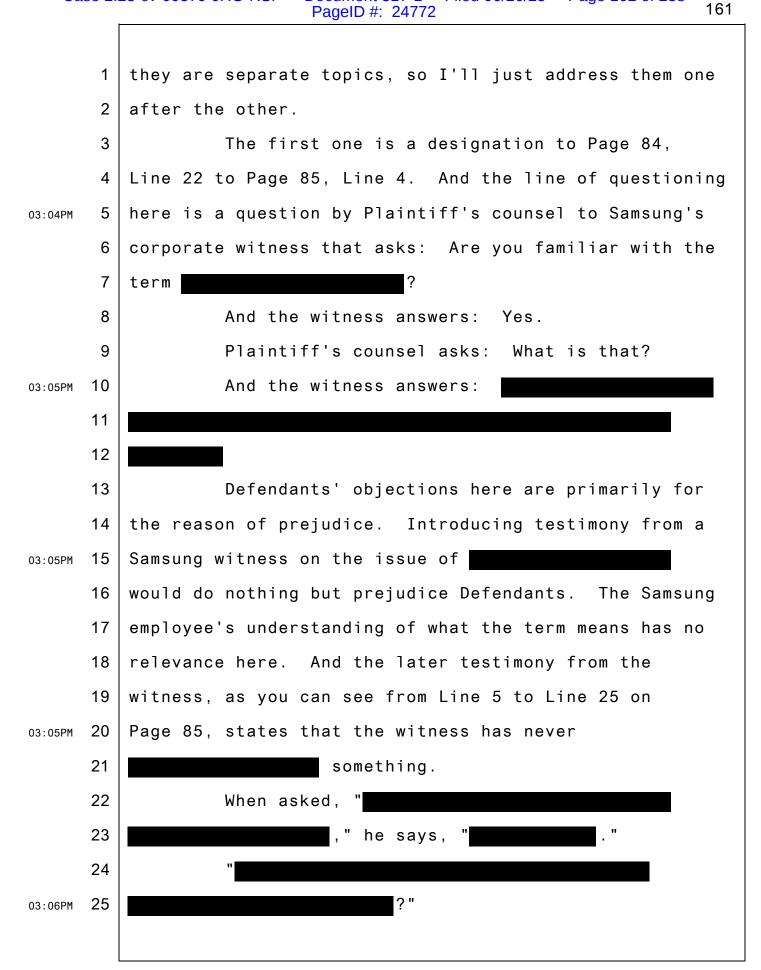

```
1
         the ruling there, and I think it is applicable here as
      2
         well.
       3
                   THE COURT:
                               I remember it like it was
         vesterday.
       4
       5
                   MR. DAVIS:
                               Better than me, I'm sure you do,
02:41PM
         actually.
      6
      7
                   And so with that, I think that addresses the
      8
         issues with the Sharkey trial testimony. The Sharkey
      9
         deposition testimony, this one's a little bit different.
         These ones are actually Defendants' objections to our
02:41PM
      10
      11
         designations, I believe. So I should probably yield the
      12
         floor.
                   THE COURT: All right.
      13
                   MR. SIM: Good afternoon, Your Honor.
      14
         Sim for the Defendants.
      15
02:42PM
      16
                   This should be relatively straightforward.
                                                                So
         for Mr. Sharkey's deposition designations, the parties
      17
      18
         have gotten together and dropped almost all of the
      19
         objections mutually. This is the only one that remains.
     20
         It is three sections of testimony. I'm happy to read
02:42PM
      21
         them in the record if you would like. They are all
      22
         directed to a brief line of questioning where
         Mr. Sharkey was asked about a patent on which he is an
      23
      24
         inventor.
                     That patent is not asserted in this case.
                                                                  Ιt
     25
         is not and cannot be prior art to the two remaining
02:42PM
```

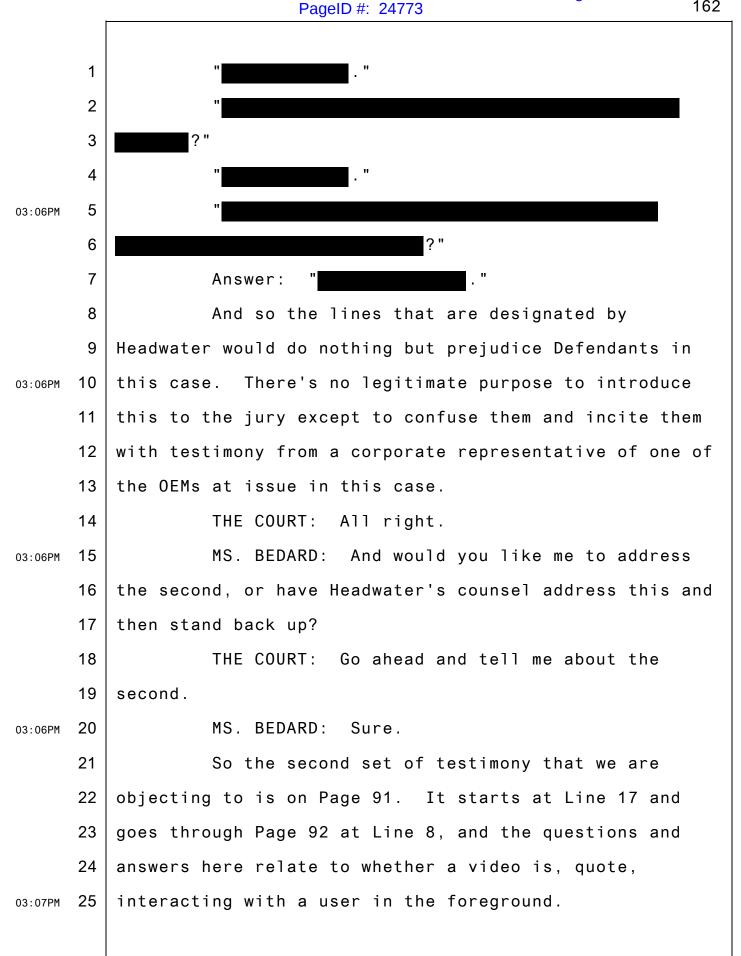

```
158
```

```
patents in this case, and as such, we think that there
      1
         is a substantial enough risk of jury confusion by
      2
       3
         introduction of questioning on an essentially irrelevant
         patent -- they are not relevant to any issue in this
       4
         case -- that these discrete sections of testimony should
      5
02:42PM
         be excluded on that basis.
      6
       7
                   THE COURT: What's the page and line?
      8
                   MR. SIM: So the three designations will be 125
      9
         from 17 to 24, 129:14 to 23, and 135 from 7 to 17 in
         Mr. Sharkey's deposition from the Samsung 422 case.
02:43PM
      10
      11
                   THE COURT: And I guess, frankly, it would be
      12
         helpful if I hear from the Plaintiff about what they
      13
         intend is the purpose of this testimony. I'll give you
      14
         a chance to respond.
                   MR. DAVIS: Yes, Your Honor.
      15
02:44PM
      16
                   So Mr. Sharkey, he's testifying about his own
                  These are his own words from his own patent.
      17
         patent.
      18
         Mr. Sharkey, it's -- he's being used to support
      19
         Defendants' prior art case. He's their primary lead
      20
         prior art witness on invalidity. These statements in
02:44PM
      21
         his patent, which are his words as the prior art
      22
         witness, discuss the state of the art as of the time of
      23
         his patent, which came after Headwater's. And so
      24
         he's --
      25
                  THE COURT: Where is that testimony?
02:44PM
```

MR. DAVIS: Yes. So we can find that on Page 1 2 125:17 through 24. I don't see --3 THE COURT: MR. DAVIS: 4 That's just introducing the patent. THE COURT: Yeah. Where is the language that 5 02:45PM you think is relevant? 6 7 MR. DAVIS: Oh, yes. So 129, the designation 8 of 14 through 23 says that, you know, as of the time of 9 his patent, current computing devices do not provide fine-grained visibility and control of network usage 02:45PM 10 patterns on individuals' computing devices where the 11 12 network data flows originate. 13 And he says in the next designation, which occurs on Page 135:7 through 17, that there is a need 14 for determining, controlling, adapting, reporting data 15 02:45PM usage for specific applications and features of 16 17 applications that are running on devices and exchanging 18 data with networks. 19 And so our point there, Your Honor, is just 20 that Mr. Sharkey is suggesting that there is this need 02:46PM 21 that exists as of the time of his patent that seems to be in tension in our view with their view on invalidity. 22 23 THE COURT: All right, Mr. Davis. I understand 24 that position. I don't think that the jury is going to 25 be confused by that use of the patent, and it seems to 02:46PM

```
me to be within the broad understanding of relevance.
      1
      2
         So I'm going to overrule those objections to
       3
         Mr. Sharkey's deposition.
                   MR. DAVIS:
                               Thank Your Honor.
       4
                   And I believe the next one also will begin with
       5
02:46PM
         Defendants.
      6
       7
                   THE COURT:
                               All right. Well, I have -- I've
      8
         gone beyond when I should have taken the afternoon
      9
         recess for the court reporter, so I apologize to her,
         and we'll take a 15-minute recess.
02:47PM
      10
      11
                   (Recess from 2:47 p.m. to 3:03 p.m.)
      12
                   THE COURT: Let's move on to the next
         deposition or prior testimony issue.
      13
      14
                   MS. BEDARD: Good afternoon, Your Honor.
      15
                   THE COURT: Hello, Ms. Bedard.
03:03PM
      16
                                I'm going to address the
                   MS. BEDARD:
         Defendants' remaining objections to the deposition
      17
      18
         designations of the Samsung Electronics America witness
      19
         named Michael Schiksnis. I apologize for my
      20
         pronunciation there.
03:04PM
      21
                   As we've done for several of the other
      22
         witnesses that we're discussing today, the parties were
      23
         able to negotiate down to just a few remaining
      24
         objections. So we have two remaining designations in
      25
         Defendants' objections that I will discuss today.
03:04PM
                                                               And
```

Headwater's counsel's questions here directly 1 2 track the language of the asserted claims in the '613 3 Mr. Schiksnis is a third-party corporate He's not an expert witness in this case. 4 Не has no qualifications to provide a technical opinion to 5 03:07PM the claim terms in this case and whether some activity 6 7 meets those claim limitations and so his testimony, he 8 doesn't have the personal knowledge to testify to this issue. 03:07PM 10 And then it would be unduly prejudicial to the 11 Defendants to allow, again, a Samsung corporate witness 12 to testify whether or not he believes, based on no expertise, whether a claim limitation is met. 13 14 THE COURT: All right. 15 MS. BEDARD: Thank you, Your Honor. 03:08PM 16 THE COURT: Thank you, Ms. Bedard. 17 MR. DAVIS: Your Honor, so going back to the 18 first disputed designation, the issue there is just this 19 is the witness, who is a Samsung engineer, experienced, and the POSITA, for that matter, a senior director of 20 03:08PM

engineering at Samsung, with an electrical engineering

worked as an engineer at Motorola before that, and he's

just providing his understanding of the term "

He's worked for ten years at Samsung and

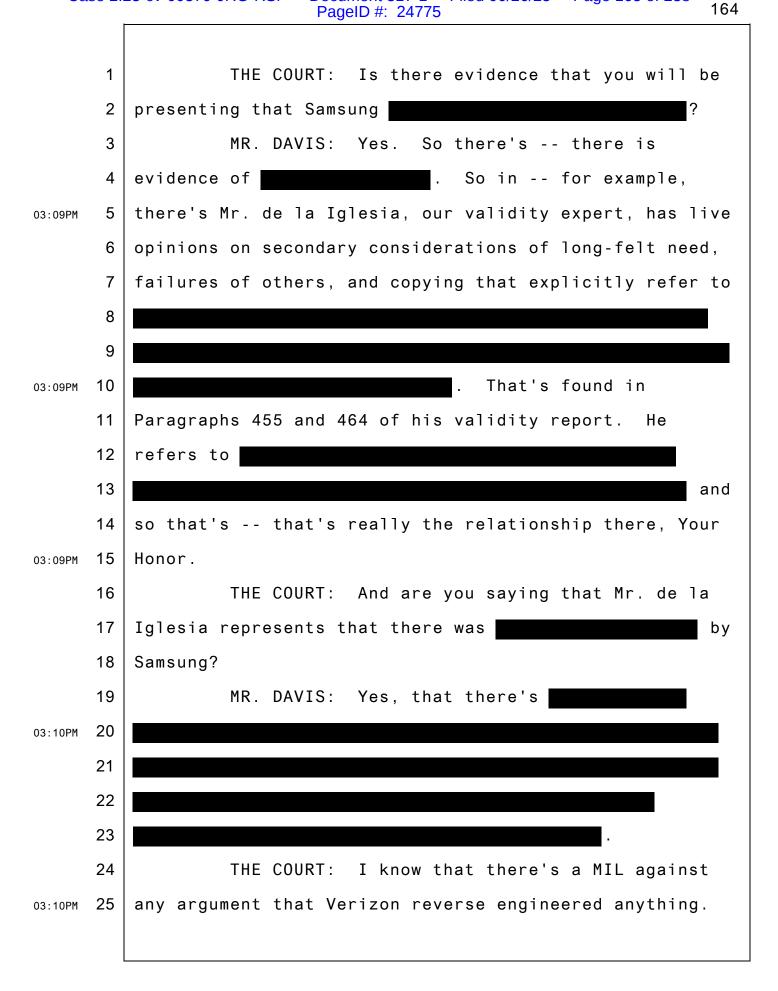

03:08PM **25** 

background.

21

22

23

```
MR. DAVIS:
                               That's right, Your Honor.
       1
       2
                   THE COURT:
                               And you're steering clear of that
       3
         in these questions?
       4
                   MR. DAVIS: Yes, Your Honor.
                   So, yes, I am glad you clarified. So there are
       5
03:10PM
      6
      7
                                          what you just referred
      8
         to, the assertion of reverse engineering by Verizon, and
         as of the last pretrial conference -- and this was part
03:11PM
      10
         of one of the MILs that we agreed to -- we would not
      11
         refer to the whistleblower complaint or allegations of
      12
         reverse engineering by Verizon.
      13
                   THE COURT: All right. And on this second
         issue, why isn't this an opinion that you're asking for
      14
         about whether something constitutes that particular
03:11PM
      15
      16
         claim limitation?
                   MR. DAVIS: Yes. So, Your Honor, this is,
      17
      18
         again, a person of ordinary skill in the art who is
      19
         being asked a sort of hypothetical scenario, and he
      20
         explains what he believes interacting with the user in
03:11PM
      21
         the foreground. He sort of responds to the
      22
         hypothetical. And so it's at least evidence of what
      23
         this claim term means to one of ordinary skill in the
      24
         art.
      25
                   I think, Your Honor, especially with the
03:12PM
```

03:13PM

rulings on, for example, the Sharkey testimony that, you know, also relates to, you know, claim language or something akin to claim language, we don't see why there would be a distinction here to say this is not okay for the Samsung witness to be saying this but is okay for Defendants to introduce about Mr. Sharkey. THE COURT: Mr. Sharkey's questions were not claim language. Your question -- your objection was that that was not the claim limitation. I can clarify that too, Your Honor. MR. DAVIS: So there are other questions that Mr. Sharkey fielded that would get at claim language that is relevant to this case, even in our view. Those were not subject to objections. Now, what Defendants objected to -- or, I'm sorry. What we objected to was Defendants identifying Sharkey testimony about claim language that was only at issue in the 422 case. This is different testimony here for Mr. Schiksnis because, intentional, Your Honor, we do not ask him about the display. We ask him about the interacting with the user in the foreground. That tracks the claim language at issue here. And so I guess all my point was, Your Honor, is that if we're going to permit Mr. Sharkey's testimony

about overlapping claim language between the two cases

03:14PM

03:14PM

03:14PM

03:15PM

03:15PM

```
167
```

and we're going to permit Mr. Sharkey's testimony about 1 claim language that was only at issue in the 422 case 2 3 like "display," then certainly it should be permissible for Mr. Schiksnis's testimony about claim language that 4 is at issue here. 5 THE COURT: You don't dispute that you're 6 7 asking him for an opinion? 8 MR. DAVIS: I'm asking him about a hypothetical 9 that I'll certainly admit, Your Honor, that I am using 10 claim language in the questioning. This was one of my depositions, and I say "interacting with the user in the 11 12 foreground." 13 I think like Samsung's counsel before, I chose 14 those words intentionally, sort of following the claim language, and Mr. Schiksnis is giving his impression of 15 16 what, in this hypothetical scenario, would that be 17 interacting with the user in the foreground from the 18 perspective of a person of ordinary skill, like 19 Mr. Sharkey. 20 THE COURT: Where would you say the basis is to 21 consider him a person of ordinary skill? 22 MR. DAVIS: Sure, Your Honor. I'll be able to provide you citations in a moment. I know I took down 23 24 in my notes. I asked him his educational background; he 25 said electrical engineering. We established that he's a

```
senior director of engineering at Samsung. He's worked
      1
      2
         there for ten years and that he was an engineer at
       3
         Motorola, an electrical engineer before that.
       4
                   THE COURT:
                               All right.
                   MR. DAVIS:
                               Would you like me to provide
       5
03:16PM
         citations to the background? I don't think there is a
      6
      7
         dispute about that, but it's all sort of early on in the
      8
         deposition, his background.
      9
                   THE COURT: Was there an objection at the time
03:16PM
      10
         to asking the witness for an opinion as opposed to
      11
         something that he would have personal knowledge of?
      12
                   MR. DAVIS:
                               The -- so Samsung's counsel raised,
         in the testimony that we talked about with the
      13
      14
         hypothetical, the first question that they raised
         "objection, form"; and after that I sort of reiterate
03:17PM
      15
      16
         the question, and Samsung's counsel objects, "Form,
         scope, legal conclusion."
      17
      18
                   THE COURT:
                               It's clearly calling for an
      19
         opinion.
     20
                   MR. DAVIS:
                               I think, Your Honor, it's not
03:17PM
      21
         calling for an opinion any more than lots of testimony
         from Mr. Sharkey.
      22
      23
                   THE COURT: You know, you yourself said it was
      24
         a hypothetical question.
      25
                   MR. DAVIS:
                                     I mean, I'm giving him an
03:17PM
                               Yes.
```

```
1
         example of if a user's watching a video.
      2
                               That's an opinion.
                   THE COURT:
       3
                   MR. DAVIS:
                               I would submit no more so than any
         other question, or plenty of other questions to
       4
         Mr. Sharkey. It seems very difficult to distinguish
      5
03:18PM
         those, Your Honor. These are third-party technical
      6
      7
                      Neither is an admitted expert. It seems
         witnesses.
      8
         like those would rise and fall together.
      9
                   THE COURT:
                               And they might. I didn't have that
         objection before.
03:18PM
      10
      11
                  Well, I will overrule the objection to the
      12
         passage on Page 84 to 85 about
                    I think there is sufficient relevance of that.
      13
      14
                   I will sustain the objection to the question at
         Page 91 to 92 on the grounds that it's calling for the
03:18PM
      15
         witness's opinion about the claim limitation.
      16
                                                          It's not
         asking about the functionality of the device.
      17
      18
                   What else?
      19
                   MR. DAVIS:
                               I believe, Your Honor, that takes
     20
         us to Mr. Yamasani's deposition designations.
03:19PM
      21
         think there is a mix. This is -- we have an objection
      22
         to one of Defendants' designations and then they have
         some objections to some of our designations.
      23
      24
                   With respect to our objection, this is
```

Page 212, Lines 19 through 25 of Mr. Yamasani's

25

03:19PM

```
1
         testimony, and the issue here is I think not totally
         unlike what you were just discussing, Your Honor, that
      2
       3
         Defendants are using the claim term "intercepting" in
         their questioning of Mr. Yamasani.
       4
                   He's testifying on behalf of Google. That's a
       5
03:20PM
         financially interested third party. So this is
      6
      7
         Defendants questioning their own financially interested
      8
         witness.
                    That's kind of the distinction I would draw,
         Your Honor, between what I was just talking about with
03:20PM
      10
         Mr. Schiksnis and so, you know, we would say this is
         improperly eliciting a legal conclusion from a biased
      11
      12
         fact witness.
                   And so I can appreciate, Your Honor, if the
      13
      14
         thought as well, didn't you just take the opposite
         position in the last one. And, Your Honor, I think how
      15
03:20PM
      16
         I'm distinguishing it, Your Honor, is that it's the
      17
         state of the parties and the counsel.
      18
                   I was questioning Mr. Schiksnis, who is a
      19
         financially interested witness, Samsung, and he's giving
     20
         testimony. I'm not eliciting such testimony from my own
03:21PM
      21
         witness.
      22
                   THE COURT:
                               You don't have to explain yourself.
      23
                               No, I appreciate it, Your Honor.
                   MR. DAVIS:
      24
                   THE COURT:
                               So the objection to the question of
     25
         the witness at Line 19 is based on it calling for an
03:21PM
```

```
171
                           PageID #: 24782
      1
         opinion?
                   MR. DAVIS:
                               That's right, Your Honor.
       2
       3
                   THE COURT:
                               All right.
       4
                   MR. DAVIS:
                               It would probably make sense for me
         to cede the floor to Defendants to address this one and
      5
03:22PM
         then you can stay up and address yours.
      6
       7
                   THE COURT: All right.
      8
                   MR. SIM: So thank you, Your Honor. On the
         point Mr. Davis was just discussing, I'll just make a
      9
03:22PM
      10
         few quick points.
      11
                   THE COURT: And it would help me out if you
      12
         tell me what is the designated part? Where does the
         designation begin and end?
      13
      14
                   MR. SIM: Your Honor, excuse me just one moment
      15
         while I grab it.
03:22PM
      16
                   THE COURT: All right.
      17
                   MR. SIM:
                             So the designation in question here,
      18
         at least I understand the extent of Plaintiff's
      19
         objections to it, is just going to be Lines 19 through
      20
         25 on Page 212.
03:23PM
      21
                   THE COURT: That's the part that's objected to.
      22
         What part is being offered? Is it just that question
      23
         and answer?
      24
                   MR. SIM: Give me one moment, Your Honor.
```

THE COURT:

I'm just trying to get the context.

25

03:23PM

172 PageID #: 24783 1 MR. SIM: For Verizon's affirmative 2 designations, it actually precedes several pages before 3 this, omitting objections and other attorneys speaking. So it includes, for instance, subject matter throughout 4 Page 212, 211, and 210, which Defendants would submit 5 03:24PM sort of lead up to the point that Plaintiff's counsel 6 7 highlighted, which is in a sense a summation of the line 8 of questioning. 9 THE COURT: All right. So give me what you 03:24PM 10 consider the relevance of this question. 11 MR. SIM: This question in fact goes to a 12 centrally relevant issue in this case as is laid out in relatively great detail in the parties' briefing on the 13 14 '541 patent motion for summary judgment. 15 As Your Honor's certainly aware, intercepting 03:25PM is a key claim element in the two remaining asserted 16 17 claims from that patent and testimony from Google's 18 representative here, Mr. Yamasani, going to whether or 19 not some of the accused products that perform 20 intercepting or related verbs is, thus, directly 03:25PM 21 relevant to that noninfringement position.

THE COURT: And has the witness at some point here indicated that he's using "intercepting" and "cancelling" the same way, interchangeably, or is he trying to contrast those?

22

23

24

25

03:25PM

PageID #: 24784

Document 317-1

1 MR. SIM: If you'll give me one minute, Your Honor. There was no instance in which the witness 2 3 equated those terms as synonymous in the course of his 4 testimony. 5 THE COURT: So what we're talking about, I 03:26PM guess, is the question and why does the question say 6 7 "intercepting or cancelling." 8 MR. SIM: Perhaps it was just a clumsily worded 9 But the purpose of this line of questioning was to arrive at a point where, you know, there was --03:26PM 10 11 the witness was explaining that there was certain API 12 transactions, as he was calling them, that occur in the course of the accused products and that those are 13 14 received at certain -- without delving too deeply into the disputed issues surrounding the '541 patent motion 15 03:26PM 16 for summary judgment, that those API transactions are 17 received by certain components. 18 And the question, questioning leading up to the 19 objected question was establishing that there is no instance in which an API transaction does not, in fact, 20 03:27PM 21 reach where it's going. THE COURT: So this relates to the issue of 22 23 whether something can be intercepted and still be received? 24 25 MR. SIM: Correct. It certainly touches on 03:27PM

```
1
         that issue, Your Honor.
                   THE COURT: All right.
      2
       3
                   MR. SIM:
                             I should clarify, Your Honor, if
         you'll permit me, that while this does go to that legal
       4
         issue which is in the summary judgment brief and the
      5
03:27PM
         parties have submitted, this questioning is just on the
      6
      7
         operation of the accused product. So it does not touch
      8
         the legal issue of what the definition of "intercepting"
              It's whether, from the witness's perspective, a
03:27PM
      10
         witness who has not seen the patents, believes that, you
      11
         know, how the products operate could be described or not
      12
         described as intercepting.
      13
                   THE COURT: All right. Thank you, Mr. Sim.
      14
                   MR. SIM: Your Honor, Defendants also have
         objections to Plaintiff's designations from this
      15
03:28PM
      16
         deposition transcript. Would it be helpful for you to
         hear from Mr. Davis next, or should I remain up here and
      17
      18
         address that second set of designations?
      19
                   THE COURT: Why don't you identify for me the
     20
         issue.
03:28PM
      21
                   MR. SIM:
                             Certainly. So this is -- this will
      22
         sound familiar to Your Honor. This is the same
         objection I discussed a moment ago with respect to
      23
      24
         Mr. Sharkey's testimony. And understanding that -- Your
      25
         Honor's finding on that issue, this is a similar issue
03:28PM
```

where a third-party witness, again a Google witness, was 1 shown a patent on which that witness was an inventor and 2 3 was asked questions as to that patent. And I'm happy, if it's helpful for the Court, to read into the record 4 the exact portions on which Defendants object, but the 5 03:28PM thrust is the same. 6 7 This is that there was a chance for confusion 8 here and that the relevance of this patent is even lower in the sense that it was filed in 2016, so long after 03:29PM 10 all the patents we've been discussing in this case. 11 And once I've read into the record, I'll direct 12 the Court's attention to a specific portion of the 13 testimony here where terms having to do with the accused 14 features and, in fact, the asserted patents are 15 intermingled in with some questioning on this entirely 03:29PM 16 unrelated patent upon which Mr. Yamasani happens to be an inventor. 17 18 THE COURT: All right. Where does this occur? 19 MR. SIM: So I'll skip to the end. The point 20 which I just referenced begins at 135 in Mr. Yamasani's 03:29PM 21 transcript at Line 17, begins with a discussion of doze 22 mode, an accused feature in this case. 23 And then on 136 beginning at Line 4, all of a 24 sudden in that same line of questioning, we're back to

discussing Mr. Yamasani's prior art patent, which -- or,

25

03:30PM

```
I'm sorry, not prior patent. Entirely unrelated patent.
      1
         Excuse me, Your Honor.
      2
                   And for reference, this was introduced as
       3
         Exhibit 7 to Mr. Yamasani's deposition on Page 126 of
      4
      5
         this transcript.
03:30PM
      6
                   THE COURT: And the part that you find
      7
         objectionable is what starts at Line 17 on Page 135?
      8
                   MR. SIM:
                             That is correct. So at this point in
         the questioning, Mr. Yamasani's patent has been
         introduced as Exhibit 7, and he's been asked some
03:30PM
      10
      11
         questions on it. Then when this designation begins at
      12
         135, Line 17, there are a couple questions about the
         accused features.
      13
      14
                   Then you'll see "Let me ask you this," starting
         on Page 136 at Line 4: If you go to Column 7, Line 31,
      15
03:31PM
         for example -- and then the questioning attorney reads
      16
         in a sentence from Mr. Yamasani's patent and begins
      17
      18
         asking him about the meaning of the word "inactive" in
      19
         his patent.
     20
                   Now, if the Court goes back to Page 135, there
03:31PM
         is some discussion about the accused features and that
      21
      22
         they may trigger when a device has or has not been
         active or inactive for some period of time.
      23
      24
                   So we submit that there is prejudice here in
     25
         the sense, or at least the possibility of jury confusion
03:31PM
```

in a sense that this entire -- this patent from 2016 1 2 that is unrelated to the issues in this case is suddenly 3 being used to somehow define or discuss the context of the accused features. 4 THE COURT: And the issue of an inactive state 5 03:31PM is presented in this case; is that it? 6 7 MR. SIM: Yes, Your Honor, to the extent that 8 doze mode, and which is referenced slightly further down on Page 135, application standby, are accused features. 03:32PM 10 And the times at which they become active play into some 11 of Headwater's infringement theories. 12 I think I'm happy to discuss that in great detail, but it becomes quite complex after that point. 13 14 THE COURT: All right. Thank you, Mr. Sim. 15 Let me hear the response. 03:32PM 16 MR. SIM: Thank you, Your Honor. So, Your Honor, I think the issue 17 MR. DAVIS: 18 here is essentially the same thing that we dealt with 19 with Mr. Sharkey's patent, so I think our points would be the same there. 20 03:32PM 21 The only thing I would add, Your Honor, is the 22 designation, the 135, Line 17, the designation that begins with 135:17, I think at least the portion running 23 24 from 135:17 to 23 is not tied to Mr. Yamasani's patent 25 and so I don't think this objection really is applicable 03:33PM

```
here, to that portion at least.
      1
                   The subsequent portion we see at Line 24,
      2
       3
         Headwater's counsel asks: And app standby considers
         whether an application has been active or inactive for
       4
         some period of time as well?
      5
03:33PM
      6
                   And that point, the witness says: Well, what
      7
         do you mean by active?
      8
                   And then Headwater's counsel goes back into
         Mr. Yamasani's patent, where he uses the term "inactive"
         to provide context of, you know, "Well, what did you
03:33PM
      10
      11
         mean by inactive when you wrote that in the patent."
      12
                   So I think that first portion running from
         Lines 17 to 23 on Page 135 is just -- that should not be
      13
      14
         objectionable.
                   THE COURT: That's not talking about
      15
03:34PM
         Mr. Yamasani's patent?
      16
      17
                   MR. DAVIS:
                               It is not. That is a question --
      18
         my understanding is that's just a standalone question.
      19
                   The next question, Headwater's question asks
     20
         about app standby and whether an application is
03:34PM
      21
         considered active or inactive, and at that point the
      22
         witness, you know, asks about the -- you know, what do
      23
         you mean, and we dive back into the patent.
                   But I think Mr. Sim said that as well, that
      24
     25
         this first portion is not specifically about
03:34PM
```

```
1
         Mr. Yamasani's patent.
      2
                   THE COURT:
                               All right.
       3
                   MR. DAVIS:
                               So otherwise, I think just the
         points we made earlier about Mr. Sharkey's own patent as
       4
         well and sort of providing context for terminology.
      5
03:35PM
      6
                   THE COURT:
                               Mr. Davis, why isn't the
      7
         questioning on Page 212 just talking about the
      8
         functioning of the product, the Android system?
      9
                   MR. DAVIS:
                               I mean, I do think he is talking
03:35PM
      10
         about Android.
                          He does say that. He refers to
      11
         connectivity manager. I think it's just a matter of he
      12
         is talking about it in the context of claim language and
         so we think it's sufficiently comparable to the other
      13
      14
         types of testimony along those lines that use
         terminology that come from claims.
      15
03:36PM
      16
                   THE COURT:
                               I think that the question at
         Page 212 is sufficiently tied to the function of the
      17
      18
         system as opposed to the claim language particularly, so
      19
         I'll overrule the objection to Page 212, also overrule
      20
         the objection to Page 135. I don't think that will be
03:36PM
      21
         confusing to the jury. I think it's fair
      22
         cross-examination of the witness.
      23
                   MR. DAVIS:
                               Thank Your Honor.
      24
                   MR. SIM: Thank Your Honor.
      25
                   THE COURT:
                               What's next?
03:36PM
```

MR. DAVIS: So at this point, Your Honor, we 1 have two more witnesses left. The one of those 2 witnesses is Mr. Russell. I think what I mentioned 3 earlier and what we suggested to Defendants is that 4 Mr. Russell, some of his designations are tied up in 5 03:37PM issues that the parties have resolved with respect to 6 7 MILs and the like. We can argue those at this point. Ι 8 don't know if Defendants have a different thought on how to address that. 03:37PM 10 Oh, I can clarify. I think what I'm hearing 11 from Defendant counsel is that they had thought we were 12 going to table these designations. That's what we proposed, Your Honor. That's fine from our perspective. 13 14 I didn't know if we had agreement on that. If we do, that's fine. 15 03:37PM 16 MR. KREVITT: Your Honor, may I be heard? THE COURT: Yes, Mr. Krevitt. Go ahead. 17 18 MR. KREVITT: Your Honor, we're fine tabling 19 those particular designations, but this goes to an issue that I raised this morning we want to address at the 20 03:38PM 21 Court's convenience, which, you'll recall Motion in 22 Limine Number 4 was to exclude Russell testimony for a 23 variety of reasons. This was dealing with whistleblower 24 allegations, and it related entirely and explicitly to 25 the '042 patent. 03:38PM

don't finish.

03:38PM

03:39PM

03:39PM

03:39PM

03:40PM

With the '042 patent out of the case now, Your Honor, there's no conceivable relevance to any of Russell's testimony. This is the issue, as I say, that I flagged earlier today, the issue about which the Court had extensive discussion with Mr. Chang, who explicitly and entirely tied it to the '042 patent. And Your Honor will recall that when Your Honor denied the motion in limine, at least in part, Your Honor said that you had been satisfied that there was a connection to the '042 patent. So as I said, that's the issue that we want to discuss with Your Honor, which we could do now, we could do later, we can do in writing with respect to revisiting MIL Number 4, Russell, in light of Your Honor's summary judgment ruling with respect to the '042 patent. THE COURT: All right. And I am fine with taking that up now or whenever. We have a variety of issues yet to finish. I see that I've got a day Wednesday, the 18th. So that's the Wednesday before trial. It's set aside now for a hearing in the Headwater/Samsung case, the 641 case, and I could use that day, or some part of it, as the final event in this case if we have things that we

```
Does that make sense?
       1
       2
                   MS. FAIR: We're obviously available to be here
         for that.
       3
       4
                   THE COURT:
                               Okav.
                   MR. KREVITT: Yes, Your Honor, the same for
       5
03:40PM
         Defendants.
      6
       7
                   THE COURT: All right.
      8
                   MR. KREVITT: It may be that there are certain
         issues that could benefit with some additional
03:40PM
      10
         discussion, some of the designations, for example, and
      11
         the parties can continue to work on those.
      12
                   THE COURT:
                               Well, I don't mind leaving Russell
         and you until later if we have a date set for that.
      13
      14
         that's what I'm understanding the parties want to do?
                                 That's fine as to the
                   MR. KREVITT:
03:41PM
      15
         designations, Your Honor. The issue I have is
      16
         different. So if Your Honor would indulge, it is a
      17
      18
         different issue. It goes to a more threshold
      19
         fundamental question and in some sense is just a
     20
         revisiting of Motion in Limine Number 4.
03:41PM
      21
                   THE COURT:
                               What you're doing is saying that
      22
         now that there is at least a recommendation that the
      23
         '042 not remain in the case that that would change the
      24
         outcome of MIL 4 with respect to other testimony by
```

03:41PM

Mr. Russell?

PageID #: 24794

Document 317-1

MR. KREVITT: That's correct, Your Honor. 1 2 I can, if you'd like, briefly explain why and then can 3 address any questions Your Honor may have. THE COURT: All right. 4 MR. KREVITT: So again -- and I don't want to 5 03:41PM plow old ground. Your Honor had extensive discussion on 6 7 MIL 4 a week ago, but this is the motion in limine that 8 Defendants filed with respect to a Mr. Russell. somebody who had allegations that Verizon had copied a PowerPoint. And Mr. Fenster, in connection with a 03:42PM 10 11 different motion, the sanctions motion we argued, made 12 clear that the Russell -- the relevance of the Russell 13 testimony was to this April 2010 PowerPoint presentation and that the relevance of that was limited entirely to 14 15 the '042 patent. 03:42PM 16 We then did argument on the Russell motion in limine, and Mr. Rosenthal, my partner, tried to convince 17 18 Your Honor that there was no connection with that 19 PowerPoint and that testimony to the '042 patent. that was the sole discussion, whether the PowerPoint on 20 03:42PM 21 which -- regarding which Mr. Russell had testified, that 22 2010 April PowerPoint had any relevance to any issues in 23 this case. We argued that it didn't because it wasn't 24 tied to the '042 patent. 25 Mr. Chang, on behalf of Headwater, stood here 03:43PM

03:43PM

03:43PM

03:44PM

03:44PM

03:44PM

and argued to Your Honor that there was a connection to the '042 patent.

And Your Honor may recall he walked you through

paragraphs starting at Paragraph 90 and then into the hundreds, I think concluding at about 116, and marched, Your Honor, through every paragraph and connected -- or endeavored to, and ultimately did so to Your Honor's satisfaction, connected that to the '042 patent.

The Paragraph 90, the first paragraph to which Mr. Chang referred, the paragraph on which the analysis was entirely based was -- this is in Mr. Cooklev's report -- was tying this information and Russell testimony to the '042 patent.

Dr. Cooklev was an expert only on the '042 patent, and that was the only testimony, of course, that Mr. Chang cited because that's the only relevance.

Your Honor ultimately, after argument,

concluded that looking at that document, which was the Dr. Cooklev expert report, 185-3, Your Honor ruled, quote: I am satisfied that it shows that there is an expert who is connecting the presentation at issue and Mr. Russell's testimony with the technology in the '042 patent.

We obviously, we had tried to persuade Your Honor otherwise, but Your Honor was satisfied that

```
Dr. Cooklev had sufficiently tied it to the '042 patent.
      1
                   With the '042 patent out of the case, Your
      2
         Honor, there is no conceivable relevance for
       3
         Mr. Russell's testimony. It is salacious. Your Honor
       4
         has already found that there is no allegation of copying
      5
03:44PM
         as to Verizon. The allegations with respect to the '042
      6
      7
         patent, what the testimony related to was things that
      8
         happened on Verizon's network.
                   The '541 and '613 patent have nothing
      9
03:45PM
      10
         whatsoever to do with anything on Verizon's network.
      11
         It's all features on the phones. And that presentation
      12
         summer of 2010 was years before the '541 patent came
         out, years before the '613, before there was even a
      13
      14
         marking page that was even alleged to be relevant to
      15
         either of those two patents.
03:45PM
      16
                   So, Your Honor, given that the entire basis for
      17
         arguing against our motion in limine as to Mr. Russell
      18
         was the '042 patent, and the '042 patent being out of
      19
         the case now, we would respectfully submit that there's
         no conceivable relevance or basis for that testimony to
      20
03:45PM
      21
         be admitted.
      22
                   And finally, Your Honor, it's highly
      23
         prejudicial.
                       It's salacious testimony that it was in
      24
         connection with the whistleblower litigation, as Your
      25
         Honor is aware, that was settled. It dealt with
03:46PM

allegations of copying, which aren't in the case, and
dealt with allegations of copying on technology that has
no relevance, of even alleged relevance, to any of the
patents in this case.
         And so for all of those reasons, Your Honor, as
I said, we would request that Your Honor grant MIL
Number 4 with respect to Mr. Russell's testimony.
         THE COURT:
                    All right.
         MR. KREVITT: Thank you, Your Honor.
         THE COURT:
                     Thank you, Mr. Krevitt.
         MR. DAVIS:
                     Your Honor, just right off the bat,
I want to dispel what we just heard from Mr. Krevitt
that Mr. Chang's presentation focused entirely on the
'042 patent, that he did not suggest in any way that
there was something beyond the '042 patent that was
relevant to these allegations about Verizon and
Mr. Russell.
         This is from the PTC transcript. This will be
Page 154, Lines 7 through 15. Mr. Chang is addressing
exactly this issue. And what he says here beginning at
Line 13, he says: "That is the infringing, the accused
infringing technology for the '042 patent, as well as
the '541 patent and the dependent claim of the '613
patent."
         That's -- we explicitly said that, and I can
```

```
187
```

show Your Honor some portions from the -- just change 1 2 out my laptop. 3 I can direct Your Honor to portions of Dr. Wesel's testimony. In this case, his expert report 4 here, Your Honor, paragraph 4, you'll see at the bottom 5 03:48PM of this slide. Dr. Wesel is saying: "Based on the 6 7 events discussed above, the similarities between the 8 ItsOn DAS system (which practiced the '541 patent) and Verizon's DAS system. That's the subject of what we're talking about with Mr. Russell (which infringes the '541 03:48PM 10 11 patent, see e.g., '541 Claim 1[e]), it is my opinion 12 that Verizon would have been aware of, or at least willfully blinded itself to, the '541 patent in the 2016 13 14 time frame, which I understand was when Verizon defined its LTE PCO requirements." 15 03:48PM 16 There is a particular claim element, Your 17 Honor -- apologies. I have slides I can hand up 18 actually, if I may. 19 The Slide 3 that I'm referring to, the excerpt 20 I just read from Dr. Wesel's Appendix A to his opening 03:49PM 21 The report, that's filed on the docket at Docket 176-7. 22 '541 Claim 1[e] element that's being referenced here is 23 a limitation that says "or based on information from a

23 a limitation that says or based on information from a 24 network element," that's what we point to as PCO being an example of how that network element limitation is

That is explicitly what Dr. Wesel, the
infringed.
infringement expert who did not opine on the '042
        He opined on the '541 and '613 patent.
links PCO and the Verizon DAS system that is relevant to
Mr. Russell to the '541 patent.
         And so I think to that point, Your Honor, I
think we would fundamentally disagree with Defendants'
suggestion that the -- everything related to Mr. Russell
and everything related to MIL 4 falls away by virtue of
the '042 noninfringement report and recommendation.
         THE COURT: All right. Thank you, Mr. Davis.
         MR. KREVITT: Very briefly, Your Honor.
         First, the testimony that was put on the page
just now that purports to be testimony was, in fact,
questions put to Mr. Russell by counsel. None of that
is his actual testimony.
         But more importantly, the portions of the Wesel
report that you just saw that were taken as snippets,
what Mr. Davis did not point out is that what Mr. Wesel
did -- and we can show Your Honor if it's helpful; at a
break we'll hand up the report -- is he reproduced,
literally reproduced out of Dr. Cooklev's report.
                                                   Не
said Dr. Cooklev made all these allegations; Dr. Cooklev
did all of this analysis. That's why Mr. Chang talked
about Dr. Cooklev and only Dr. Cooklev.
```

```
Then Mr. Wesel said at the end, and this had
       1
      2
         some relevance to the '514 -- excuse me -- '541 patent
       3
                That's why we spent an hour or so on the
         Mr. Russell MIL 4 when we were here last, Your Honor,
       4
         because Your Honor asked where does an expert tie this
      5
03:52PM
         document, this testimony, to a patent.
      6
       7
                   Mr. Wesel never does that, Your Honor.
                                                            We
      8
         don't think Dr. Cooklev did it, but at least he made
         some effort to. He supplied paragraphs relating to it.
         There is no conceivable allegation, Your Honor, none
03:52PM
      10
      11
         that the reference that had to do with how Verizon's
      12
         network would work relates to the '514 patent in which
         all of the accused features are on the phones.
      13
      14
                   Dr. Wesel doesn't say anything beyond this
      15
         conclusory ipse dixit sentence after reproducing
03:52PM
      16
         literally, wholesale, Dr. Cooklev's opinion. There is
         nothing in this record, Your Honor, that ties
      17
      18
         Mr. Russell's testimony to any other patent in this
      19
                 It would be brought into this case purely for its
      20
         salacious, its prejudicial, its atmospheric effect.
03:53PM
      21
         There is no connection to the presentation to
      22
         Mr. Russell's testimony and to the patents that remain
      23
         in this case.
      24
                   And in fact, Your Honor, as I said,
     25
         Mr. Russell's testimony related to something that
03:53PM
```

happened in 2010 that would be on the network. 1 patents issued in this case years later. 2 3 We heard that this might be relevant to willfulness for the other patents. We have a summary 4 judgment motion. Obviously Your Honor is aware. 5 03:53PM Willfulness requires identification of patents. 6 7 is no identification of patents in Mr. Russell's 8 testimony or that document. The patents wouldn't issue for years. 03:53PM 10 Mr. Davis said it relates to copying. 11 no allegation of copying as to Verizon. Your Honor has 12 already ruled that out in connection with Motion in 13 Limine Number 2. 14 So the only possible relevance, or purpose --15 excuse me -- of this testimony that is untethered 03:54PM 16 substantively to any patent is to bring somebody, some testimony in that says, "Hey, Verizon got some 17 18 presentations, Verizon looked at the presentations and 19 then Verizon did some things." It's totally unfair and 20 untethered to any patent. 03:54PM 21 And that's why finally, Your Honor -- and I 22 know counsel sits at the podium and tells you all the 23 evidence is this way and someone else tells you all the 24 evidence is this way, and it's hard for anybody to sort

that out. And this is what makes this so unfair.

25

03:54PM

```
We are in this situation where Mr. Chang
       1
      2
         defended this motion in limine entirely on the '042
       3
         because that's its only possible relevance. And now we
         show up today, in light of the '042 out, and Mr. Davis
       4
         shows you a snippet of an expert report in which
       5
03:54PM
         Dr. Wesel said, oh, by the way, the '541 also.
      6
       7
                   So for all those reasons, Your Honor,
      8
         Mr. Russell's testimony has no relevance. It's not tied
         to any expert, and no expert has tied it substantively
03:55PM
      10
         to any patent in this case.
      11
                   THE COURT: All right.
      12
                   MR. KREVITT:
                                 Thank Your Honor.
                   THE COURT: Mr. Krevitt, I will look further at
      13
      14
         that issue.
      15
                   MR. KREVITT:
                                 Thank Your Honor.
03:55PM
      16
                   THE COURT:
                               Mr. Davis, if you want to address
      17
         the issue that you've referred to a couple times about
      18
         financial interest of a Google witness, I know it was
      19
         last time, and the related issues, I'll take those up.
      20
                   MR. DAVIS: Thank Your Honor.
03:56PM
      21
                   THE COURT:
                               I guess the first thing I wanted to
      22
         know is that one of the most important issues last time
      23
         was the fact that everyone agreed there was
      24
         indemnification involved in that case, which is
      25
         something that is not going to be made known to the jury
03:56PM
```

for various reasons.

03:57PM

03:57PM

03:57PM

03:58PM

03:58PM

Also, everyone agreed that the witness from Google -- I think it was Mr. Hanson -- was one of the primary technical witnesses who would be testifying for the Defendant. He had no knowledge of the indemnification issue. In any event, we didn't want that coming out in front of a jury.

Are those basic facts present in this case with respect to a witness?

MR. DAVIS: Yes, I believe so, Your Honor. The lead technical witnesses in these cases, especially now that the two remaining patents if '042 doesn't go forward, is those are primarily device-side patents. Of course, I just talked with you about an order from a network element piece of the '541 claim.

But the Defendants have pointed to the witnesses from Apple and from Google as providing the relevant testimony on the accused functionality, which operates on the Android operating system or the iOS operating system.

The witness lists that Defendants have submitted is extensive. It includes numerous witnesses from Apple and witnesses from Google as well. I think that they certainly intend to rely upon them. And much like in the 103 case, they intend to rely upon, I think,

witnesses to support their prior art case as well. 1 They have made end noninfringing alternatives. I'll add as 2 3 well, Your Honor, they have noninfringing alternatives related to Apple functionality. So I do think we have 4 that same issue of these are important technical 5 03:58PM I think the parties agree on that point. 6 witnesses. 7 On the indemnification issue, we do have -- we 8 know that the Defendants have purchase and sale agreements with their OEM suppliers, and those purchase 9 03:59PM 10 agreements, at least what we've seen, include 11 indemnification provisions. 12 It's possible that we don't have perfect and 13 complete information for everyone, but that's certainly 14 our view of it, and we've tried to obtain that 15 information. Much like in the Samsung case, to the 03:59PM extent we haven't gotten the information or a complete 16 picture of the information, it's not for lack of trying 17 18 and that's something that Defendants should be providing 19 to us much like we finally eventually got at the 20 pretrial conference in the 103 case. 03:59PM 21 So, Your Honor, really all we're asking for is 22 essentially the same treatment as before, that if we're 23 going to have these witnesses come from a party, or a 24 third party that has a financial interest in this case, 25 that we just introduce them as such. 04:00PM

I have the language that Judge Gilstrap used 1 before Mr. Hanson testified, and he introduced him as 2 3 Mr. Hanson being a Google employee, that Google -- and clarifying that Google has a financial interest in this 4 case through its relationship with Samsung. No mention 04:00PM 5 of indemnification, as Your Honor pointed out. 6 7 THE COURT: And who are the third parties whose 8 employees will be testifying that you believe fall into 9 this category? 04:00PM 10 MR. DAVIS: Yes. So certainly Google and 11 So that would be from Google, they have Apple. 12 Mr. Yamasani. Mr. Sharkey is a former Google employee. 13 He now is no longer employed by Google. 14 On the Apple side, they have Mr. Chan, they 15 have Mr. Venkatraman, and they have a prior art witness 04:01PM 16 as well from Apple, Mr. Begeman. I believe that's 17 B-e-g-e-m-a-n. 18 And on the Samsung side, Defendants can correct 19 me if I'm wrong, but I don't believe they have 20 identified Samsung witnesses as potential live 04:01PM 21 witnesses. We would need to do an introduction before. 22 So as long as that's the case, then I believe it would 23 be those Apple and Google witnesses. 24 THE COURT: And which of those entities are you 25 04:01PM contending have indemnification agreements with Verizon?

```
195
                           PageID #: 24806
       1
                   MR. DAVIS: We believe Apple, Google, and
       2
         Samsung as well, but it sounds like Samsung may not be
       3
         an issue if Samsung witnesses are not being relied upon
         by Defendants.
       4
       5
                   THE COURT:
                               All right.
04:02PM
                               If they are, then we would include
       6
                   MR. DAVIS:
       7
         Samsung as well, of course.
       8
                   THE COURT:
                               And with respect to Apple, you
       9
         mentioned Chan, and then who was the second one?
      10
04:02PM
                   MR. DAVIS:
                               Yes, the second one is
      11
         Mr. Venkatraman, and that's V-e-n-k-a-t-r-a-m-a-n.
      12
                   THE COURT:
                               And a Mr. Begeman?
      13
                   MR. DAVIS:
                               Yes.
                                      I believe it's Begeman,
         B-e-g-e-m-a-n.
      14
      15
                   THE COURT:
04:02PM
                               All right.
      16
                   MR. DAVIS: And he was a -- focused on the
      17
         prior art, Apple prior art that Defendants have
      18
         identified.
      19
                   THE COURT: All right. Let me hear from
      20
         Verizon.
04:03PM
                               Thank Your Honor. Deron Dacus on
      21
                   MR. DACUS:
         behalf of Verizon.
      22
      23
```

As the Court well knows, Your Honor, the Court
upstairs is very strict on announcements related to
video depositions and what can be said before that video

04:03PM

From our perspective, as of today, we don't 1 deposition. think that the Court should deviate from that practice. 2 3 But having said that, I want to say one additional thing to the Court. 4 5 We've really not had a chance to confer with 04:03PM the other side on this issue. This is not something 6 7 we've had a chance to even talk to our clients about and 8 so we would ask for that opportunity to do that. 9 I will say at first blush and just facially, we 04:04PM 10 do have some pretty significant concern about the judge 11 saying to the jury, you know, that the witness has a 12 financial interest in the case. Certainly in the Samsung case, apparently they 13 14 had certain agreements that led that to be the most expeditious and efficient way to handle that. 15 04:04PM 16 sure we're similarly positioned; but given that it looks 17 like we're going to have an additional pretrial in the 18 days preceding this, we would ask the Court to defer 19 this and allow us an opportunity to confer with the 20 other side about it. 04:04PM THE COURT: All right. Well, I'm fine with 21 22 I will tell you that to the extent that you call 23 witnesses whose employers have indemnification 24 agreements with the Defendant, I think that the jury

needs to be informed of that because they are otherwise

25

04:05PM

```
not going to know that the witness they are listening to
      1
      2
         is not just a disinterested witness.
       3
                   MR. DACUS:
                               I've stood at this podium and made
         that argument, too, Your Honor, many times.
       4
      5
         understand exactly what the Court is saying.
04:05PM
         say -- this will be no surprise to, Your Honor, I'm
      6
       7
         sure -- indemnification is not always a black-and-white
      8
         issue.
                   THE COURT: I know.
04:05PM
      10
                   MR. DACUS: And that's certainly -- almost
      11
         certainly the case here. And so that's part of, I
      12
         think, the meet-and-conferring that needs to go on.
                                                                And
         I certainly recognize and acknowledge that a witness who
      13
      14
         has financial interest and/or bias, that's fair game in
      15
         some respects.
04:06PM
      16
                   THE COURT: And there are a variety of ways to
         communicate it. And the Court shares your concern that
      17
      18
         it not be overemphasized, but I think, you know, there
      19
         needs to be a way to do it. And it's not going to be
      20
         repeated over and over, I can tell you that. But in any
04:06PM
      21
         event, hopefully there won't be that many different
      22
         witnesses that it will apply to.
      23
                   I'm happy to pass that until the next time
      24
         we're here, with the understanding that if we don't hear
      25
         anything better, it's going to happen very similarly to
04:06PM
```

```
198
```

```
1
         the way it happened in the last case.
                   MR. DACUS: Understand all that, Your Honor,
      2
       3
         and appreciate the Court giving us a little time on this
       4
         issue.
                   THE COURT:
                               All right. That is not a problem.
       5
04:06PM
         We'll get back to this then on the next hearing.
      6
       7
                   MR. DACUS:
                               Thank Your Honor.
      8
                   THE COURT:
                               Thank you, Mr. Dacus.
      9
                   MR. HOFFMAN: Your Honor, can we return for
         just a moment to the other objections to Verizon
04:07PM
      10
         witnesses that we addressed a little earlier in the
      11
      12
         hearing?
      13
                   THE COURT: Has someone refreshed their
      14
         recollection?
      15
                   MR. HOFFMAN:
                                 They have. Someone has refreshed
04:07PM
      16
         their recollection.
      17
                   So maybe most importantly, I want to clarify
      18
         the record because I misremembered things a little bit.
      19
         It was the case that we had objections for untimely
     20
         disclosed Verizon witnesses. I think the way -- I
04:07PM
      21
         misremembered how that would possibly resolve.
      22
                   Looking at the pretrial hearing from last week
         at Page 28, counsel for Defendant represented -- or
      23
         Verizon represented that, if possible, that they
      24
      25
         wouldn't be calling the particular witnesses, the five
04:07PM
```

witnesses at issue, which would resolve the issue. 1 We haven't heard back from the last week and 2 3 tried to do -- anyway, we haven't heard back on those witnesses and whether, in fact, the issue is resolved 4 and so it remains, as far as we know, a live issue until 5 04:08PM we hear different. 6 7 THE COURT: All right. Is there anyone on 8 behalf of Verizon who is currently able to speak to that 9 issue? MR. VINCENT: Your Honor, I think the answer to 04:08PM 10 11 that is we don't yet have an answer because the witness 12 lineup will be somewhat dependent on the rulings that Your Honor will issue on the various motions and so to 13 finalize that to be able to answer the question and 14 15 resolve the issue I think depends on the resolution of 04:08PM 16 those. 17 So we would propose working together to give 18 some time and, at that additional hearing date, to be 19 able to have an answer at that point. 20 THE COURT: I'm not sure exactly what the 04:08PM 21 nondisclosure issue is, but if the situation is that the

nondisclosure issue is, but if the situation is that the names of these witnesses were not disclosed to the Plaintiff during the discovery period, it's likely that they would be excluded. If it's a different issue, then it could be a different situation.

04:09PM

```
MR. VINCENT: My understanding, it's a
       1
      2
         different issue, Your Honor.
       3
                   THE COURT: Well, is there any objection to
         just passing this until the next hearing?
       4
                                 No, Your Honor. We would request
       5
                   MR. HOFFMAN:
04:09PM
         that we receive an answer to the question prior to the
      6
      7
         hearing so that we know if that's an issue.
      8
                   MR. VINCENT:
                                 That's not a problem, Your Honor.
       9
                   THE COURT: All right. Thank you.
                   There's also an issue that we have not resolved
04:09PM
      10
      11
         about Plaintiff's Exhibit 26, the email, and --
      12
                              Your Honor, I would ask the --
                   MR. ROBB:
                   THE COURT: Mr. Robb, if you want to be heard,
      13
      14
         please come up.
                              Thank you, Your Honor.
04:10PM
      15
                   MR. ROBB:
                   We received the proper email about two hours
      16
         ago, so that's now resolved.
      17
      18
                   THE COURT: All right. Obviously I continue to
      19
         feel that we're not likely to get to the T-Mobile case
         on this trial setting, but we have time now.
     20
04:10PM
      21
         counsel want to switch to issues that are solely
      22
         T-Mobile issues, we can take those up, or not.
      23
                   MR. HOFFMAN: At least from Plaintiff's point
      24
         of view, we would like to address those if possible,
     25
         Your Honor.
04:11PM
```

```
1
                   MR. KREVITT: Your Honor, we're happy to -- at
         the risk of being a broken record, we would also like a
      2
       3
         short period of time just to tee up some of the issues
         that remain in summary judgment and Daubert. I think we
       4
         can do that without full argument. There's just a few
04:11PM
      5
         issues that we thought might be helpful to direct your
      6
       7
         attention to.
      8
                   THE COURT: All right. Are these matters that
      9
         are also addressed in your current briefing?
      10
                   MR. KREVITT: Oh, yes, Your Honor.
04:11PM
      11
                   THE COURT: Okav.
      12
                   MR. KREVITT: Excuse me. But they could
         benefit from some explanation. Yes, Your Honor, they
      13
      14
         are.
      15
                   THE COURT: So you want to read them with
04:11PM
      16
         emphasis?
      17
                   MR. KREVITT: That's actually almost precisely
      18
         what I'd like to do, Your Honor. May I?
      19
                   THE COURT:
                               I will give you the next few
     20
         minutes.
04:12PM
                                 Okay. How many, Your Honor?
      21
                   MR. KREVITT:
      22
                   THE COURT: A few.
      23
                   MR. KREVITT: A few. Okay.
      24
                   Your Honor, one of the items that I had
     25
         mentioned that we -- and all kidding aside, this is
04:12PM

addressed in the briefing, but it did seem that it would
be helpful, given that it's a claim construction issue,
just to address it briefly with Your Honor.
'541 patent.
         There is an independent claim, Claim 1, for
which we have noninfringement arguments.
                                          Those are set
out fully in the briefing. I don't intend to raise
those with Your Honor unless, of course, Your Honor has
any questions.
               And then there is Claim 79.
a -- and Claim 83.
                    Those are depending issues.
         The issue in those claims, particularly with
respect to Claim 79, is intercepting, interception.
There really seems to be very little dispute that the
API message that has to be intercepted is, in fact, not
intercepted in the accused products. It gets where it's
supposed to go.
         And the noninfringe -- excuse me.
                                            The
infringement read, the position that the Plaintiff has
taken is that interception actually includes reception,
that interception and reception are the same;
specifically, that receiving and responding constitutes
interception. And the sole basis for that -- there's no
argument that that's the plain and ordinary meaning.
The sole basis for that is statements that Defendants in
the IPR took that position and that an expert -- AT&T's
```

```
expert, not T-Mobile, not Verizon -- AT&T's expert took
      1
         that position and so, therefore Your Honor should adopt
      2
       3
         that position. And it seemed worth just addressing that
         briefly.
       4
                   Even if the Defendants had taken that position,
       5
04:14PM
         it obviously would not amount to judicial estoppel.
      6
      7
         lost the IPR. But more importantly, Your Honor, and
      8
         this is really the point I wanted to rise and make
         clear:
                  Nothing that the Plaintiffs say happened at the
04:14PM
      10
         IPR actually happened, meaning the experts in the IPR
      11
         never took the position that reception is the same as
      12
         interception, or interception can be satisfied when
      13
         something actually arrives where it was intended to go.
      14
                   That's why there are statements in the briefing
      15
         over and over again in the text from the Plaintiffs that
04:14PM
      16
         say Defendants took this position that interception can
      17
         include receiving and responding. And then they will
      18
         quote from the IPRs.
      19
                   But what Your Honor will notice when looking at
     20
         the IPRs is that those statements don't say that.
04:15PM
      21
         time in the IPR did Defendants ever take the position
      22
         that interception means anything other than what we all
      23
         know it means, which is to not get to the intended
      24
         recipient.
      25
                   THE COURT:
04:15PM
                               Is the argument against that that
```

interception can include something that does end up 1 being received if it is also obtained by an unintended 2 3 third party on the way? MR. KREVITT: No. Your Honor. That isn't --4 there is some ambiguity in the briefing as to whether it 5 04:15PM has to ultimately get where it's intended. That's not 6 7 actually the issue. The issue is whether the message 8 gets intercepted first, even if it ultimately winds up where it was ultimately intended to go. I hope that 04:16PM 10 answers Your Honor's question. 11 There's two ways to think about interception. 12 One is it never gets where it was supposed to go, and 13 another is that it gets stopped, there's -- it intervened with before it arrives at the recipient that 14 15 it was originally intended. 04:16PM 16 Our view, we're not looking for a narrow definition of interception at all. The Plaintiffs, at 17 18 Page 10 of their brief, set out two definitions of 19 interception. The first is based on this supposed 20 statements in the IPR that did not happen. 04:16PM 21 receiving and responding to an API request constitutes 22 This is at Page 10 of -- and maybe, interception. 23 Mr. Sim, if we could pull up just that page. And you 24 will see that there are two definitions given. That's

25

04:16PM

the first.

PageID #: 24816

Document 317-1

You see here, Your Honor, number 1. 1 This is 2 from the Plaintiff's opposition brief, and they say the 3 Court should confirm that "intercepting" an API request or application message includes the full scope of the 4 term, including, one, receiving and responding to an API 5 04:17PM request consistent with Defendants' own admitted 6 7 understanding of the term and supported by the testimony 8 of numerous POSITAs, including Defendants' experts; and, two, receiving or observing a message intended for another as confirmed by general purpose dictionaries. 04:17PM 10 11 The first, this notion of receiving and 12 responding, which is, I think it is fair to say, literally the opposite of interception. The only basis 13 14 they have in their briefing is supposed statements by Defendants in the IPR and AT&T's expert. 04:17PM 15 I should note with respect to AT&T's expert, he 16 explici- -- of course, it shouldn't count against us in 17 18 this case and it's not sufficient to change the plain 19 and ordinary meaning of the term, but I should note that 20 he explicitly said in his report that he understands 04:18PM 21 this is how the Plaintiff is interpreting the term. And 22 applying that definition, he then applied that definition to certain prior art. 23 24 Nobody on the Defendants' side, any defendant 25 side, has ever taken the position that "interception" 04:18PM

means anything than what we all know "interception" 1 2 means. 3 The reference that was being discussed in the IPR, the Rao reference, was -- used "interception" 4 exactly the way "interception" is used everywhere else. 5 04:18PM So the reason I wanted to stand, Your Honor, is 6 7 One, once "interception" gets its plain and two things. 8 ordinary meaning, there is no infringement of Claims 79 and 83 and that's why they have come up with a 04:19PM 10 definition where reception equals interception. 11 And two, because they repeated it again in the 12 sur-reply, I wanted to make clear to the Court, and I'm 13 happy to walk through every single one of the statements 14 from the IPR. Not one of them actually says that 15 "interception" means anything other than not being 04:19PM 16 received by the intended recipient. Every single one of the statements is consistent that -- sorry. 17 I'm just 18 reading a note while trying to talk to you. 19 single one of those statements is consistent with the 20 plain and ordinary meaning of "interception." 04:19PM 21 I also would note, Your Honor, that when Dr. Raleigh was deposed, he said that the word 22 "interception" in the patent should have its plain and 23

ordinary meaning. So that's why, Your Honor, we thought

it might be helpful to address this briefly because the

24

25

04:19PM

```
only basis that is articulated in the briefs is what
      1
         Defendants supposedly said, and they said no such thing;
      2
       3
         and at a minimum, it's not sufficient for disavowal.
         It's not a lexicographer; it's not judicial estoppel.
       4
         It can't change the plain and ordinary meaning of the
      5
04:20PM
      6
         term.
      7
                   The only other thing to which they point is
      8
         that their expert now says it and, of course, that's not
      9
         sufficient to change the meaning of a term, an expert
04:20PM
      10
         just saying it. You need either intrinsic evidence, of
      11
         which there is none, or extrinsic evidence.
                                                        Some
      12
         dictionary, some technical paper, some anything that has
      13
         ever used the word "interception" in the way they are
      14
                         There is nothing.
                                            The sole basis is
         using it now.
         these alleged statements by Defendants which don't say
      15
04:20PM
      16
         it and would be insufficient in any event.
      17
                   THE COURT:
                               All right.
      18
                   MR. KREVITT:
                                 Thank you, Your Honor.
      19
                   THE COURT:
                               Thank you, Mr. Krevitt.
      20
                   MS. FAIR:
                              Good afternoon, Your Honor.
04:21PM
      21
                   THE COURT:
                               Good afternoon.
      22
                   MS. FAIR:
                              I am not about to argue about
      23
         noninfringement, as the Court can probably guess.
                                                              We
         had asked them for an identification in terms of what
      24
      25
         they wanted to address in terms of substantive motions
04:21PM
```

```
before the last pretrial conference and this was not on
      1
         that list, so we don't have the right person here to
      2
       3
         address that.
       4
                   My request would be if, within two days of
         getting the transcript of what Mr. Krevitt just argued,
      5
04:21PM
         if we could have leave, if we think there's something
      6
      7
         more that needs to be addressed for a two-page response
      8
         to the argument we just heard. I'm just concerned
      9
         because we --
                   THE COURT: I think that all of this is in the
04:21PM
      10
      11
         briefs.
                   I really do.
      12
                   MS. FAIR:
                              Okay.
      13
                   THE COURT:
                               I guarantee you I will request a
      14
         supplement if I determine it's not.
      15
                   MS. FAIR:
                              Thank you, Your Honor. We're not
04:21PM
      16
         interested in writing any more than we need to. I just
      17
         felt --
      18
                   THE COURT:
                               Okav.
      19
                   MS. FAIR: -- like we needed to make sure we
     20
         could be heard on what Mr. Krevitt just said if it
04:21PM
      21
         wasn't already addressed.
      22
                   THE COURT: All right. Certainly.
      23
                   Let me ask both sides. Is either side aware of
      24
         something that is in the Headwater/T-Mobile pretrial
     25
         order that we didn't address initially? In other words,
04:22PM
```

something to do with the protocol or the issues that are laid out that we need to address? Otherwise, I can move on to, I know there's some slight differences in the MILs, and maybe we can take those up. Is there anything in the pretrial order that we need to address? I believe from Defendants' MR. VINCENT: perspective, we don't believe there's anything unique to T-Mobile in the pretrial order that wasn't resolved, or similar issues in the Verizon pretrial order. I don't know if Plaintiffs have a different view. MR. DAVIS: Same view for Plaintiff, Your Honor. THE COURT: All right. Well, then let me turn to the MILs and ask first. I can't recall. I know I looked and there wasn't much difference in the Plaintiff's MILs regarding the two cases, but there may be. MR. HOFFMAN: Your Honor, the only difference is that in regard to Headwater's MIL 4, that was resolved by agreement between Verizon and Headwater. And then we had hoped to continue to talk and reach some agreement as to T-Mobile. We have not and so Headwater's MIL 4 in the T-Mobile case is still at issue, Your Honor.

THE COURT: All right. And is the difference

```
that T-Mobile did not make any investments as Verizon
      1
       2
         may have?
                   MR. VINCENT:
                                 I'll speak to that.
       3
                   So I think T-Mobile did not make investments in
       4
                     T-Mobile paid ItsOn for different ItsOn
      5
         Headwater.
04:24PM
         products, software. And so we have it on MIL 4 that is
      6
      7
         on that issue particularly for similar reasons.
      8
                   And also the Verizon investments because
      9
         Headwater has said that they intend to introduce the
      10
         Verizon investments in the T-Mobile case; and from our
04:24PM
      11
         perspective, again, that's doubly prejudicial. If they
      12
         are not coming in in Verizon, for the reasons we've
      13
         said, they are not tied to patents, they are not tied to
      14
         the asserted patents. They began before the asserted
         patents were even filed. They are certainly not -- they
      15
04:24PM
         are certainly prejudicial for T-Mobile such that if they
      16
         come in in T-Mobile, all of the things that Verizon said
      17
      18
         would have to happen.
      19
                   In other words, we would have to call -- have a
      20
         mini trial calling Verizon witnesses explaining that
04:25PM
      21
         these invest- -- Verizon investments are irrelevant to
      22
         the asserted patents, and we just don't think that's
         necessary in the T-Mobile trial, just as it was not
      23
      24
         necessary in the Verizon trial.
      25
                               I guess the Plaintiff's MIL 4 is
                   THE COURT:
04:25PM
```

```
211
                           PageID #: 24822
         not really about that. That just ended up being part of
      1
      2
         the compromise?
       3
                   MR. HOFFMAN: Yes. Your Honor.
       4
                   MR. VINCENT:
                                 I'm sorry. That goes to
         T-Mobile's MIL 4, yes.
      5
04:25PM
      6
                   THE COURT:
                               Okay. I guess at this point, if
      7
         there's an -- if Plaintiff's MIL 4 in the T-Mobile case
         has not been resolved, then let's resolve it.
      8
      9
                   MR. HOFFMAN: Your Honor, I have a couple of
         slides, if you wouldn't -- if I could approach.
04:26PM
      10
      11
                   THE COURT: All right.
      12
                   MR. HOFFMAN: Your Honor, this is a pretty
         straightforward issue. You've already ruled three times
      13
      14
         at least that in particular, the 2018 Series B offer to
         Verizon is not relevant, that it's not evidence that --
      15
04:26PM
         it's not evidence of the value of the company, and even
      16
      17
         if it was, the value of the company is not relevant to
      18
         the determination of damages.
      19
                   However, both -- however, T-Mobile in DX127
         seeks to enter into evidence that 2018 offer.
     20
                                                          Its
04:27PM
      21
         expert, Ms. Stamm, relies on that 2018 offer in exactly
```

22 the way Your Honor found was inappropriate. She uses it 23 to opine on the value of the company and to say that 24 that is essentially a cap on damages.

25

04:27PM

In their briefing, Defendants claim that

Mrs. Stamm does not actually rely on it, in sort of a 1 2 strange way. She's relying on InterDigital. And they say, well, she's relying on InterDigital, which is in 3 2020; but because this offer was made in 2018 and we can 4 make up a valuation from that offer, we get to push the 5 04:27PM InterDigital number back two years, from 2020 to 2018. 6 7 They say, therefore, she's not relying on it. 8 I don't really understand that. She is relying on it, and if it's not relevant -- if the determination 10 of -- if the valuation is not relevant, then it's not 04:28PM 11 relevant. And merely saying that it's sort of a backup 12 to InterDigital doesn't change the fact about that. Your Honor, there's nothing inconsistent 13 with -- the other point they raised in their opposition 14 is that they say it's inconsistent that we want to 15 04:28PM introduce the fact of the investment without talking 16 17 about or offering as an investment without talking about 18 the particular numbers and, Your Honor, we don't see 19 that it's inconsistent. 20 Dr. de la Iglesia, our validity expert, 04:28PM 21 addresses some of the investment information, some of 22 the investment evidence. He addresses it as evidence of industry praise and commercial success. He doesn't --23 24 for that, he doesn't rely on the numbers. And, Your 25 Honor, it's not really any different than, for example, 04:29PM

Your Honor's ruling about the Qualcomm and Fortress 1 offers where Your Honor in previous cases has allowed 2 3 the Defendants to introduce those as to the fact of the offer but has ordered that the amount be redacted 4 because it, just as an offer, is not in itself evidence 5 04:29PM of a reasonable royalty and would be prejudicial. 6 7 So that's -- all we ask is that essentially the 8 Court make the same order here as the 2018 offer as it 9 has in prior cases. 10 If I could have the ELMO for a second. 04:29PM 11 Your Honor, there's two other documents in this 12 category. One is DX126. This is a 2009 investment 13 discussion. It's a very similar issue. Again, it's 14 talking about a potential investment and the particular 15 valuation related to that investment. Again, under Your 04:30PM Honor's prior rulings, that's just not relevant and it's 16 17 clearly prejudicial. 18 And finally, as the DX128 from 2016, again it's 19 kind of the same thing. Here again, there's discussion 20 of investment and of a valuation attached to that 04:30PM 21 investment. We would argue that all three of these 22 exhibits fall under the same category and all three should be excluded. 23 24 THE COURT: All right. 25 MS. DOMINGUEZ: Hello again, Judge Payne. 04:31PM

04:31PM

04:31PM

04:32PM

04:32PM

04:32PM

25

```
couple of things here. I think this MIL, as Mr. Hoffman
1
   just showed, is broader than just the 2018 Series B, so
2
3
   I want to talk more broadly about what the MIL is
4
   requesting.
5
            What the MIL is really requesting is that
   Plaintiff have it both ways. They get to talk about the
6
7
   investments to bolster the patents. So they get to
8
   introduce facts about Verizon investing to bolster in
   terms of, he mentioned Mr. de la Iglesia on
10
   nonobviousness to bolster on damages. That's in their
11
   damages expert report. But they don't want Defendants
12
   to be able to introduce context.
            Now, as Mr. Robb will discuss with respect to
13
14
   T-Mobile's MILs, we don't think anything about Verizon's
   investments should be coming into the T-Mobile case at
15
         So that's our position, and you'll hear from
16
17
   Mr. Robb on that. But to the extent that anything about
18
   Verizon's investments comes in, then we should certainly
19
   be able to put those in context.
20
            So, for example, Mr. Sim, if you could please
21
   pull up T-Mobile's DTX128, please.
22
            So if Your Honor can read that other, or we
23
   could zoom in a little bit. But what Defendant's
   Exhibit 128 shows is how Verizon viewed the reasons for
24
```

investing. And, for instance, it says -- and this is

```
not a post hoc justification by Verizon now as to what
      1
         the investment was about. This is in June of 2016, at
      2
       3
         the time it was making its largest investment, what did
         it view the technology -- what did it view as the
       4
         technology it was investing in.
      5
04:33PM
      6
                   Well, it says directly that it's for a pricing
      7
         and billing technology platform. That's all.
                                                          It may be
         we'll hear Plaintiff say that they had other
      8
         technologies and try to say that some of the
04:33PM
      10
         technologies they were offering were relevant to these
      11
                    But from Verizon's perspective, Verizon had no
         patents.
      12
         knowledge of those technologies, no thought that they
         were investing in anything related to what's now accused
      13
         and asserted in this case from Verizon's perspective.
      14
         It was an investment in billing and pricing technology.
      15
04:33PM
      16
                   And so, again, T-Mobile's position is none of
         this should be coming into the T-Mobile case.
      17
                                                          The
      18
         Verizon investments are not relevant and are highly
      19
         prejudicial in the T-Mobile case. They create a
      20
         sideshow about what Verizon's investments were about.
04:34PM
      21
         But if anything is to be said about them, they should be
      22
         put in context, and the jury should be allowed to know
      23
         that Verizon certainly did not think it was investing in
      24
         anything about blocking background data or anything to
      25
         do with any aspect of the two patents that are now
04:34PM
```

```
216
```

1 asserted in this case. Verizon --THE COURT: How would the offers by Headwater 2 3 or equity shares provide context for the investment? 4 MS. DOMINGUEZ: Sure. So I think Your Honor's asking about the 2018 Series B letter. 5 04:34PM So, Mr. Sim, if we could pull up T-Mobile 6 7 DTX127, please. Okay. And if we could scroll down to 8 the pre-money valuation. There we go. 9 So what this provides context for is 04:35PM 10 when Headwater was seeking investments, how was it 11 positioning its own company. I know Your Honor has seen 12 this document and so I don't want to say more than is necessary if Your Honor's already well familiar. 13 14 But what happened here is that a group of investors including Dr. Raleigh, his cofounder, and 15 04:35PM 16 Sippl Investments made an offer in suggested terms for a Series B round to the other investors. And what they 17 18 said at that time as they were positioning this outreach 19 to other investors and trying to get other investors to 20 sign onto a Series B, they said: We, the cofounders and 04:35PM 21 Sippl, are viewing the company at a pre-money valuation , and based on that, here's what we 22 as being 23 are proposing as the terms of this investment. 24 Now, that puts in context how the cofounders 25 and major investor were viewing the company at that 04:36PM

04:36PM

04:36PM

04:37PM

04:37PM

04:37PM

point in time and what that outreach, how they were framing those offers to other investors.

Ms. Stamm -- and this is all addressed in the Daubert briefing on the Stamm Daubert. Ms. Stamm also uses it in a way that is fully consistent with Your Honor's prior rulings. She does not use it to say is the valuation of the patent. She does not use it to establish a royalty in this case.

What she uses it for, and she explained this in her deposition -- and that's Exhibit G to T-Mobile's opposition to this MIL -- at Page 74, Lines 8 through 19, Ms. Stamm explained she is properly, and as the Court has already allowed, using a different set of information related to InterDigital to help support her damages opinion.

But it is pertinent as a check to know -because that transaction that Your Honor has already
allowed in was in 2020. It is pertinent to know that
two years earlier, so closer in time to the hypothetical
negotiation, the cofounders and major investor in
Headwater were not viewing the value of the company as
higher, right?

So she uses it as a check that her number, which she gets from other sources, is accurate and that the number wouldn't have been higher at an earlier point

04:38PM

04:38PM

04:38PM

04:39PM

04:39PM

218

```
So I think it's relevant both just to
1
   in time.
2
   contextualize -- and, again, we don't think Verizon's
3
   investment should be coming into the T-Mobile case at
         But if anything is said about them, it does
4
   contextualize how the cofounders and the major investor
5
   in Headwater were viewing the company, how Headwater was
6
7
   framing its investment outreach to other investors.
                                                         And
8
   then Ms. Stamm also uses it in the appropriate way that
   she explained at her deposition.
10
            THE COURT: And show me one more time the slide
11
   you started with about the Verizon investment?
12
            MS. DOMINGUEZ:
                            Oh, sure. And that was -- I
13
   didn't have slides, but I do have the exhibit itself.
14
   So that's one example. There's an -- there's the
   example I showed is T-Mobile's DTX128.
15
                                            That was -- and
16
   we can -- Mr. Sim is pulling that up if you'll just give
17
   us just a minute.
18
            So this is a letter, internal in Verizon dated
19
   June 23rd, 2016, and it is signed -- if you could scroll
20
   down just a little bit further, Mr. Sim -- by
21
   individuals who were at Verizon Ventures who were
22
   analyzing this investment, and it's their view on what
23
   the investment was for. So they say, the "Re" line is
24
   Verizon Venture Investment, ItsOn. And they say: We
25
   have reviewed Verizon Venture's proposal to make an
```

```
1
         investment in ItsOn. And they say that ItsOn is a
      2
         company that has developed a pricing and billing
       3
         technology platform for emerging wireless technologies
         such as 5G, and then it goes on. So it's saying exactly
       4
         what Verizon thought it was investing in.
      5
04:39PM
      6
                   So to the extent that the Plaintiff is going to
      7
         try and use Verizon's investments to bolster the patents
      8
         in this case, this letter shows, as far as Verizon was
         concerned, its investment had nothing to do with the
04:39PM
      10
         patents in this case, with any of the technologies that
      11
         are accused in this case, with anything to do with
      12
         background data or blocking data at all. They viewed it
      13
         as a investment into a pricing and billing technology
      14
         platform.
      15
                   And there's one more exhibit, if Your Honor
04:40PM
         would like to see it, that similarly puts in context the
      16
         2009 investment if Your Honor has questions about that.
      17
      18
         But these documents would be to contextualize the
      19
         Verizon investments if those investments were to come
     20
         into the T-Mobile case at all.
04:40PM
      21
                   THE COURT: All right. Thank you,
      22
         Ms. Dominguez.
      23
                   MR. HOFFMAN: Your Honor, very quickly.
      24
                   In terms of the argument about context, counsel
      25
         showed very clearly that there's no need to present to
04:40PM
```

the jury the valuation terms in these documents in order 1 2 to make the point. We do not seek to exclude all 3 evidence of the investments. We seek only to exclude the, in particular, the valuations that have been, and 4 most importantly the 2018 one, being used for an 5 04:41PM improper purpose, but the valuations in the earlier ones 6 7 as well. 8 We just looked at a document where counsel 9 pointed out that there was context for that, for at 04:41PM 10 least the context they want to focus on for those 11 investments. The document can be redacted to remove the 12 financial terms and still provide all of that context. In fact, none of the documents you showed were 13 14 the financial terms really relevant to any of the The only reason to present the financial terms 15 04:41PM is to misuse the valuations therein. 16 In terms of whether it's relevant that Verizon 17 18 made an investment in ItsOn and Headwater, there aren't 19 that many carriers. Verizon is a major competitor of 20 T-Mobile. It's a major force in the industry. 04:42PM 21 hard to think of a better example of industry 22 recognition than an investment by one of T-Mobile's 23 competitors. 24 THE COURT: What do you have that indicates 25 that the investment was in any way based on the asserted 04:42PM

patents and their technology?

04:42PM

04:42PM

04:43PM

04:43PM

04:43PM

MR. HOFFMAN: What we have, Your Honor, is -this is only one of the documents that were exchanged.
There is a series of communications and presentations
provided to Verizon. In those presentations and
information provided to Verizon, there is information
about the patents or both the -- before they were issued
in terms of the technology that was covered by the
patents and after they were issued.

So these are only some of the documents of that ongoing conversation between Verizon and T-Mobile. But the -- in terms of the -- the valuation terms are not necessary to that argument between experts or even between the parties about the relevance of these documents. The jury can make that determination without being exposed to these numbers.

And finally, Your Honor, calling something a check is not a "get out of jail free" card. Clearly it's being used, the valuation of 2018 is being used as evidence of the value of the patent and supporting reasonable royalty. And so it's not -- calling it a check is just admitting that in fact it is being used for an improper purpose, and it's not a check because it's not just being used to say, well, this is a similar number. It's actually literally being used to pull the

```
1
         2020 number from the 2018, pull it back two years
         earlier to say that same valuation, the same improper
      2
      3
         valu- -- the use of the valuation that applied in 2018
         actually applies in -- sorry, in 2020, actually applies
      4
         in 2018 as well.
      5
04:44PM
      6
                   THE COURT: All right. Mr. Hoffman, are there
      7
         other differences between the Plaintiff's MILs in
      8
         Verizon and in T-Mobile other than this MIL 4?
      9
                   MR. HOFFMAN: There are, Your Honor. Those are
      10
         Defendants' MILs.
04:44PM
      11
                   THE COURT: Right. But as far as the
      12
         Plaintiff's MILs go?
      13
                   MR. HOFFMAN: No other differences as
      14
         Plaintiff's MILs.
      15
                   THE COURT: All right. Thank you. I will look
04:44PM
         further at the difference and get out an order on
      16
         Plaintiff's MIL 4 in the T-Mobile case.
      17
      18
                   MS. DOMINGUEZ: Your Honor, if I could just
      19
         very briefly respond to two of the items that came up in
     20
         your discussion with Mr. Hoffman just now.
04:44PM
      21
                   THE COURT:
                               All right.
      22
                   MS. DOMINGUEZ:
                                   Okay. So the actual investment
         amounts, the amounts that Verizon actually did invest,
      23
      24
         we agree those can and should be redacted. Again, we
      25
         think none of this should come in at all, but those
04:45PM
```

```
1
         numbers can and should be redacted.
                   As to the
                                 number that's in the
      2
      3
         Series B, the 2018, that number can't be redacted
      4
         because Ms. Stamm actually uses that as a check in her
         analysis. Again, it's not the basis of any number she
      5
04:45PM
         derives.
                   She doesn't use it to determine damages.
      6
      7
         what she uses it as is the cofounders and major investor
      8
         saying we did this work. We valued the company and our
         pre-money valuation is
                   Just briefly, Your Honor correctly noted that
04:45PM
      10
      11
         for industry recognition, there must be nexus to the
      12
         patents, and here there is nothing, zero, tying any of
         these investments to the asserted patents.
      13
      14
                   THE COURT: All right.
      15
                   MS. DOMINGUEZ:
                                   Thank you.
04:45PM
      16
                   THE COURT:
                               Thank you.
      17
                   Which of the Defendants' MILs in T-Mobile is
      18
         different than in Verizon?
      19
                   MR. VINCENT: Let me focus on T-Mobile's MILs
      20
         Number 3 and 4.
04:46PM
      21
                   THE COURT: All right.
      22
                   MR. VINCENT: Thank Your Honor.
      23
                   So T-Mobile MIL 3 is focused on Samsung's
      24
         roaming reduction, which we've heard some about, and we
      25
         have several of their motions on this issue.
04:46PM
```

```
224
```

noninfringement. We have -- sorry -- a motion to strike 1 2 Dr. Wesel's opinions on Samsung's roaming reduction as 3 not timely disclosed as an accused product. We have summary judgment motions on copying. And some of the 4 5 issues that are intertwined with these motions, just to 04:46PM repeat the point that Ms. Dominguez just made and that 6 7 I've made earlier today and you heard last week is the 8 point about nexus. And I'll just repeat this point briefly before getting into the specific T-Mobile, 04:47PM 10 really the aspects of Samsung's roaming reduction. 11 We all agree, everyone agrees that there must 12 be, for secondary considerations, copying, all of this must be a nexus to the asserted claims. And when the 13 14 dispute crystalized last week is that Headwater's counsel got up and said there doesn't have to be an 04:47PM 15 16 element-by-element analysis that these ItsOn products 17 practice the claims, all right? We have not said that 18 there needs to be a claim chart. 19 And I believe Headwater's counsel got up and 20 cited a case that they had not cited in their briefing, 04:47PM and that case is WBIP versus Kohler. That's 829 F.3d --21 22 I'm sorry; I think that's 1317. If that's not right, I'll correct that. 23 But Headwater's counsel cited that case with a 24 25 proposition that you don't have to cite -- you don't 04:48PM

have to tie a nexus to all the elements; you just have 1 to tie in one element, and that's flatly wrong. 2 3 The law is, in fact, the opposite. not the law. 4 The WPI -- sorry, WBIP case, in that case there was a presumption of nexus because the Plaintiff did 5 04:48PM tie -- did have evidence explaining that a product 6 7 embodied the patent and that necessarily required an 8 expert analysis proving that a product embodied the And in that case, then the evidence of 04:48PM 10 secondary considerations was allowed to be admitted. 11 There is no such presumption here because 12 Headwater has not had -- doesn't have any evidence 13 whatsoever that any of the ItsOn products practice the 14 asserted claims. What the Federal Circuit has said in the 15 04:49PM 16 absence of that presumption is this, and this is In Re: Kao, and it says 639 F.3d 1057, Federal Circuit. 17 Where 18 the offered secondary consideration actually results 19 from something other than what is both claimed and novel 20 in the claim, there is no nexus to the merits of the 04:49PM 21 claimed invention, meaning that there must be a nexus to 22 some aspect of the claim not already in the prior art. And that case cites other cases for this same 23 24 proposition. 25 The point, what is the point? The point is 04:49PM

04:50PM

04:50PM

04:50PM

04:51PM

04:51PM

```
this, the point that I made earlier: Is that for there
1
2
   to be a nexus, there has to be something, some evidence
   tying this evidence of secondary considerations to what
 3
   is novel about the patent, novel about the claims.
 4
                                                         Not
   any element. That's what Headwater's counsel said.
                                                         Any
 5
   element, background, for example.
6
7
            Background is in Claim 1 of the '541, which was
8
   disclaimed. To the extent there can be any novelty, it
   has to be tied to the asserted claims that are not
10
   disclaimed, which involve intercepting an API message.
11
   And you will not see a single mention of that claim
12
   element in any of the evidence that Headwater's expert
13
   uses to establish nexus. Now, that's the overlapping, I
   quess, legal principle. There is no nexus.
14
            Even if the Court were to deny all of our
15
   motions, okay, Dr. Wesel's -- our motion to strike
16
17
   Dr. Wesel's infringement analysis on roaming reduction
18
   and our motion, for summary judgment motion on copying,
19
   even if the Court were to deny those motions, Headwater
20
   should still not be allowed to discuss roaming reduction
   in this case and that's because of the nature and timing
21
22
   of the evidence that it uses to rely, to bolster, to
23
   support this claim.
24
            What's Headwater's story? Headwater's story
25
   that it wants to tell is this. It wants to say that
```

ItsOn was so great, it gave -- it made this product for 1 2 Sprint called roaming reduction. No problems. Any bugs 3 were just minor. But Sprint and Samsung colluded to terminate the Sprint contract and have Samsung copy 4 ItsOn's product. That's the story they want to tell, 5 04:51PM right? 6 7 The evidence on which they rely to do that is 8 not only prejudicial, was never timely identified in any 9 disclosure in this case. Let me talk to the first point about the termination of the Sprint/ItsOn agreement. 04:51PM 10 11 Can I have the ELMO, please? 12 This is the master services agreement on which 13 Sprint terminated the ItsOn contract, and you see that 14 it's got two termination provisions: A termination for convenience and a termination for cause. And Sprint, 15 04:52PM when terminating the agreement, invoked the termination 16 for convenience clause. 17 18 What Headwater wants to do -- and we know this 19 because they tried to do it; they tried to do it in the 20 Samsung case -- is to have their witnesses testify that 04:52PM 21 because Sprint terminated the agreement under the 22 termination for convenience clause, that means, as a legal matter, that there was no problems with the ItsOn 23 24 software. That if there were problems with the ItsOn 25 software, then they would have terminated for cause. 04:52PM

Again, no witness in this case is qualified to 1 2 make opinions about the legal import of the termination 3 provision, the legal clause under which Sprint terminated the contract. So no witness, lay or expert, 4 should be making -- should be invoking the particular 5 04:53PM clause of the contract by which Sprint terminated the 6 7 agreement in order to make insinuations about the 8 reasons for which Sprint terminated. 9 There's simply no basis for that. There's no 10 expertise. There's no evidence to support that, but we 04:53PM 11 know that's what they will try to do is invoke this 12 clause and make a legal argument without qualifications. That's the Sprint side of it. 13 14 Next they want to turn to the 15 04:53PM 16 And I want to 17 point out, again, whether or not we should -- we believe 18 that should not be in the case at all. 19 But what is uniquely problematic here is that 20 Headwater and the evidence on which it relies was never 04:54PM 21 once identified in any disclosure in this case. So take Dr. Wesel's infringement analysis. There are 22 23 infringement contentions. We have interrogatories that 24 go to infringement. We have interrogatories that go to

25

04:54PM

copying.

```
Asking Headwater to identify the bases for its
       1
      2
         contentions, identify the evidence on which it relies,
       3
         and this point -- I can't underscore it-- is undisputed.
         They did not cite a single one of these documents or a
       4
         single one of the witnesses on which they rely.
      5
04:54PM
      6
                   They rely on depositions of Samsung employees
      7
         taken in the Samsung case for the patent at issue in
      8
         that Samsung case. We were not involved in that case.
         We had no notice of those depositions. We did not have
04:55PM
      10
         a chance to participate in those depositions.
      11
                   Dr. Wesel, for example, cites Mr. Dan Durig,
      12
         again, a Samsung employee deposed in the Samsung case.
      13
         He cites the deposition of Mr. Kim. He cites that
      14
         deposition 119 times in his analysis of roaming
         reduction, to explain how roaming reduction worked.
      15
04:55PM
      16
                   Headwater never identified Mr. Durig, never
      17
         identified Mr. Kim in any of their Rule 26 disclosures,
      18
         in any interrogatory response, never identified this
      19
         evidence as relevant to any issue in this case.
      20
         won't find it. It won't be disclosed. You can look,
04:55PM
      21
         and it'll -- the evidence will not be identified in any
      22
         disclosure, interrogatory response, et cetera.
                   And I want to point Your Honor's attention
      23
         to -- that's Dr. Wesel. I want to show Your Honor
      24
      25
         Dr. -- or, sorry, Mr. de la Iglesia's report.
04:56PM
```

THE COURT: Mr. Vincent, how is this a motion 1 in limine? 2 3 MR. VINCENT: Because the evidence -- and among the evidence is hearsay. Because it was evidence taken 4 5 by a nonbias -- by a third party, which we did not 04:56PM participate in, had no ability to ask these witnesses 6 7 questions and, given the timing of the disclosure, have 8 no -- now no remedy. 9 We have no ability to go ask Samsung these 04:56PM 10 questions about how this product supposedly worked. We 11 have no ability to ask Samsung's engineers questions 12 about whether or not it meets the limitations of the claims in this case versus the claims at issue in the 13 14 Samsung case. The first time they ever mentioned 15 Mr. Durig's name or ever mentioned Mr. Kim's name or 04:56PM 16 ever identified these documents as relevant to any issue is in their expert reports. 17 18 Mr. de la Iglesia, the entire basis, the entire 19 basis of Mr. de la Iglesia's argument about Samsung, 20 about the copying is based on an email that was not 04:57PM 21 produced to Defendants until after the expert reports 22 were served and deposition testimony by Mr. Durig that Headwater did -- sorry, that Headwater took in the 23 24 Samsung case that Defendants did not have a chance to 25 04:57PM participate in or respond to.

I can show Your Honor, if I could have the 1 ELMO. 2 3 And this is just a portion of Mr. de la Iglesia's report. This is about secondary 4 considerations. I believe this is about specifically 5 04:57PM copying, but he cites similar testimony for most of 6 7 these secondary considerations. And what does he cite? 8 You see he cites to the Samsung third-party 36477. That was not given to us until Headwater served its opening 04:58PM 10 reports. And then he cites the testimony of Mr. Durig. 11 And again, this is why it's a MIL issue, Your Honor, 12 because of the nature of the allegations. What does Mr. de la Iglesia say here? 13 What does he -- what is his opinion? His opinion is that 14 15 04:58PM 16 17 18 19 And again, the only evidence he cites is an 20 email that was not produced in this case until after 04:58PM 21 Plaintiffs served their opening reports, at least by

04:58PM 25 We have an interrogatory asking them for their

22

23

24

those documents.

according to the Bates number, and deposition testimony.

Again, they never cited any of that testimony, any of

```

```
basis for secondary considerations. You will not find
this in the -- identified in that. And the prejudice to
us is that -- the 403 basis of the MIL is that how are
we supposed to defend ourselves against this, this
testimony, and it was not even given in this case.
         If they -- this is the backwards approach that
Headwater has taken in their MIL briefing.
                                           They said if
we wanted -- if we wanted this evidence, we could have
gotten it. Well, if they had ever disclosed this as
relevant, that would be a different question, but they
never did.
         THE COURT: I will try to give this matter full
consideration on your briefing. I've got to tell you
it's hard for me to follow the issue now, and I don't
know if it's because we're seven hours into this hearing
or because of the nature of it, but it's not going to be
a successful MIL if I can't understand the point of it.
So I'm going to try and give it a fair reading tomorrow
and --
         MR. VINCENT: Your Honor, appreciate that, and
I -- probably in the presentation had something to do
with it and so I apologize for that. Hopefully we can
remedy that at a different time, but I appreciate Your
Honor's consideration.
```

THE COURT: All right. So where we stand now,

```
I think that with respect to Verizon, other than the
      1
      2
         motions that are briefed and pending -- and those, we'll
         try and get rulings out promptly -- I think it's
       3
         otherwise ready to go. All it requires is for one case
       4
         to settle, which is a distinct possibility.
      5
05:00PM
                   Is there something else that -- you know, we'll
      6
      7
         gather back on that Wednesday before trial.
                                                        If there
      8
         are issues that -- regarding the exhibits that have not
         been taken care of and, for that matter, any other
05:01PM
      10
         issues that we've left open, I'll probably get an email
      11
         sent out asking you to file a joint notice to identify
      12
         what issues there are, that we need to take up at that
         time.
      13
      14
                   Mr. Davis, is there anything else that you want
         on the record for the Plaintiff?
      15
05:01PM
      16
                   MR. DAVIS:
                               No, Your Honor. I think that makes
      17
         perfect sense. That, you know, a lot has transpired at
      18
         these two PTCs and that it would be helpful for the
      19
         parties to confer about, you know, what issues remain
      20
         and make sure we're all clear on that for the PTC.
05:01PM
      21
                   THE COURT: And obviously we're going to need
      22
         more time for the T-Mobile case, and that time will be
      23
         provided before trial. And we'll also have a trial date
      24
         provided.
      25
                   MR. DAVIS:
                               Oh, can I ask one question, Your
05:01PM
```

1 Honor? Is it the case that we'll return to T-Mobile 2 3 MILs, the remaining T-Mobile issues on the 18th if there's time, or do we want to make that just dedicated 4 to Verizon and we'll take up T-Mobile issues at another 5 05:02PM time? 6 7 THE COURT: I'm open to suggestion. Frankly, I 8 think that we could do that. We also have the 9 Headwater/Samsung 641 case set on that day, so we don't 05:02PM 10 have a full day to do it. But I don't know. 11 Does counsel for T-Mobile have an opinion on 12 that? MR. VINCENT: Your Honor, I think we should, I 13 guess, finalize Verizon, as Your Honor said. 14 And if we can start the T-Mobile MILs before 4:15, probably can do 15 05:02PM If it gets to be a point we're not going to be 16 17 able to give those arguments the attention they deserve, 18 we can potentially reserve another day. 19 But hopefully we can get all that done in one 20 That's aspirational, but it just depends on -- I 05:03PM day. 21 think it partly depends on how much the parties can 22 resolve between now and that date. Well, there's currently a hearing 23 THE COURT: 24 set in the Headwater/Samsung matter for that day, and am 25 I remembering right? Was that a hearing that related to 05:03PM

```
1
         the spoliation issue?
                   MR. DAVIS: It does, Your Honor, and we -- I
      2
       3
         don't know the current state, but I think we intend to
         talk with Samsung about, you know, the ruling on the
       4
         sort of similar motion that was issued in the Verizon
       5
05:03PM
         case and the impact of that on the spoliation.
      6
       7
                   THE COURT:
                               I understand that Samsung was not
      8
         heard in connection with the recent ruling and may have
         a belief that they can point out things that would alter
05:04PM
      10
              But in any event, all that is by way of saying,
      11
         Mr. Vincent, I don't know how much time we do have.
                                                                But
      12
         anyway, between now and then, we'll straighten out
         whether we're going to address other issues in T-Mobile
      13
      14
         as well.
                   MR. VINCENT:
      15
                                 I think that we'll be prepared to
05:04PM
         do so, to the extent time allows, but we'll need to make
      16
         sure we finalize the Verizon issues first. Those will
      17
      18
         take precedent.
      19
                   THE COURT: All right. Anything else that
     20
         counsel for either Verizon or T-Mobile wants to put on
05:04PM
      21
         the record?
      22
                   MR. KREVITT: No, Your Honor. We thank you
      23
         very much for your time and consideration on all these
      24
         issues.
      25
                   THE COURT: All right. Well, I appreciate the
05:04PM
```

```
They've been helpful. Thank you.
 1
   arguments.
2
             MR. DAVIS: Thank Your Honor.

## CERTIFICATE OF OFFICIAL REPORTER

Document 317-1

PageID #: 24848

I, Dana Hayden, Deputy Official Realtime Court Reporter, in and for the United States District Court for the Eastern District of Texas, do hereby certify that pursuant to Section 753, Title 28, United States Code that the foregoing is a true and correct transcript of the stenographically reported proceedings held in the above-entitled matter and that the transcript page format is in conformance with the regulations of the Judicial Conference of the United States.

Dated this 7th of June, 2025.

Dana Hayden, CCR, RMR, CRR, CRC Dana@ArkansasRealtimeReporting.com
